# The Journal of Laryngology and Otology

(FOUNDED in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY

G. H. BATEMAN

ASSISTANT EDITOR

LIONEL TAYLOR

---

1. Original articles which have not been published elsewhere are invited and should be sent to the Editor. They are considered for publication on the understanding that they are contributed to this *Journal* solely. Reproduction elsewhere, in whole or in part, is not permitted without the previous written consent of the Author and Editor and the customary acknowledgement must be made.

2. Manuscripts should be typewritten, on one side only of the paper, and well spaced. Captions to illustrations should be typed on a separate sheet and sent at the same time as original photographs, etc.

The Harvard system of recording references should be used, e.g. GREEN, C., and BROWN, D. (1951) *Journal of Laryngology and Otology*, 65, 33. The titles of all Journals should be given without abbreviation.

It is most important that authors should verify personally the accuracy of every reference before submitting a paper for publication.

3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked, and no extra matter added. Proofs should be returned within 5 days.

4. Illustration blocks will normally be held by the Printers for three years, after which they will be destroyed. Any author is entitled to have these returned to him, but a request for this must be sent within three years of the appearance of the article, to HEADLEY BROTHERS LTD., The Invicta Press, Ashford, Kent. Coloured illustrations will be charged to authors, unless a special grant is authorized by the Editor.

5. Orders for reprints must be sent when returning galley proofs, and for this purpose special forms are supplied.

6. Editorial communications may be addressed to THE EDITOR, *Journal of Laryngology and Otology*, c/o HEADLEY BROTHERS LTD., The Invicta Press, Ashford, Kent.

7. As from January 1970, the annual subscription is £8 (eight pounds sterling) post free; U.S.A. \$20 post free, and payable in advance.

8. Single copies of current or back numbers (when available) will be on sale at £1 (including postage) each.

9. All subscriptions, advertising and business communications should be sent to the publishers, or subscription agents.

# Thought reader!!

**With the complex tests that are being done today clinical audiometry can become altogether too complicated.**

By switching only one knob, the model 103 Clinical Audiometer will do the thinking for you, and enable you to select up to 18 different functions:

- Pure Tone Air Conduction
- Pure Tone Bone Conduction
- Narrow Band Masking
- Wide Band (White Noise) Masking
- Alternative Binaural Loudness Balance
- Simultaneous Binaural Loudness Balance
- Speech, Live Voice
- Speech, Recorded
- Speech with Masking
- SISI Test
- Lüscher DL Test
- Audiometer Weber Test
- SAL Test
- Rainville Test
- Shifting Voice
- Stenger Test
- Modified Stenger Test
- Tone Decay Test

The model 103 is functional engineering with the operator in mind. We believe the audiometer should do the thinking . . . and this one does just that.

# A Product from the Sea for E.N.T. Surgeons

## \*calgitex

Calgitex calcium alginate E.N.T. Gauze is made from highly purified specially processed calcium alginate, derived from seaweed. This product is used extensively by E.N.T. surgeons throughout the world, it has a slow absorption rate, and can be easily removed from the nose without effecting or damaging the tissue.

In the field of aural surgery Calgitex is highly suitable for packing procedures due to its solubility, soft texture, and discouragement of haemorrhage.

Packed in vials containing one metre of ribbon gauze.  
*Obtainable from your usual Surgical or Pharmaceutical Supplier*

**PETERS CLINIC AUDIOMETERS AND BÉKÉSY**  
ARE THE IDEAL TOOLS FOR MORE ADVANCED AUDIOMETRY

The Audiometers offer :

- Two continuously variable attenuators accurate to 1 db.
- SISI Test (built-in) and automatic alternate loudness balance switching.
- Maximum attenuation of 120 db for loudness discomfort level tests.
- Narrow band SYNCHRONOUS masking (a new semi-automatic masking technique).
- Full speech test facilities with white noise masking.
- Plug-in circuit boards and operator output checks.
- Conversion to a true BÉKÉSY AUDIOMETER at will.
- Extra features not listed are offered by the AP/6 compared to the AP/5 AUDIOMETER.

# What clinicians say about ORBENIN

Clinicians have frequently testified to the success of Orbenin in the treatment of Gram-positive infections. World Literature now contains over 400 references to Orbenin.

