
Erratum

Correction to a Book Review by James T. McIlwain which appeared in *Visual Neuroscience*, Volume 5 (1990), pages 213–214.

During journal production, two errors were introduced into J.T. McIlwain's review of the book *Neural Mechanisms of Visual Perception*, edited by D.M.-K. Lam and C.D. Gilbert. The title of the book is given incorrectly in the first sentence. The last sentence of the third paragraph should read "Three papers from the laboratories of Newsome, Logothetis, and Maunsell describe experiments in which discriminative behaviors and single cell discharges are observed simultaneously in alert monkeys."
