

Ownership and Publication of *Mathematika*

Mathematika was founded in the early 1950s by Harold Davenport and is owned by University College London. Since 2010, the journal has been published on behalf of its owner by the London Mathematical Society (LMS). The LMS is the major British learned Society for mathematics and publishes eleven other journals, five of which are in collaboration with other learned societies. Cambridge University Press prints and distributes *Mathematika* under agreement with the London Mathematical Society.

Prior to 2010, the journal had not been published on-line, but from 2010 onwards all articles, including the full archive dating back to 1954, are available electronically via Cambridge Journals Online.

Aims and Scope

Mathematika publishes both pure and applied mathematical articles of the highest quality. The traditional emphasis has been towards the purer side of mathematics but applied mathematics and articles addressing both aspects are equally welcome.

Submission of Manuscripts

Authors wishing to submit a paper for publication should follow the guidelines on the webpage <http://www.lms.ac.uk/publications/mathematika.html>.

Authors will be asked to assign copyright to University College London prior to publication.

No paper should have been published or be under consideration for publication elsewhere. Nor may the paper be submitted elsewhere while it remains under consideration by *Mathematika*.

Offprints

A URL giving free access to the final published article will be provided free of charge. Offprints can be ordered on the form which will accompany the page proofs.

Printed back numbers

Printed copies of volume 55 (2009) and earlier volumes are available from the Department of Mathematics, University College London. Please contact soheni@math.ucl.ac.uk.

Copying

This journal is registered with the Copyright Clearance Centre, 222 Rosewood Drive, Danvers, MA 01923, USA. Organizations in the USA that are registered with the CCC may therefore copy material beyond the limits permitted by sections 107 and 108 of US copyright law subject to payment to CCC of the per-copy fee. This consent does not extend to multiple copying for promotional and commercial purposes. Code 0025-5793/2010.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions. For all other use, permission should be sought from Cambridge or the American branch of Cambridge University Press.

Mathematika

VOLUME 56 PART 1 JANUARY 2010

- Jordan S. Ellenberg, Richard Oberlin and Terence Tao** The Kakeya set and maximal conjectures for algebraic varieties over finite fields 1–25
- Imre Bárány and Attila Pór** Infinite paths with no small angles 26–34
- H. M. Bui** A note on the second moment of automorphic L -functions 35–44
- David Alonso-Gutiérrez** Volume estimates for L_p -zonotopes and best constants in Brascamp–Lieb inequalities 45–60
- Kenneth Falconer and Jun Miao** Random subsets of self-affine fractals 61–76
- Natalia Budarina, Detta Dickinson and Jason Levesley** Simultaneous Diophantine approximation on polynomial curves 77–85
- Andreas F. Holmsen** New results for $T(k)$ -families in the plane 86–92
- Jean-Marc Vanden-Broeck and Frank T. Smith** Supercritical two-fluid interactions with surface tension and gravity 93–106
- Heng Huat Chan and Wadim Zudilin** New representations for Apéry-like sequences 107–117
- Hyunsuk Kang and Alexander V. Sobolev** Distribution of integer lattice points in a ball centred at a Diophantine point 118–134
- F. V. Petrov, D. M. Stolyarov and P. B. Zatitskiy** On embeddings of finite metric spaces in l_∞^n 135–139
- Frank T. Smith and Andrew S. Ellis** On interaction between falling bodies and the surrounding fluid 140–168
- Leonard J. Schulman** Variation on a theorem by Carathéodory 169–172
- Imre Leader and Ta Sheng Tan** Directed simplices in higher order tournaments 173–181
- Vincent Vatter** Permutation classes of every growth rate above 2.48188 182–192
