

## Physics of the Pulsar Magnetosphere

VASILY BESKIN, A. V. GUREVICH  
and YA. N. ISTOMIN

The authors present the theory of the electrodynamic phenomena which occur in the magnetosphere of a pulsar. Fully illustrated throughout and well referenced this book will be of particular value to graduate students and researchers in astrophysics and plasma physics.

£75.00 net HB 0 521 41746 5 432 pp. 1993

## Theory of Space Plasma Microinstabilities

S. PETER GARY

This book describes the linear theory of many different waves and instabilities that may propagate in a collisionless plasma. Key points are summarised at the end of each chapter with problems to solve interspersed throughout the text, making it of great value to both the student and researcher.

£29.95 net HB 0 521 43167 0 200 pp. 1993  
*Cambridge Atmospheric and Space Science Series 7*

## Whistler-mode Waves in Hot Plasma

SERGEI SAZHIN

The book provides an extensive theoretical treatment of whistler-mode propagation, instabilities and damping in a hot, anisotropic and collisionless plasma.

£40.00 net HB 0 521 40165 8 269 pp. 1993  
*Cambridge Atmospheric and Space Science Series 6*

## Nonlinear Magnetohydrodynamics

DIETER BISKAMP

This book provides a self-contained introduction to magnetohydrodynamics (MHD). Emphasis is on the physical principles rather than on special formalisms, ensuring that this book will be essential reading for theorists and experimentalists in MHD effects.

£50.00 net HB 0 521 40206 9 400 pp. 1993  
*Cambridge Monographs on Plasma Physics 1*

## Plasma Physics

An Introduction to the Theory of Astrophysical, Geophysical, and Laboratory Plasmas

P. A. STURROCK

*Plasma Physics* presents an authoritative and wide ranging pedagogic study of the 'fourth' state of matter. The author provides an ideal introduction to this complex and fascinating field of research; balancing the theoretical and practical and preparing the student for further study.

£50.00 net HB 0 521 44350 5 416 pp. 1994  
£16.95 net PB 0 521 44810 7

## Relativistic Non-Linear Waves

With Applications in Astrophysics and Plasma Physics

A. M. ANILE

The author provides a unified and systematic treatment of the main results and techniques of relativistic fluid dynamics. This text will be of interest to astrophysicists, plasma physicists, nuclear physicists, and applied mathematicians.

£55.00 net HB 0 521 30406 7 348 pp.  
*Cambridge Monographs on Plasma Physics*

## Principles of Plasma Diagnostics

IAN HUTCHINSON

The most modern and comprehensive book in its field. It joins for the first time, a body of knowledge previously scattered throughout scientific literature. The work's focus on principles will make it useful to all plasma physicists, astrophysicists and theoreticians as well as experimenters.

£17.95 net HB 0 521 38583 0 380 pp.

## Plasma Physics: An Introductory Course

Edited by R. O. DENDY

For the last thirty years, international summer schools in plasma physics have been held at Culham Laboratory, site of the Joint European Torus fusion project. This book has been developed from lectures given at these schools, and provides a wide ranging introduction to the theoretical and experimental study of plasmas and their applications.

£60.00 net HB 0 521 43309 6 536 pp. 1993

*Copying*

This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of \$05.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-3778/94 \$5.00 + .00.

*ISI Tear Sheet Service*, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

*For all other use*, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

JOURNAL OF PLASMA PHYSICS (ISSN 0022-3778) is published once every two months in February, April, June, August, October and December, by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU and Journals Department, 40 West 20th Street, New York, NY 10011-4211.

Three parts form a volume. The subscription price (excluding VAT, but includes postage) of Volumes 51 and 52 (1994) is £144.50 net, per volume (US \$275.00 in the USA, Canada and Mexico) for institutions; £88.50 (US \$190.00) per volume for individuals. Single parts cost £50.00 each (US \$95.00 in the USA, Canada and Mexico) plus postage. All orders must be accompanied by payment.

Copies of the journal for subscribers in the USA, Canada and Mexico are sent by air to New York to arrive with minimum delay.

EC subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number.

Japanese prices for institutions (including ASP delivery) are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo 156, Japan.

Second class postage paid at New York, NY, and at additional mailing offices. *POSTMASTER*: send address changes in USA, Canada and Mexico to *Journal of Plasma Physics*, Cambridge University Press, 110 Midland Avenue, Port Chester, New York, NY 10573-4930.

