Aronszajn, N. La théorie des noyaux reproduisants et ses applications. I . . . 133

—— Note additionnelle à l'article 'La théorie des noyaux reproduisants et ses applications' 205

Born, Max. The thermodynamics of crystal lattices. I. Discussion of the methods of calculation 100

Born, Max and **Bradburn, Mary.** The thermodynamics of crystal lattices. II. Calculation of certain lattice sums occurring in thermodynamics. (With 1 Figure in the Text) 104

Bradburn, Mary and **Born, M.** The thermodynamics of crystal lattices. II. Calculation of certain lattice sums occurring in thermodynamics. (With 1 Figure in the Text) . 104

Bradburn, Mary. The thermodynamics of crystal lattices. III. The equation of state for a face-centred cubic lattice. (With 8 Figures in the Text) 113

Bronowski, J. The fixed part of the canonical system 31

Davenport, H. On the product of three homogeneous linear forms. IV . . . 1

Duncanson, W. E. Momentum distribution in molecular systems. VII. Momentum distribution and shape of the Compton line for Li_2 and N_2 180

Eliezer, C. J. The hydrogen atom and the classical theory of radiation . . . 173

Feather, N. On the statistics of random distributions of paired events, with applications to the results obtained in the use of the interval selector with particle counters. (With 2 Figures in the Text) 84

Goddard, L. S. Bases for the prime ideals associated with certain classes of algebraic varieties 35

—— A problem in the summation of series 200

Green, H. G. The focal form of the quadric in n dimensions 159

Hodge, W. V. D. Some enumerative results in the theory of forms 22

Jaeger, J. C. The energy loss by radiation of fast electrons in a Coulomb field . . 127

Jeffreys, H. On pulses whose travel times are not true minima 48

Jones, R. Some manifolds generated by normal rational curves 153

Kemmer, N. The algebra of meson matrices 189

Littlewood, D. E. On the number of terms in a simple algebraic form under the symplectic group 197

Ma, S. T. A relativistic formula for the scattering of mesons under the influence of radiation damping 168

Miller, A. R. The vapour pressure equation of solutions and the osmotic pressure of rubber 54

—— Corrigendum. The vapour pressure equation of solutions and the osmotic pressure of rubber 131

Moran, P. A. P. The measure of plane sets 51

Newman, M. H. A. Stratified systems of logic 69

Rushbrooke, G. S. Statistical mechanics of dimerization in perfect solutions . . 202

Sedgwick, W. F. Note on a paper 'On the theory of successive radioactive transformations' 68

CAMBRIDGE BOOKS

THE LIFE OF SIR J. J. THOMSON

By LORD RAYLEIGH

8 *plates.* 18*s. net*

"A human and personal study which could have been written only from close intimacy. It not only traces a chapter in scientific history which no physicist can ignore, but conveys to the non-technical reader the vision of a great mind, profound and yet simple—a clue to the intellectual honesty, courage and insight which have created our current outlook upon nature."

Birmingham Post

A HISTORY OF SCIENCE

and its relations with Philosophy and Religion

By SIR WILLIAM CECIL DAMPIER

Third edition, revised and enlarged. 25*s. net*

Much new scientific investigation has been carried on and many striking discoveries have been made during the decade 1930–1940. Hence it has been necessary to make extensive changes in the old text of this work, as well as to write a chapter on the output of the last ten years. The result is, in effect, a new book.

"Sir William Dampier is to be congratulated on the appearance of a third edition of his history of science." *Nature*

Reprint now ready

ADVENTURES IN IDEAS

By A. N. WHITEHEAD

9*s. net*

"The most superb commentary on the movement of civilization written... in our time....One of the few books of the inter-war period which are destined for immortality." *The New Statesman*
