

CAMBRIDGE

JOURNALS

Proceedings of the Nutrition Society

Published on behalf of The Nutrition Society

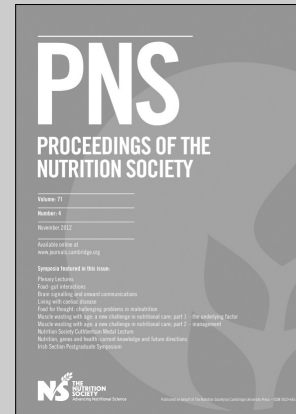

Editor-in-Chief

Maria O'Sullivan, Trinity College Medical Centre, Dublin, Republic of Ireland

Proceedings of the Nutrition Society publishes papers and abstracts presented by members and invited speakers at the scientific meetings of The Nutrition Society. The journal provides an invaluable record of the scientific research currently being undertaken, contributing to 'the scientific study of nutrition and its application to the maintenance of human and animal health.'

Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Katy Christomanou at Cambridge University Press for further details (email: kchristomanou@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 12 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 16, 2013 (12 issues):
Internet/print package: £886/\$1700 Americas only/€1420 EU only
Internet only: £675/\$1280 Americas only/€1420 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and

which are not, and will not be obliged to give reasons to prospective advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

US POSTMASTERS: Please send address corrections to

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, including references.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system (eJournalPress). All manuscripts must be submitted online at <http://phn.msubmit.net/>. If any difficulties are encountered, please contact the Publications Office at phn@nutsoc.org.uk

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing

interests. The submission must include a statement within an Acknowledgements section reporting any competing interests, all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Editorial

Food environments: measuring, mapping, monitoring and modifying
K Ball and L Thornton 1147

HOT TOPIC – Food environment

Validation of a home food inventory among low-income Spanish- and Somali-speaking families
MO Hearst, JA Fulkerson, M Parke and L Martin 1151

Use of point-of-sale data to assess food and nutrient quality in remote stores
J Brimblecombe, R Liddle and K O'Dea 1159

Neighbourhood deprivation and outlet density for tobacco, alcohol and fast food: first hints of obesogenic and addictive environments in Germany
S Schneider and J Gruber 1168

Variation in supermarket exposure to energy-dense snack foods by socio-economic position
AJ Cameron, LE Thornton, SA McNaughton and D Crawford 1178

Assessment of the dining environment on and near the campuses of fifteen post-secondary institutions
TM Horacek, MB Erdman, C Byrd-Bredbenner, G Carey, SM Colby, GW Greene, W Guo, KK Kattelman, M Olfert, J Walsh and AB White 1186

Socio-economic status, neighbourhood food environments and consumption of fruits and vegetables in New York City
D Jack, K Neckerman, O Schwartz-Soicher, GS Lovasi, J Quinn, C Richards, M Bader, C Weiss, K Konty, P Arno, D Viola, B Kerker and A Rundle 1197

Is there an association between the home food environment, the local food shopping environment and children's fruit and vegetable intake? Results from the Dutch INPACT study
WJC van Ansem, CTM Schrijvers, G Rodenburg and D van de Mheen 1206

Effectiveness of subsidies in promoting healthy food purchases and consumption: a review of field experiments
R An 1215

Neighbourhood and consumer food environment is associated with dietary intake among Supplemental Nutrition Assistance Program (SNAP) participants in Fayette County, Kentucky
A Gustafson, S Lewis, S Perkins, C Wilson, E Buckner and A Vail 1229

Characterizing the food environment: pitfalls and future directions
AV Moudon, A Drewnowski, GE Duncan, PM Hurvitz, BE Saelens and E Scharnhorst 1238

Epidemiology

Beverage consumption and BMI of British schoolchildren aged 9–13 years
T Coppinger, YM Jeanes, M Mitchell and S Reeves 1244

Predictors and mediators of differences in soft drinks consumption according to gender and plans of further education among Norwegian secondary-school children
M Hilsen, SJ te Velde, E Bere and J Brug 1250

Is the intake of sugar-containing beverages during adolescence related to adult weight status?
SP Stoof, JWR Twisk and MR Olthof 1257

Caregiver food behaviours are associated with dietary intakes of children outside the child-care setting
TO Erinosh, L Beth Dixon, C Young, LM Brotman and LL Hayman 1263

Examining the relationship between completeness of teachers' implementation of the Krachtvoer healthy diet programme and changes in students' dietary intakes
KMHH Bessems, P van Assema, R Crutzen, TGWM Paulussen and NK de Vries 1273

Breakfast consumption and daily physical activity in 9–10-year-old British children
PAJ Vissers, AP Jones, K Corder, A Jennings, EMF van Sluijs, A Welch, A Cassidy and S Griffin 1281

College cafeteria snack food purchases become less healthy with each passing week of the semester
B Wansink, Y Cao, P Saini, M Shimizu and DR Just 1291

Nutrition and health

Breakfast consumption and CVD risk factors in European adolescents: the HELENA (Healthy Lifestyle in Europe by Nutrition in Adolescence) Study
L Hallström, I Labayan, JR Ruiz, E Patterson, CA Vereecken, C Breidenassel, F Gottrand, I Huybrechts, Y Manios, L Mistura, K Widhalm, K Kondaki, LA Moreno and M Sjöström, on behalf of the HELENA Study Group 1296

Vitamin D deficiency is a problem for adult out-patients? A university hospital sample in Istanbul, Turkey
O Cigerli, H Parildar, AD Unal, O Tarcin, R Erdal and NG Demirag 1306

Marketing and communication

Evaluation of food and beverage television advertising during children's viewing time in Spain using the UK nutrient profile model
MM Romero-Fernández, MÁ Royo-Bordonada and F Rodríguez-Artalejo 1314

Determinants of Dutch general practitioners' nutrition and physical activity guidance practices
SME van Dillen, GJ Hiddink and CMJ van Woerkum 1321

Survey of nutrition knowledge of physicians in Kuwait
AR Allafi, F Alajmi and A Al-Haifi 1332
