Two New Titles in Entomology from Cambridge University Press!

Fifth Edition

The Insects Structure and Function

R. F. Chapman

*Edited by Stephen J. Simpson and
Angela E. Douglas*

“This new edition of *The Insects: Structure and Function* fascinates the reader with details on the morphology, processes and mechanisms which allow insects to burgeon on Earth. The tradition of excellence established by Chapman has been perpetuated. Thoroughly modernized and comprehensive, the revision captures the excitement of recent major advances in understanding.”

—*Peter W. Price, Regents’ Professor Emeritus,
Department of Biological Sciences, Northern Arizona University, Flagstaff*

\$75.00: Paperback: 978-0-521-11389-2: 968 pp.

The Management of Insects in Recreation and Tourism

Edited by Raynald Harvey Lemelin

“Lemelin has successfully assembled experts in the area of insects, recreation and tourism in this highly informative book on human-insect dynamics. The wide array of carefully chosen case studies will appeal to readers wishing to understand the deep significance of our encounters with insects. The book is sure to change the mind of anyone who has not thought of incorporating insects into their leisure activities and to further inform the millions that already do participate in insect-related recreation. This is a fascinating, much needed interdisciplinary look at not only activities such as butterfly watching and dragonfly hunting, but also their connection to larger issues of biodiversity and conservation.”

—*Diane M. Rodgers, Northern Illinois University*

\$105.00: Hardback: 978-1-107-01288-2: 365 pp.

Prices subject to change.

NOTES FOR AUTHORS

Please see the complete version ("Instructions for Contributors") at journals.cambridge.org/ber

Styles of Paper

Bulletin of Entomological Research publishes two types of paper:

- Full research papers
- Reviews

If the referees and editors judge a paper to be particularly significant then it will be fast-tracked for publication.

We also welcome 'Letters to the Editor' with comments on recently published papers.

Manuscript Preparation

Language

Manuscripts should be in English.

Manuscript content

Manuscripts should be prepared in Microsoft Word or similar according to the following structure:

- The text, divided under appropriate headings. Clearly differentiate between primary (bold, large font size), secondary (bold, text font size) and tertiary (italics) headings
- Acknowledgements (if any)
- References (for further information about presenting references please see below)
- Tables, either at the end of the manuscript or as separate files. Tables should be numbered consecutively with Arabic numerals and every table should be mentioned at least once in the text.
- Illustrations should be submitted as separate files in TIF or EPS format but captions should be listed at the end of the manuscript text.

Abstract

Each paper must commence with an accurate, informative abstract. It should not exceed 250 words. A short title should also be provided for use as a running head.

References

References must be based on the name and year system, give full journal titles and conform to the following styles:

- Follett, P.A. & Roderick, G.K.** (1996) Genetic estimates of dispersal ability in the leucaena psyllid predator *Curinus coeruleus* (Coleoptera: Coccinellidae): implications for biological control. *Bulletin of Entomological Research* **86**, 355–361.
- Nevill, E.M., Kappmeier, K. & Venter, G.J.** (1993) Tsetse fly research in Zululand. p. 81 in *Proceedings of the ninth Entomological Congress organized by the Entomological Society of Southern Africa, Johannesburg, 28 June–1 July 1993* Pretoria, Entomological Society of South Africa.
- Wilson, M.D. & Post, R.J.** (1994) Integration of morphometric, cytogenetic and molecular techniques: a case study of *Simulium damnosum* pp. 215–224 in Hawksworth, D.L. (Ed.) *The identification and characterization of pest organisms*. Wallingford, CAB International.

Please list papers by more than two authors, but with the same first author, by year sequence and alphabetically within each year. Citation of authors in the text should appear in the form: Polaszek (1996) or (Polaszek, 1996). Authors should be cited in chronological order as: (Blackman *et al.*, 1994; Roberts & Kumar, 1995).

Tables

Tables should be in a simple form and should not be used if text or illustrations give the same information. They can either be submitted as separate files (Microsoft Word or Excel) or embedded within the main manuscript file. Each table must have a clear and concise caption.

Illustrations

Illustrations should be submitted in TIF or EPS format at approximate final publication size. Resolution of artwork should be at the following minimum resolutions: Line artwork (black & white), 1200dpi; Combination, i.e. line/tone (greyscale), 800dpi;

Black & White halftone (greyscale), 300dpi; and Colour halftone, 300dpi. Comprehensive guidance on creating suitable electronic figures is available at http://dx.sheridan.com/guidelines/digital_art.html where you will find extensive guidelines on preparing electronic figures. An online preflighting tool (<http://dx.sheridan.com/index.html>) is also available where you can check if your figures are suitable for reproduction. Captions should be listed at the end of the manuscript text.

Supplementary Material

Additional information which due to its nature does not lend itself to print media (examples- full data sets, movie or sounds files etc...) may be submitted for online-only publication. Please see full details ("Instructions for Contributors") at journals.cambridge.org/ber.

