REPORTS ON ASTRONOMY

*Transactions of the International Astronomical
Union, Volume XXIIA*

edited by

JACQUELINE BERGERON

General Secretary of the Union

IAU Transactions are published as a volume corresponding to each General Assembly. Volume A is produced prior to the Assembly and contains *Reports on Astronomy*, prepared by each Commission President. The intention is to summarize the astronomical results that have affected the work of the Commission since the production of the previous *Reports* up to a time which is about one year prior to the General Assembly. Volume B is produced after the Assembly and contains accounts of Commission Meetings which were held, together with other material. The reports included in the present volume range from outline summaries to lengthy compilations and references. Most of the reports are in English.
