EDITOR-IN-CHIEF J. GANI

# ADVANCES IN APPLIED PROBABILITY

This is a companion publication to the *Journal of Applied Probability* published by the Applied Probability Trust. It contains review and expository papers in applied probability, as well as mathematical and scientific papers of interest to probabilists, and letters to the editor. An annual volume of approximately 800 pages is published in four issues appearing in March, June, September and December.

## EDITORIAL COMMITTEE

<i>Editor-in-Chief</i>	J. GANI (University of Kentucky)
<i>Coordinating Editors</i>	C. C. HEYDE (University of Melbourne) M. F. NEUTS (University of Delaware) G. E. H. REUTER (Imperial College, London)
<i>Executive Editor</i>	MAVIS HITCHCOCK (University of Sheffield)

## EDITORS

P. J. BROCKWELL (Colorado State University)  
V. R. CANE (University of Cambridge)  
J. W. COHEN (University of Utrecht)  
E. J. HANNAN (Australian National University)  
J. KEILSON (University of Rochester)  
D. G. KENDALL (University of Cambridge)  
J. F. C. KINGMAN (University of Oxford)  
K. KRICKEBERG (Université René Descartes, Paris)  
R. M. LOYNES (University of Sheffield)  
K. R. PARTHASARATHY (Indian Statistical Institute, New Delhi)  
C. A. B. SMITH (University College, London)  
R. L. TWEEDIE (Siromath, Sydney)

**TECHNICAL EDITOR** KATHLEEN M. LYLE (University of Sheffield)

## ADDRESS FOR CORRESPONDENCE

All correspondence relating to the submission of papers should be sent to:

The Executive Editor,  
Applied Probability,  
Department of Probability and Statistics,  
The University,  
Sheffield S3 7RH, England.

Subscription rates and notes for contributors are to be found on the inside back cover.

- 697 K. V. MITOV, V. A. VATUTIN AND N. M. YANEV. Continuous-time branching processes with decreasing state-dependent immigration
- 715 D. P. GAVER, P. A. JACOBS AND G. LATOUCHE. Finite birth-and-death models in randomly changing environments
- 732 HANS-OTTO GEORGII. On the ferromagnetic and the percolative region of random spin systems
- 766 S. P. LALLEY. Limit theorems for first-passage times in linear and non-linear renewal theory
- 804 MOSHE HAVIV AND LUDO VAN DER HEYDEN. Perturbation bounds for the stationary probabilities of a finite Markov chain
- 819 K. F. TURKMAN AND A. M. WALKER. On the asymptotic distributions of maxima of trigonometric polynomials with random coefficients
- 843 M. DEISTLER AND B. M. PÖTSCHER. The behaviour of the likelihood function for ARMA models
- 867 HANS DADUNA. Burke's theorem on passage times in Gordon–Newell networks
- 887 F. BACCELLI, P. BOYER AND G. HEBUTERNE. Single-server queues with impatient customers
- 906 UWE JANSEN. Conditional expected sojourn times in insensitive queueing systems and networks

*Letters to the editor*

- 920 P. SALMINEN. On the conditional Ornstein–Uhlenbeck processes
- 923 I. B. GERTSBAKH. Optimal group preventive maintenance of a system with observable state parameter
- 926 PANTELIS TSOUCAS AND JEAN WALRAND. A note on stochastic bounds for queueing networks
- 929 M. F. RAMALHOTO. Bounds for the variance of the busy period of the  $M/G/\infty$  queue
- 933 N. RAVICHANDRAN AND A. GRAVEY. Some comments on the simple queue