Technical and Nomenclature Standards

All work should use SI units as standard. Anatomical terms can be a mixture of the English vernacular and Latin, depending on current usage.

Manuscript Preparation

We kindly ask that you follow the instructions below when preparing your manuscript for submission. This will minimize the risk of errors being introduced during the publishing process.

- Use double-line spacing and ample margins (at least 2.5cm) on each side.
- Do not underline anything
- Number each line consecutively across the pages of the manuscript, rather than within pages
- Number every page (preferably the top right corner)
- Do not indent the start of each paragraph
- Use italics for taxonomic nomenclature and bold for headings
- Use standard abbreviations (e.g. Fig. and Figs) and SI units
- Use British rather than American Spellings and 'z' rather than 's' spellings in words with 'ize'.

Voucher specimens

The deposition of voucher specimens should be considered where appropriate.

Manuscript Submission

All manuscripts should be submitted via our on-line system, Editorial Manager, at <http://www.editorialmanager.com/ber>. New users will need to register first.

Peer review

Communications for peer review will be by email as far as possible. Authors are invited to suggest the names and contact details of at least two potential referees and are asked to provide keywords indicating the content of the manuscript. Please also give a brief description (no more than 50 words) of why the manuscript is an important contribution to entomology research.

Publication

Copyright

Authors will be supplied with an agreement to publish form, which must be completed and returned to the Publisher. Papers are accepted on the understanding that the work has been submitted exclusively to the *Bulletin* and has not been previously published elsewhere.

Proofs

Authors will receive a PDF file of page proofs by email, and will be asked to return corrected proofs within 72 hours.

Offprints

The author (or main author) of an accepted paper will receive a free PDF of their paper. Paper offprints are available for a fee and should be ordered at proof stage.

Research Papers

- M.C. Liendo, F. Devescovi, G.E. Bachmann, M.E. Utgés, S. Abraham, M.T.Vera, S.B. Lanzavecchia, J.P. Bouvet, P. Gómez-Cendra, J. Hendrichs, P.E.A. Teal, J.L. Cladera and D.F. Segura**
Precocious sexual signalling and mating in *Anastrepha fraterculus* (Diptera: Tephritidae) sterile males achieved through juvenile hormone treatment and protein supplements 1
- X. Martini, A.F.G. Dixon and J.-L. Hemptinne**
The effect of relatedness on the response of *Adalia bipunctata* L. to oviposition deterring cues 14
- G. Juma, M. Thiongo, L. Dutaur, K. Rharrabe, F. Marion-Poll, B. Le Ru, G. Magoma, J.-F. Silvain and P.-A. Calatayud**
Two sugar isomers influence host plant acceptance by a cereal caterpillar pest 20
- Q.-P. Ren, Z. Fan, X.-M. Zhou, G.-F. Jiang, Y.-T. Wang and Y.-X. Liu**
Identification and characterization of anonymous nuclear markers for the double-striped cockroach, *Blattella bisignata* 29
- E.G. Kakani, M. Trakala, E. Drosopoulou, P. Mavragani-Tsipidou and K.D. Mathiopoulos**
Genomic structure, organization and localization of the acetylcholinesterase locus of the olive fruit fly, *Bactrocera oleae* 36
- M. Škaljac, K. Žanić, S. Hrnčić, S. Radonjić, T. Perović and M. Ghanim**
Diversity and localization of bacterial symbionts in three whitefly species (Hemiptera: Aleyrodidae) from the east coast of the Adriatic Sea 48
- M. de Villiers, V. Hattingh and D.J. Kriticos**
Combining field phenological observations with distribution data to model the potential distribution of the fruit fly *Ceratitis rosa* Karsch (Diptera: Tephritidae) 60
- V. Caron, M. Norgate, F.J. Ede, T. Nyman and P. Sunnucks**
Novel microsatellite DNA markers indicate strict parthenogenesis and few genotypes in the invasive willow sawfly *Nematus oligospilus* 74
- K.L. Silva-Brandão, L.C. Almeida, S.S. Moraes and F.L. Cônsoli**
Using population genetic methods to identify the origin of an invasive population and to diagnose cryptic subspecies of *Telchin licus* (Lepidoptera: Castniidae) 89
- Y. Velásquez, T. Ivorra, A. Grzywacz, A. Martínez-Sánchez, C. Magaña, A. García-Rojo and S. Rojo**
Larval morphology, development and forensic importance of *Synthesiomyia nudiseta* (Diptera: Muscidae) in Europe: a rare species or just overlooked? 98
- H.D. Loxdale, S. Vorwerk and A. Forneck**
The unstable 'clone': evidence from monitoring AFLP-based mutations for short-term clonal genetic variation in two asexual lineages of the grain aphid, *Sitobion avenae* (F.) 111
- H. Čičková, M. Kozánek and P. Takáč**
Improvement of survival of the house fly (*Musca domestica* L.) larvae under mass-rearing conditions 119
