

# BULLETIN

# Volume 5 (1971)

## of the Australian Mathematical Society

## Number 2

C. C. Heyde and J. R. Leslie Alan Lambert	<i>Improved classical limit analogues for Galton-Watson processes with or without immigration</i>	145
	<i>Unitary equivalence and reducibility of invertibly weighted shifts</i>	157
A. Brown	<i>On the differential equations for tide-well systems</i>	175
J. R. Giles	<i>A Banach space with support homeomorphism is reflexive</i>	187
Kurt Mahler	<i>An arithmetic remark on entire periodic functions</i>	191
	<i>A finite set covering theorem</i>	197
Alan Brace and D. E. Daykin	<i>A skew-Hadamard matrix of order 92</i>	203
Jennifer Wallis	<i>Integrability of trigonometric series III</i>	205
Masako Izumi and Shin-ichi Izumi		
A. R. Amir-Moéz and C. R. Perry	<i>Remarks on theorems of Thompson and Freede</i>	221
J. B. Diaz and R. Výborný	<i>On some mean value theorems of the differential calculus</i>	227
M. R. Vaughan-Lee	<i>On product varieties of groups</i>	239
John A. Beachy	<i>Cotorsion radicals and projective modules</i>	241
J. R. Blake	<i>Self propulsion due to oscillations on the surface of a cylinder at low Reynolds number</i>	255
R. M. Bryant and L. G. Kovács	<i>A note on generalized characters</i>	265
C. Christensen	<i>Rings with a few more zero-divisors</i>	271
Susan Dancs	<i>The sub-near-field structure of finite near-fields</i>	275
J. N. Ward	<i>On finite groups admitting automorphisms with nilpotent fixed-point group</i>	281
Abstracts of Australasian Ph.D. theses		
Paul Pentony	<i>Laws in torsion-free nilpotent varieties with particular reference to the laws of free nilpotent groups</i>	283
Jennifer Wallis	<i>Combinatorial matrices</i>	285
B. E. Clancy	<i>Multigroup neutron transport theory in plane geometry</i>	287

Bull. Austral. Math. Soc. Vol. 5 (1971) No. 2, pp. 145-288

THE UNIVERSITY OF QUEENSLAND PRESS  
ST LUCIA, QUEENSLAND 4067

## The BULLETIN of the Australian Mathematical Society

The BULLETIN began publication in 1969. Two volumes of three numbers each are published annually, at a subscription of \$25 in 1972. Subscription orders and orders for back numbers should be sent to the Business Manager (address inside front cover). Manuscripts for publication should be sent to the Editor:

Professor B. H. Neumann,  
Department of Mathematics,  
Institute of Advanced Studies,  
Australian National University,  
POB 4, Canberra, ACT 2600, Australia,

or to the Associate Editor, Dr L. G. Kovács, at the same address. Authors should keep a complete copy of their manuscripts, because manuscripts are not normally returned to them.

Authors receive 50 free offprints of their papers and may order more at cost. Correspondence about proofs and offprint orders should be addressed to one of the Assistant Editors:

Associate Professor A. McMullen,  
Department of Mathematics,  
Royal Military College,  
Duntroon, ACT 2600, Australia

Dr S. Yamamuro,  
Department of Mathematics,  
Institute of Advanced Studies,  
Australian National University,  
POB 4, Canberra, ACT 2600, Australia.

### Editorial Policy

The BULLETIN of the Australian Mathematical Society aims at quick publication of original research in all branches of Mathematics. Only manuscripts that are suitable for quick publication will be accepted, and only if space permits. Manuscripts must be in their final, publishable form when submitted; refereeing will be kept to a minimum, and no revision of manuscripts will be allowed.

The BULLETIN is printed by a photo-offset process from a carefully prepared typescript. The type founts and special symbols available are, accordingly, restricted.

To facilitate the work of reviewing journals and the Mathematical Offprint Service (MOS) of the American Mathematical Society, the BULLETIN publishes an abstract at the head of each paper that is not itself an abstract, and also a tentative MOS classification in the top right-hand corner of the first page of each paper. Authors are invited to assist by supplying abstracts of their papers and supplying or checking MOS classification numbers. Copies of the MOS classification scheme are available to authors on request from MOS, American Mathematical Society, POB 6248, Providence, R.I. 02904, USA. The scheme and instructions for its use can be also found as an appendix to Mathematical Reviews, Index to Volume 39 (1970).

### Copyright

The material in this BULLETIN may be quoted in full or in part with due acknowledgement of the source.
