# International Journal of Technology Assessment in Health Care

Official Journal of Health Technology Assessment International

## Editor-in-Chief

Egon Jonsson, Ph.D.

Professor, University of Alberta, and University of Calgary  
Executive Director and CEO, Institute of Health Economics  
1200, 10405 Jasper Avenue

Edmonton, Alberta, Canada T5J 3N4

Telephone: +1-780-448-4881; Fax: +1-780-448-0018; E-mail: [ejonsson@ihe.ca](mailto:ejonsson@ihe.ca)

**Aims and Scope:** The *International Journal of Technology Assessment in Health Care* has as its specific scope of interest the generation, evaluation, diffusion, and use of health care technology. It addresses the diverse audience of health care providers within medicine, public health, nursing, and the allied health professions; decision makers in government, industry, and health care organizations; and the scholarly disciplines such as ethics, economics, law, history, sociology, psychology, and engineering. The journal aims to fill the needs of those interested in the complexities of interaction between people and technology; technology as a force in social and organizational change; and technology as it is created, produced, applied, and paid for. It examines descriptively and analytically the effects of technology as perceived from the vantage point of different academic disciplines and policy-making organizations and examines methods necessary to conduct studies and evaluations of technology.

The focus of the journal is the international health care community. The experience of different countries in their encounter with health care technology, viewed comparatively, is invaluable to understanding its effects. Further, it is important to establish ties with the scholars, governments, and private institutions concerned with health care technology so that the experiences and learning of the international community in its parts can benefit the whole. The use of technology in health care has created some of the major dilemmas in society today. The journal serves as a forum for the wide range of professionals interested in the assessment of medical technology, its consequences for patients, and its impact on society.

**Publishing, Advertising, and Subscription Offices:** Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013-2473, U.S.A. (for U.S.A., Canada, and Mexico); or Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK (for U.K. and elsewhere).

**2010 Subscription Information:** *International Journal of Technology Assessment in Health Care* (ISSN 0266-4623) is published quarterly in January, April, July, and October by Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013-2473; Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK. Annual institutional subscription rates for Volume 26 (2010): Print and online US

\$515.00, online only US \$431.00, and print only US \$467.00 in the U.S.A., Canada, and Mexico; Print and online UK £286.00, online only UK £243.00, and print only UK £260.00 elsewhere. Individual rates: Print and online US \$245.00 and print only US \$223.00 in the U.S.A., Canada, and Mexico; Print and online UK £143.00 and print only UK £123.00 elsewhere. Prices include postage; air mail or registered mail is extra. Single part: US \$120.00 in the U.S.A., Canada, and Mexico; UK £67.00 elsewhere. Back volume prices are available upon request. *International Journal of Technology Assessment in Health Care* and other Cambridge journals can be found at <http://journals.cambridge.org>

**Founding Editors:** Egon Jonsson and Stanley J. Reiser

## CONTENTS

### GENERAL ESSAYS

- 427** Cost-effectiveness of interventions based on physical exercise in the treatment of various diseases: A systematic literature review  
*Eija Roine, Risto P. Roine, Pirjo Räsänen, Ilkka Vuori, Harri Sintonen, and Tiina Saarto*
- 455** The feasibility of harmonizing health technology assessments across jurisdictions: A case study of drug eluting stents  
*Paul Trueman, Manjusha Hurry, Matthew Bending, and John Hutton*
- 463** Ethics in Canadian health technology assessment: A descriptive review  
*Deirdre DeJean, Mita Giacomini, Lisa Schwartz, and Fiona A. Miller*
- 470** Systematic review of economic evidence for the detection, diagnosis, treatment, and follow-up of colorectal cancer in the United Kingdom  
*Paul Tappenden, Jim Chilcott, Alan Brennan, and Hazel Pilgrim*
- 479** Quality of trials reported as conference abstracts in China: How well are they reported?  
*Yurong Duan, Jing Li, Changlin Ai, Yaolong Chen, Peixian Chen, Mingming Zhang, and Sally Hopewell*
- 485** The cost-effectiveness of Maze procedures using ablation techniques at the time of mitral valve surgery  
*Stéphane P. Quenneville, Xuanqian Xie, and James M. Brophy*
- 497** Economic evaluation of a minimal psychological intervention in chronically ill elderly patients with minor or mild to moderate depression: A randomized trial (the DELTA-study)  
*Catharina C. M. Jonkers, Femke Lamers, Silvia M. A. A. Evers, Hans Bosma, Job F. Metsemakers, and Jacques Th. M. Van Eijk*
- 505** Costs and effects of using specialized breast technologists in prereading mammograms in a clinical patient population  
*Frank J. H. M. van den Biggelaar, Alphons G. H. Kessels, Jos M. A. van Engelshoven, and Karin Flobbe*
- 514** Developing medical device technologies from users' perspectives: A theoretical framework for involving users in the development process  
*Syed Ghulam Sarwar Shah, Ian Robinson, and Sarmad AlShawi*
- 522** How well do search filters perform in identifying economic evaluations in MEDLINE and EMBASE  
*Julie Glanville, David Kaunelis, and Shaila Mensinkai*
- 530** Organizational and patient-related assessments in HTAs: State of the art  
*Anne Lee, Line Sinding Skött, and Helle Ploug Hansen*
- 537** Complementing the net benefit approach: A new framework for Bayesian cost-effectiveness analysis  
*Miguel Angel Negrín Hernández, Francisco José Vázquez-Polo, Francisco Javier Girón González-Torre, and Elías Moreno Bas*
- 546** Handling uncertainty in economic evaluations of patient level data: A review of the use of Bayesian methods to inform health technology assessments  
*C. Elizabeth McCarron, Eleanor M. Pullenayegum, Deborah A. Marshall, Ron Goeree, and Jean-Eric Tarride*
- 555** Using information graphics in health technology assessment: Towards a structured approach  
*Martin Pitt, Will Stahl-Timmins, Rob Anderson, and Ken Stein*

## RESEARCH REPORTS

- 564 Knowledge network for medical technology management in Mexico  
*Fabiola Martínez Licona, Joaquín Azpiroz Leehan, Miguel Cadena Méndez, Salvador Duarte Yurjar, Raúl Molina Salazar, and Amador Terán Gilmore*
- 570 A content analysis of health technology assessment programs in Latin America  
*Luis E. Arellano, Mercedes Reza, Juan Antonio Blasco, and Elena Andradás*
- 577 Magnetic resonance imaging, knee arthroscopy, and clinical decision making: A descriptive study of five surgeons  
*Sarah Derrett, Gayle D. Walley, Stephen A. Bridgman, Paula Richards, and Nicola Maffulli*
- 584 Cost-effectiveness of prophylaxis against on-demand treatment in boys with severe hemophilia A in Iran  
*Aliasghar Ahmad Kia Daliri, Hassan Haghparast, and Jahanara Mamikhani*
- 588 Self-report versus care provider registration of healthcare utilization: Impact on cost and cost-utility  
*Martine Hoogendoorn, Carel R. van Wetering, Annemie M. Schols, and Maureen P. M. H. Rutten-van Mölken*

## LETTER TO THE EDITOR

- 596 Development of health technology assessment in Central Europe  
*Krisztián Kárpáti and János Sándor*

## BOOK REVIEW

- 598 *Technological Medicine: The Changing World of Doctors and Patients*. By Stanley Joel Reiser  
*M. David Low*

599

## ERRATUM

## CORRIGENDUM

- 601 The history of the *International Journal of Technology Assessment in Health Care*  
*Egon Jonsson and Stanley J. Reiser*

602