Pneumonia  Lung Abscess  Tonsillitis  Pharyngitis  Acute bronchitis

Septicaemia

Boils  Carbuncles  Infected dermatoses

Osteomyelitis  Osteitis

Post-operative wound infections  Burns  Skin graft protection

Acute endocarditis

Staphylococcal enterocolitis  Staphylococcal urinary tract infections  
Staphylococcal meningitis

## Dosage

**Adults:** 500mg (2 capsules) four times daily, by mouth. 250mg (1 vial) by intramuscular injection, four times daily.

**Children:** Under 2 years—quarter adult dose. 2-10 years—half adult dose.

In severe infections the dosage may be increased.

## Contra-indications

Orbenin should not be given to patients with a penicillin allergy or administered by subconjunctival injection.

## Side-effects

As with other penicillins.

*Additional information is available on request.*

Orbenin (Regd.) (cloxacillin sodium BP) is a product of British research at **Beecham Research Laboratories** Brentford, England, originators of the new penicillins.

Specifically designed for you and your patients. Precision-engineered, functionally-built equipment for the Ear, Nose and Throat and other Specialists.

S.M.R. keeps you and your patients' comfort and satisfaction in mind. Whatever your needs . . . whether they be for one unit or a completely equipped treatment room, you are assured of the finest . . . a room that reflects professional good taste.

Picture shows what can be done with small treatment room areas. The rooms are complete from the compact treatment unit to the physician's stool. Yet, this equipment fits easily and functionally into a small area. This is just one of many room arrangements available from S.M.R.

eliminate the cross infection risk

**Opulets**  
sterile, single dose  
eye and ear preparations

To overcome the risk of contamination in eye and ear infections, Opulets have been developed as sterile, single dose eye and ear drop tubes and ointment capsules. Each is packed in a film sachet and sterilized by gamma radiation, ensuring effective sterilization, with no loss of activity – the strict criteria of efficacy and safety being met in full.

After each application, these single dose units are discarded, eliminating cross infection risks – each treatment administered by either medical staff or the patient is thus under the most sterile conditions possible in practical medicine.

Opulets provide the lowest unit price available compared with all other preparations of a similar nature. Presentations available at present are:

**Amethocaine Eye Drops**

Amethocaine Hydrochloride  
BP 1.0% w/v

**Atropine Eye Ointment**

Atropine Sulphate BP 0.5% w/w

**Chloramphenicol Eye and Ear Drops**

Chloramphenicol BP 0.5% w/v

**Chloramphenicol Eye and Ear Ointment**

Chloramphenicol BP 1.0% w/w

**Fluorescein Eye Drops**

Fluorescein Sodium BP 1% w/v

**Hydrocortisone/Neomycin Eye and Ear Ointment**

Hydrocortisone Acetate BP 1.5% w/w

Neomycin BP 0.5% w/w

**Physostigmine Eye Drops**

Physostigmine (Eserine) Sulphate  
BPC 0.5% w/v

**Sulphacetamide Eye Drops**

Sulphacetamide Sodium BP 10% w/v

# Travelling Fellowships

offered by the

## MEDICAL RESEARCH COUNCIL

for the

## ACADEMIC YEAR 1970-71

**MEDICAL GRADUATES** aged 28-40, with several years' postgraduate experience in ophthalmology or otology are invited to apply for 2 Alexander Pigott Wernher Memorial Trust Fellowships for the academic year 1970-71.

Successful applicants will be those who are likely to profit from a period of work at an overseas research centre before taking up appointments for higher teaching or research in the United Kingdom.

### Tenure

Fellowships are normally tenable for 12 months but applications for a lesser period will be considered.

### Stipend

Fellowships held in the United States provide a basic maintenance allowance of £2,775 a year. Comparable stipends are paid in other parts of the world. In addition certain dependants' allowances are paid. Fellowships also include a travel allowance for the Fellow and his dependants.

### Location

Fellows may work at research centres anywhere in the world.

### Eligibility

Candidates must be:

Normally aged 28-40.

Medical graduates with several years' postgraduate experience.  
British Subjects who are normally resident in the United Kingdom.

BUT Fellowships are also open to British Commonwealth graduates who wish to study in the U.K.

### Application

If you are interested in these Fellowships please write to The Training Awards Section for further particulars and an application form quoting reference TF/APW. Telephone enquiries may be made to 01-636 5422, Ext. 326 or 327. Completed forms should be returned not later than 7 October 1969.
