

## INSTRUCTIONS FOR CONTRIBUTORS

### SUBMISSION OF MANUSCRIPTS

Manuscripts should be submitted online via our manuscript submission and tracking site, <http://www.editorialmanager.com/psm/>. Full instructions for electronic submission are available directly from this site. To facilitate rapid reviewing, communications for peer review will be electronic and authors will need to supply a current e-mail address when registering to use the system.

Papers for publication from Europe (except those on genetic topics, irrespective of country), and all papers on imaging topics, should be submitted to the UK Office.

Papers from the Americas, Asia, Africa, Australasia and the Middle East (except those dealing with imaging topics), and all papers dealing with genetic topics, irrespective of country, should be sent to US Office.

Generally papers should not have text more than 4500 words in length (excluding these sections) and should not have more than a combined total of 5 tables and/or figures. Papers shorter than these limits are encouraged. For papers of unusual importance the editors may waive these requirements. A structured abstract of no more than 250 words should be given at the beginning of the article using the headings: Background; Methods; Results; Conclusions. The name of an author to whom correspondence should be sent must be indicated and a full postal address given in the footnote. Any acknowledgements should be placed at the end of the text (before the References section).

**Declaration of Interest:** A statement must be provided in the acknowledgements listing all financial support received for the work and, for all authors, any financial involvement (including employment, fees, share ownership) or affiliation with any organization whose financial interests may be affected by material in the manuscript, or which might potentially bias it. This applies to all papers including editorials and letters to the editor.

Contributors should also note the following:

1. S.I. units should be used throughout in text, figures and tables.
2. Authors should spell out in full any abbreviations used in their manuscripts.
3. Foreign quotations and phrases should be followed by a translation.
4. If necessary, guidelines for statistical presentation may be found in: **Altman DG, Gore SM, Gardner MJ & Pocock SJ** (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

**REFERENCES** (1) The Harvard (author-date) system should be used in the text and a complete list of References cited given at the end of the article. In a text citation of a work by more than two authors cite the first author's name followed by et al. (but the names of all of the authors should be given in the References section). Where several references are cited together they should be listed in rising date order. (2) The References section should be supplied in alphabetical order (authors' names in **bold**, journal titles in full), following the text. Some examples follow:

**Miller PM, Byrne M, Hodges A, Lawrie SM, Johnstone EC** (2002). Childhood behaviour, psychotic symptoms and psychosis onset in young people at high risk of schizophrenia: early findings from the Edinburgh high risk study. *Psychological Medicine* **32**, 173–179.

**Cleckley HJ** (1941). *The Mask of Sanity*, 2nd edn. Mosby: St. Louis, MO.

**Brewer WJ, Wood SJ, DeLuca C, Pantelis C** (2006). Models of olfaction for exploring neurodevelopment. In *Olfaction and the Brain* (ed. W. J. Brewer, D. Castle and C. Pantelis), pp. 97–121. Cambridge University Press: Cambridge.

(3) Online citations

*doi (when published online prior to printed issue)*

**Lauritsen MB, Pedersen CB, Mortensen CB** (2004). The incidence and prevalence of pervasive developmental disorders: a Danish population-based study. *Psychological Medicine*. Published online: 21 October 2004. doi:10.1017/S0033291704002387.

Quantitative techniques for health equity analysis – Technical Notes ([http://siteresources.worldbank.org/INTPAH/Resources/Publications/Quantitative-Techniques/health.eq\\_tn07.pdf](http://siteresources.worldbank.org/INTPAH/Resources/Publications/Quantitative-Techniques/health.eq_tn07.pdf)). Accessed 15 February 2006.

[Authors are requested to print-out and keep a copy of any online-only material, in case the URL changes or is no longer maintained.]

**FIGURES AND TABLES** Only essential figures and tables should be included. Further tables, figures, photographs and appendices, may be included with the online version on the journal website. To ensure that your figures are reproduced to the highest possible standards, Cambridge Journals recommends the following formats and resolutions for supplying electronic figures. Please ensure that your figures are saved at final publication size and are in our recommended file formats. Following these guidelines will result in high quality images being reproduced in both the print and the online versions of the journal. **Line artwork:** Format: tif or eps, Colour mode: black and white (also known as 1-bit), Resolution: 1200 dpi; **Combination artwork (line/tone):** Format: tif or eps, Colour mode: grayscale (also known as 8-bit), Resolution: 800 dpi; **Black and white halftone artwork:** Format: tif, Colour mode: grayscale (also known as 8-bit), Resolution: 300 dpi; **Colour halftone artwork:** Format: tif, Colour mode: CMYK colour, Resolution: 300 dpi. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in Arabic numerals. Captions for figures should be typed double-spaced on separate sheets. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet after the References section. Titles should be typed above the table.

**PROOFS AND OFFPRINTS** Page proofs will be sent to the author designated to receive correspondence. corrections other than to printer's errors may be charged to the author. The corresponding author of each paper will receive a PDF file of their article and hard copy offprints may be purchased if they are ordered on the form supplied when the proof is returned.

