

### **Scope of the Journal**

Clay Minerals - Journal of Fine Particle Science publishes electronically and in paper form research papers about clays, clay minerals and related materials, natural or synthetic. Aspects covered include: Earth Processes (interactions in 'system earth' ± soil science, and geology/mineralogy) including genesis/synthesis, phase transformations, stability, weathering, soil-organic interactions, ion-exchange, basin analysis, clay petrology; Solid State Chemistry/Materials Science ± synthesis, structure and dynamics, reactivity, crystal chemistry, mechanical, thermal, electrical properties, micro and nanophase materials; Environmental Science ± analytical methods, elemental distribution, waste containment, health issues, environmental impact assessment, conservation of cultural heritage; Colloid/Surface Science ± adsorption, colloid stability, surface chemistry, reactivity; and Applied Science and Technology ± industrial uses and technical applications, including mining and processing of clay, zeolite (and other) deposits and application in ceramics, paper, paint, polymer, ion-exchange, sorption, catalysis etc.

### **Submission of manuscripts**

In a letter accompanying the manuscript, the submitting author must state that all authors agree with the final version of the manuscript. The letter must also state that the manuscript has not previously been published elsewhere, either in full or in part, and that, while under review for Clay Minerals, it will not be submitted to any other publication. Authors are encouraged to suggest up to three possible reviewers for their papers.

All manuscripts are to be submitted online at <http://www.edmgr.com/clayminerals/>. The current set of instructions for authors is available at: <https://www.cambridge.org/CLM>

All authors are allowed, free of charge, an e-print of their papers published in the journal.

### **Join the Mineralogical Society today**

If you are a regular reader of Clay Minerals consider joining the Society and receiving your own copy four times a year at a very modest cost. Membership currently starts at £55 per annum. For this, you will receive bi-monthly copies of Elements, our international membership magazine (in full colour) on mineralogy, geochemistry and petrology as well as online access to Mineralogical Magazine, Clay Minerals and Elements. You may also opt to pay an additional premium in order to continue receiving paper copies of our journals. Full details on how to join the Society and an application form can be found on the Society's website at [www.minersoc.org](http://www.minersoc.org). Membership of the Society introduces you to a vibrant community of those interested in the mineral sciences. Through membership of one or more of the Society's eight special interest groups you can take an active part in the Society's numerous scientific meetings and conferences as described on the website.

### **Mineralogical Society Journals**

#### *Mineralogical Magazine*

International journal of mineral sciences which covers the fields of mineralogy, crystallography, geochemistry, petrology, environmental geology and economic geology. This journal is available primarily as an e-journal.

#### *Clay Minerals*

International journal of clay minerals and fine particle science, published four times a year, including research papers about clays, clay minerals and related materials, natural or synthetic. The journal includes papers on Earth processes, soil science, geology/mineralogy, chemistry/material science, colloid/surface science and applied science and technology. The journal is available primarily as an e-journal.

### **Copyright**

For both the paper and electronic versions, copyright of all papers accepted shall be assigned to the Mineralogical Society before publication, except where Crown Copyright is reserved.

## CONTENTS

### Articles

- VICTOR MATHEUS JOAQUIM SALGADO-CAMPOS , LUIZ CARLOS BERTOLINO, FRANCISCO JOSÉ DA SILVA, JULIO CEZAR MENDES and REINER NEUMANN: Mineralogy and chemistry of a new halloysite deposit from the Rio de Janeiro pegmatite province, south-eastern Brazil 1
- MALIHE SARABADAN, HADIS BASHIRI and SEYED MAHDI MOUSAVI: Modelling, kinetics and equilibrium studies of crystal violet adsorption on modified montmorillonite by sodium dodecyl sulfate and hyamine surfactants 16
- SHU-QIN ZHENG, OU CHEN, SI-CHENG LIU, AN LI, LI-JUN LI, YONG-BING YUAN and CENG ZHANG: Synthesis of an NaY zeolite molecular sieve from a kaolin/dimethyl sulfoxide intercalation composite 28
- QIN WANG, BIN MU, SHUE LI, XIAOWEN WANG, LI ZONG and AIQIN WANG: Facile fabrication of a stable fluorescent yellow X-10GFF/palygorskite hybrid pigment *via* semi-dry grinding 37
- CUNJUN LI, MINGHAO WANG, ZHAOLIANG LIU, YANQI XU, CHUNHUI ZHOU and LINJIANG WANG: Kaolinite-armoured polyurea microcapsules fabricated on Pickering emulsion: controllable encapsulation and release performance of a lipophilic compound 46
- CRISTIANE GIMENES DE SOUZA, TAMMY CAROLINE LIMA DE JESUS, RAFAEL CAVALCANTE DOS SANTOS, LÍVIA MELO BOMFIM, LUIZ CARLOS BERTOLINO, DÉBORA FRANÇA DE ANDRADE5, LUIZ ANTONIO D´AVILA and LUCIANA S. SPINELLI: Characterization of Brazilian palygorskite (Guadalupe region) and adsorptive behaviour for solvatochromic dyes 55
- TAKA AKI WAJIMA: Synthesis of Fe-layered double hydroxide from bittern and its nitrate-ion removal ability 65
- ZHE WANG, HONG LI, HAIYAN CHEN, JUAN LV, HAO LENG, JUNHUI XIAO and SHUAI WANG: Effects of grinding and dehydration on kaolin in a steam jet mill 75
