

CAMBRIDGE

New Titles in Plasma Physics from Cambridge University Press!

Physics of Radio-Frequency Plasmas

Pascal Chabert, Nicholas Braithwaite

Contents: 1. Introduction; 2. Plasma dynamics and equilibrium; 3. Bounded plasmas; 4. Radiofrequency sheaths; 5. Single frequency capacitively-coupled plasmas; 6. Multi-frequency capacitively-coupled plasmas; 7. Inductively-coupled plasmas; 8. Helicon plasmas; 9. Real plasmas; 10. Electrical measurements; Index.

\$95.00: Hardback: 978-0-521-76300-4: 394 pp.

Research Methods for Science

Michael P. Marder

Unique introduction to the design, analysis, and presentation of scientific projects, an essential textbook for undergraduates in science and mathematics.

\$25.99: Paperback: 978-0-521-14584-8: 236 pp.

Reliability in Scientific Research

Improving the Dependability of Measurements, Calculations, Equipment, and Software

I. R. Walker

Contents: 1. Basic principles of reliability, human error, and other general issues; 2. Mathematical calculations; 3. Basic issues concerning hardware systems; 4. Obtaining items from commercial sources; 5. General points regarding the design and construction of apparatus; 6. Vacuum system leaks and related problems; 7. Vacuum pumps and gauges, and other vacuum-system concerns; 8. Mechanical devices and systems; 9. Cryogenic systems; 10. Visible and near-visible optics; 11. Electronic systems; 12. Interconnecting, wiring, and cabling for electronics; 13. Computer hardware and software, and stored information; 14. Experimental method.

\$79.00: Hardback: 978-0-521-85770-3: 610 pp.

Principles of Plasma Physics for Engineers and Scientists

Umran S. Inan, Marek Gołkowski

"I have been teaching Introductory Plasma Physics to senior undergraduates and beginning graduate students for many years, and I find the level of the presentation of material, the order that the topics are presented, and the overall length of the book to be an excellent match for my needs in a textbook."

—David Hammer, Cornell University

\$99.00: Hardback: 978-0-521-19372-6: 284 pp.

Prices subject to change.

Go Mobile

CJO Mobile (CJOm) is a streamlined
Cambridge Journals Online (CJO)
for smartphones and other
small mobile devices

- Use CJOm to access all journal content including *FirstView* articles which are published online ahead of print
- Access quickly and easily thanks to simplified design and low resolution images
- Register for content alerts or save searches and articles – they will be available on both CJO and CJOm
- Your device will be detected and automatically directed to CJOm via: journals.cambridge.org

UNIVERSITY PRESS

Instructions for Authors

Editorial policy The journal welcomes submissions in any of the areas of plasma physics. Its scope includes experimental and theoretical work on basic plasma physics, the plasma physics of magnetic and inertial fusion, laser–plasma interactions, industrial plasmas, plasma devices and plasmas in space and astrophysics. This list is, of course, merely illustrative of the wide range of topics on which papers are invited, and is not intended to exclude any aspect of plasma physics that is not explicitly mentioned.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers. Manuscripts must be written in English. *Journal of Plasma Physics* employs a rigorous peer-review process whereby all submitted manuscripts are sent to recognized experts in their subjects for evaluation. The Editors' decision on the suitability of a manuscript for publication is final.

Submission of manuscripts Papers may be submitted to the Editor or any of the Associate Editors, preferably by email in pdf format. When a paper is accepted, the authors will be asked to supply source files in LaTeX or Word. Instructions for the preparation of these files and LaTeX style files are given in the Instructions for Contributors link at journals.cambridge.org/pla.

Incremental publishing and DOIs In order to make articles which have been accepted for publication in *Journal of Plasma Physics* available as quickly as possible, they are now published incrementally online (at Cambridge Journals Online; journals.cambridge.org) The online version is available as soon as author corrections have been completed and before the article appears in a printed issue. A reference is added to the first page of the article in the journal catchline. This is the DOI – Digital Object Identifier. This is a global publishers' standard. A unique DOI number is created for each published item. It can be used for citation purposes instead of volume, issue and page numbers. It therefore suits the early citation of articles which are published on the web before they have appeared in a printed issue. See journals.cambridge.org/pla.

Proof reading Only typographical or factual errors may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

Offprints Corresponding authors will receive a PDF of their article upon publication. Print offprints may be purchased from the publisher if ordered at first proof stage.

Copying This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of \$16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022–3778/2010 \$16.00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

JOURNAL OF PLASMA PHYSICS

VOLUME 77 • PART 3 • JUNE 2011

Letter to the Editor

- Amplification of neutrino oscillations by a density ripple in dense plasmas
P. K. Shukla 289

Main Articles

- Suppression of stimulated Raman scattering at ultra relativistic laser power: Effect of localization
Ruchika Gupta, Prerana Sharma, R. P. Sharma and M. Rafat 293
- Behavior of the floating potential in an electronegative sheath as a function of electronegativity and negative ion temperature
M. Sharifian and B. Shokri 307
- A theory of MHD instability of an inhomogeneous plasma jet
Anatoly S. Leonovich 315
- Generation of sheared flows by drift waves in a strongly magnetized electron–positron–ion plasma
Nitin Shukla and P. K. Shukla 339
- Numerical analysis of double layers in the downward current region of the aurora
Sanqiu Liu and Jingjing Liao 345
- Dispersive magnetized waves in the solar wind plasma
B. Dasgupta, Dastgeer Shaikh and P. K. Shukla 357
- Magnetic electron-drift vortex modes in an inhomogeneous quantum plasma
Ismat Naeem, Arshad M. Mirza, W. Masood and T. Farid 367
- The Frequency shift of an extraordinary (X) wave propagating through plasma
L. Shahrassai, H. Khosravi and S. Sobhanian 377
- On nonlinear Alfvén-cyclotron waves in multi-species plasma
Eckart Marsch and Daniel Verscharen 385
- Drift instabilities' interaction: A tightening of the B-direction component on the amplitude of the azimuthally propagating wave
Constantine L. Xaplanteris 405
- Space-charge waves in a relativistic electron beam with ion-channel guiding
Saeed Mirzanejad, Behrouz Maraghechi, Farshad Sohbatzadeh and Iman Kamel-Jahromi 419