# PSYCHOLOGICAL MEDICINE

## CONTENTS

### EDITORIALS

#### Risk assessment and receiver operating characteristic curves

Szmukler G, Everitt B & Leese M 895

#### Is depression a chronic mental illness?

Monroe SM & Harkness KL 899

### REVIEW ARTICLE

#### Categories *versus* dimensions in personality and psychopathology: a quantitative review of taxometric research

Haslam N, Holland E & Kuppens P 903

### ORIGINAL ARTICLES

#### Perceived parenting and risk for major depression in Chinese women

Gao J, Li Y, Cai Y, Chen J, Shen Y, Ni S, Wei Y, Qiu Y, Zhu X, Liu Y, Lu C, Chen C, Niu Q, Tang C, Yang Y, Wang Q, Cui W, Xia J, Liu T, Zhang J, Zhao B, Guo Z, Pan J, Chen H, Luo Y, Sun L, Xiao X, Chen Q, Zhao X, He F, Lv L, Guo L, Liu L, Li H, Shi S, Flint J, Kendler KS & Tao M 921

#### Intergenerational transmission and continuity of stress and depression: depressed women and their offspring in 20 years of follow-up

Hammen C, Hazel NA, Brennan PA & Najman J 931

#### Regulation of mRNA expression encoding chaperone and co-chaperone proteins of the glucocorticoid receptor in peripheral blood: association with depressive symptoms during pregnancy

Katz ER, Stowe ZN, Newport DJ, Kelley ME, Pace TW, Cubells JF & Binder EB 943

#### The pathoplasticity of dysphoric episodes: differential impact of stressful life events on the pattern of depressive symptom inter-correlations

Cramer AOJ, Borsboom D, Aggen SH & Kendler KS 957

#### Depression symptom dimensions as predictors of antidepressant treatment outcome: replicable evidence for interest-activity symptoms

Uher R, Perlis RH, Henigsberg N, Zobel A, Rietschel M, Mors O, Hauser J, Dernovsek MZ, Souery D, Bajs M, Maier W, Aitchison KJ, Farmer A & McGuffin P 967

#### A randomized trial comparing repetitive transcranial magnetic stimulation given 3 days/week and 5 days/week for the treatment of major depression: is efficacy related to the duration of treatment or the number of treatments?

Galletly C, Gill S, Clarke P, Burton C & Fitzgerald PB 981

#### The efficacy of mindfulness-based cognitive therapy in recurrent depressed patients with and without a current depressive episode: a randomized controlled trial

van Aalderen JR, Donders ART, Giommi F, Spinhoven P, Barendregt HP & Speckens AEM 989

#### Emotional and symptomatic reactivity to stress in individuals at ultra-high risk of developing psychosis

Palmier-Claus JE, Dunn G & Lewis SW 1003

#### Appraisals, psychotic symptoms and affect in daily life

Peters E, Lataster T, Greenwood K, Kuipers E, Scott J, Williams S, Garety P & Myin-Germeys I 1013

#### Dissociation mediates the relationship between childhood trauma and hallucination-proneness

Varese F, Barkus E & Bental RP 1025

#### Individualized prediction of illness course at the first psychotic episode: a support vector machine MRI study

Mourao-Miranda J, Reinders AATS, Rocha-Rego V, Lappin J, Rondina J, Morgan C, Morgan K D, Fearon P, Jones PB, Doody GA, Murray RM, Kapur S & Dazzan P 1037

#### Cognitive therapy for people with a schizophrenia spectrum diagnosis not taking antipsychotic medication: an exploratory trial

Morrison AP, Hutton P, Wardle M, Spencer H, Barratt S, Brabban A, Callcott P, Christodoulides T, Dudley R, French P, Lumley V, Tai SJ & Turkington D 1049

#### Effective elements of cognitive behaviour therapy for psychosis: results of a novel type of subgroup analysis based on principal stratification

Dunn G, Fowler D, Rollinson R, Freeman D, Kuipers E, Smith B, Steel C, Onumere J, Jolley S, Garety P & Bebbington P 1057

#### Exposure, probable PTSD and lower respiratory illness among World Trade Center rescue, recovery and clean-up workers

Luft BJ, Schechter C, Kotov R, Brohier J, Reissman D, Guerrero K, Udasin I, Moline J, Harrison D, Friedman-Jimenez G, Pietrzak RH, Southwick SM & Bromet EJ 1069

#### Classes of conduct disorder symptoms and their life course correlates in a US national sample

Breslau J, Saito N, Tancredi DJ, Nock M & Gilman SE 1081

#### Lower birth weight indicates higher risk of autistic traits in discordant twin pairs

Losh M, Esserman D, Anckarsäter H, Sullivan PF & Lichtenstein P 1091

#### Early mental health morbidity and later smoking at age 17 years

Zubrick SR, Lawrence D, Mitrou F, Christensen D & Taylor CL 1103

### BOOK REVIEW

#### *Autism Spectrum Disorders*

Hallmayer J 1117
