

JOURNAL OF PALEONTOLOGY

THE PALEONTOLOGICAL SOCIETY MEMOIR 48

DECAPOD CRUSTACEANS FROM THE
EOCENE CASTLE HAYNE LIMESTONE,
NORTH CAROLINA: PALEOCEANOGRAPHIC IMPLICATIONS

RODNEY M. FELDMANN, KAREN L. BICE,
CARRIE SCHWEITZER HOPKINS, ERIC W. SALVA,
AND KATHERINE PICKFORD

Memoirs of The Paleontological Society are occasional publications consisting of monographs and symposia that are too extensive for publication in the *Journal of Paleontology* as part of the regular issues. Ordinarily, memoirs are published as supplements to a regular issue of the *Journal*. Inquiries concerning submittal of manuscripts for inclusion in the Memoir Series may be made to the Managing Editor of the *Journal of Paleontology*.

For information on cost and availability of back numbers of the Memoir Series, please contact: SEPM Business Office, P.O. Box 4756, Tulsa, OK 74159, for numbers 1 (1968) through 16 (1985) or Journal of Paleontology, P.O. Box 1897, Lawrence, KS 66044-8897, for number 17 (1986) and following.

The JOURNAL OF PALEONTOLOGY (ISSN 0022-3360) is published bimonthly by the Paleontological Society, 810 East 10th St., Lawrence, KS 66044, USA. Dues and subscriptions for members of The Paleontological Society are \$59.00 per year. Subscription price is \$99 per year. Second-class postage paid at Lawrence, KS. For information on prices of back issues of the JOURNAL, please contact: SEPM Business Office, P.O. Box 4756, Tulsa, OK 74159, for volumes 1 (1927) through 59 (1985) or Paleontological Society Business Office, P.O. Box 1897, 810 East 10th St., Lawrence, KS 66044-8897, for volumes 60 (1986) and following.

Communications about the JOURNAL, notices, subscriptions, rates, changes of address, and nonreceipt of preceding numbers should be addressed to: JOURNAL OF PALEONTOLOGY Subscriptions Office, P.O. Box 1897, 810 East 10th St., Lawrence, KS 66044-8897, U.S.A. Claims for nonreceipt of preceding numbers must be submitted within three months (six months if foreign) of the date of publication in order to be filled gratis. Communications about membership and requests for blanks for nomination of new members in The Paleontological Society should be directed to the Secretary: Thomas W. (Woody) Henry, Box 282200-16, Lakewood, CO 80228-3108.

Address manuscripts to:

Editors, Journal of Paleontology
Department of Geology
121 Trowbridge Hall
University of Iowa
Iowa City, IA 52242-1379
fossils@uiowa.edu

Managing Editors for the Journal are Ann F. Budd, Brian J. Witzke, and Julia Golden, Department of Geology, University of Iowa, Iowa City, IA 52242-1379. Technical editors are: Gordon C. Baird, Department of Geology, SUNY-Fredonia, Fredonia, NY 14063; Steven J. Hageman, Department of Geology, Field Museum of Natural History, Chicago, IL 60605; Richard D. Hoare, Department of Geology, Bowling Green State University, Bowling Green, OH 43403.

The JOURNAL OF PALEONTOLOGY is printed offset by Allen Press, Inc., Lawrence, KS 66044.

CONTENTS

ABSTRACT 1
 INTRODUCTION 1
 STRATIGRAPHY AND GEOLOGIC SETTING 1
 COLLECTING LOCALITIES 3
 SYSTEMATIC PALEONTOLOGY 3
 ORDER Decapoda Latreille, 1803 3
 SECTION Podotremata Guinot, 1977 3
 FAMILY Raninidae de Haan, 1839 3
 GENUS *Lophoranina* Fabiani, 1910 3
 Lophoranina raynoriae Blow and Manning, 1996 3
 GENUS *Cyrtorhina* Monod, 1956 5
 Cyrtorhina fusseli Blow and Manning, 1996 5
 SECTION Heterotremata Guinot, 1977 6
 FAMILY Calappidae de Haan, 1833 6
 GENUS *Calappilia* A. Milne Edwards, 1873 6
 Calappilia sitzi Blow and Manning, 1996 6
 GENUS *Matutites* Blow and Manning, 1996 8
 Matutites miltonorum n. sp. 8
 FAMILY Portunidae Rafinesque, 1815 9
 SUBFAMILY Polybiinae Ortmann, 1893 9
 GENUS *Pororaria* Glaessner, 1980 9
 Pororaria? granulosa n. sp. 9
 FAMILY Xanthidae Macleay, 1838 11
 GENUS *Eocarpilius* Blow and Manning, 1996 11
 Eocarpilius blowi n. sp. 11
 GENUS *Titanocarcinus* A. Milne Edwards, 1863 12
 Titanocarcinus euglyphos Bittner, 1875 12
 FAMILY Goneplacidae Macleay, 1838 13
 GENUS *Glyphithyreus* Reuss, 1859 13
 Glyphithyreus sturgeoni n. sp. 13
 FAMILY Majidae Samouelle, 1819 15
 SUBFAMILY Majinae Samouelle, 1819 15
 GENUS *Wilsonimaia* Blow and Manning, 1996 15
 Wilsonimaia ethelae Blow and Manning, 1996 15
 FAMILY Parthenopidae Macleay, 1838 16
 SUBFAMILY Parthenopinae Macleay, 1838 16
 GENUS *Acantholambrus* Blow and Manning, 1996 16
 Acantholambrus baumi Blow and Manning, 1996 16
 Isolated Claws and Claw Fragments 17
 INSHORE OCEANOGRAPHY 18
 Water temperature 18
 Water clarity 19
 Salinity 19
 Wave and current activity 19
 GLOBAL CIRCULATION 21
 Overview 21
 Age, location, and the problem of resolution 21
 The models and model boundary conditions 21
 The model-simulated Castle Hayne paleoenvironment 22
 CONCLUSIONS 25

