Antibiotic prescription during the COVID-19 pandemic: a biphasic pattern – ERRATUM

In the above mentioned article by Abelenda-Alonso et al¹, the wrong figure file was used for Figure 1 in the final published version of record. The correct Figure 1 appears below. The publisher apologizes for the error.

Fig. 1. Total antimicrobial consumption and comparative consumption of a amoxicillin/clavulanate and broad-spectrum antibiotics during the first 4 months of 2019 and 2020. Broad-spectrum antibiotics included cefepime, piperacillin/tazobactam, meropenem, imipenem, and ertapenem. Note. DDD, defined daily dose.