ILLUSTRATIONS

FIGURES
 1–Map showing the generalized distribution of middle Eocene rocks in North Carolina and the location of quarries from which decapod crustaceans were collected in the Castle Hayne Formation 2
 2–Generalized stratigraphic section of the Castle Hayne Formation, as exposed in the Martin Marietta Quarry, showing the general relationship of member and lithofacies relationships. 3
 3–*Lophoranina raynoriae*. 4
 4–Line drawing of *Lophoranina raynoriae* showing orientation of measurements. 4
 5–*Cyrtorhina fusseli*. 5
 6–Line drawing of *Cyrtorhina fusseli* showing measurements taken. 6
 7–*Calappilia sitzi*. 7
 8–Line drawing of *Calappilia sitzi* showing the orientation of measurements taken. 7
 9–*Matutites miltonorum* n. sp. 8
 10–Line drawing of *Matutites miltonorum* showing the orientation of measurements taken. 8
 11–*Pororaria? granulosa* n. sp. 10
 12–Line drawing of *Pororaria? granulosa* showing measurements taken on the holotype. 10
 13–*Eocarpilius blowi* n. sp. 11
 14–Line drawing of *Eocarpilius blowi* showing orientation of measurements taken. 12
 15–*Titanocarcinus euglyphos* Bittner. 12
 16–Line drawing of *Titanocarcinus euglyphos* showing orientation of measurements taken. 13
 17–*Glyphithyreus sturgeoni* n. sp. 14
 18–Line drawing of *Glyphithyreus sturgeoni* showing the measurements taken on the holotype. 14
 19–*Wilsonimaia ethelae*. 15
 20–Line drawing of *Wilsonimaia ethelae* showing orientation of measurements taken. 15
 21–Dorsal view of the carapace of *Acantholambrus baumi*. 16
 22–Line drawing of *Acantholambrus baumi*. 16
 23–Isolated claws collected from the Castle Hayne Formation. 17
 24–Model-simulated mean annual temperature (°C) in the uppermost 50 meters. 22
 25–Northern hemisphere winter minimum (1) and summer maximum (2) temperatures (°C) in the top 50 meters of the model ocean. 22
 26–Model-simulated annual temperature (°C; solid line) and salinity (ppt; dashed line) cycles in the top 50 meters, averaged over the region shown by the box in Figure 24. 23
 27–Model-simulated mean annual salinity (parts per thousand; ppt) in the uppermost 50 meters. 23
 28–Model-simulated salinity (ppt) in the uppermost 50 meters for northern hemisphere winter (1) and summer (2). 23
 29–Model-simulated mean annual streamlines indicating the direction of flow in the uppermost 50 meters. 24
 30–Model-simulated mean annual streamlines indicating North Atlantic region circulation (upper 100 meters). 25

TABLES

1–Measurements, in millimeters, taken on specimens of <i>Lophoranina raynoriae</i>	4	5–Measurements, in millimeters, taken on <i>Titanocarcinus</i> <i>euglyphos</i>	13
2–Measurements, in millimeters, taken on <i>Calappilia sitzi</i>	7	6–Measurements, in millimeters, taken on <i>Wilsonimaia ethelae</i>	16
3–Measurements, in millimeters, taken on <i>Matutites miltonorum</i> n. sp.	8	7–Paleoenvironmental conditions interpreted for the Castle Hayne Limestone and compared to inferred conditions in the develop- ment of tropical and temperate carbonate accumulations.	18
4–Measurements, in millimeters, taken on <i>Eocarpilius blowi</i> n. sp.	12