## CONTENTS TO VOLUME 52

### PART 1 AUGUST 1994

Bifurcation of BGK waves in a plasma of cold ions and electrons. L. HANNIBAL, E. REBHAN and C. KIELHORN	1
Magnetohydrodynamic instability driven by cosmic rays. C. KO and A. JENG	23
Effect of high-frequency magnetic fluctuations on MHD waves. T. K. NAKAMURA and C. F. KENNEL	43
Nonlinear Landau damping in a relativistic plasma. J. MUKHERJEE and A. ROY CHOWDHURY	55
Nonlinear evolution of Langmuir and electromagnetic pulses in a warm, unmagnetized plasma: modulational instability, integrability and self- focusing in 2+1 dimensions. R. E. KATES and D. J. KAUP	75
Tokamak divertor maps. A. PUNJABI, A. VERMA and A. BOOZER	91
Rotating magnetohydrodynamics. X. SHAN and D. MONTGOMERY	113
Toroidal equilibrium of rotating plasma with adiabatic constraints. A. GALKOWSKI and R. ŽELAZNY	129
Steady MHD flows with an ignorable coordinate and the potential transonic flow problem. G. M. WEBB, M. BRIO and G. P. ZANK	141

### PART 2 OCTOBER 1994

Anisotropic self-focusing of a Trivelpiece–Gould mode in a plasma. A. K. SHARMA and S. KONAR	189
Electron–cyclotron absorption by inhomogeneous current-carrying plasmas. C. H. CAVALCANTI, R. S. SCHNEIDER and L. F. ZIEBELL	195
Resonant absorption of Alfvén waves near a neutral point. C. UBEROI	215
The role of density jump in the Kelvin–Helmholtz instability of a compressible plasma. A. G. GONZALEZ and J. GRATTON	223
A Fourier-space description of oscillations in an inhomogeneous plasma. Part 1. Continuous Fourier transformation. Z. SEDLÁČEK and P. S. CALLY	245
A Fourier-space description of oscillations in an inhomogeneous plasma. Part 2. Discrete approach. P. S. CALLY and Z. SEDLÁČEK	265

Characteristics and Riemann invariants for multi-ion plasmas in the presence of Alfvén waves. R. RATKIEWICZ, D. E. INNES and J. F. MCKENZIE	297
Transport coefficients for a two-temperature equal-mass plasma in a uniform magnetic field. S. Y. ABDUL-RASSAK and E. W. LAING	309
Axial structure of surface-wave-sustained discharges influenced by local plasma resonances. YU M. ALIEV, A. V. MAXIMOV, H. SCHLÜTER and A. SHIVAROVA	321
Acceleration of charged particles by large-amplitude electromagnetic waves. S. P. KUO and M. C. LEE	339
PART 3 DECEMBER 1994	
Envoi. J. P. DOUGHERTY	343
Self-similar cylindrical expansion of impurity particles in a plasma. M. Y. YU and R. BHARUTHRAM	345
Short-wavelength ion Bernstein nonlinear waves and solitons. T. A. DAVYDOVA, I. A. FISHCHUK and V. M. LASHKIN	353
Fusion conditions in a finite-thickness gas-puff staged Z-pinch. A. M. MIRZA, N. A. KHATTAK, M. IQBAL and G. MURTAZA	365
Nonlinear plasma waves with steady-state d.c. current. S. RAUF and J. A. TATARONIS	373
Self-focusing of surface waves in a cylindrical plasma waveguide. M. GEORGIEVA, A. SHIVAROVA, and I. URDEV	391
Obliquely propagating ion-acoustic solitons in a multi-component magnetized plasma with negative ions. M. K. MISHRA, R. S. CHHABRA and S. R. SHARMA	409
Electromagnetism of isotropic relativistic plasmas: Maxwell's formalism and the choice of gauge. P. DE GOTTAL and J. GARIEL	431
Propagation of electromagnetic waves in inhomogeneous plasmas. E. BUSATTI, A. CIUCCI, M. DE ROSA, V. PALLESCHI, S. RASTELLI, M. LONTANO and N. LUNIN	443
Bifurcations in an advanced two-chamber model for the edge plasma in a divertor tokamak. A. PUNJABI and M. SOE	457
Helicon waves in a cylindrical plasma column. M. M. SHOUCRI	465
Transverse electromagnetic modes in a hot cylindrical plasma column. M. M. SHOUCRI	471
AUTHOR INDEX TO VOLUME 52	483

## INSTRUCTIONS TO AUTHORS

Authors wishing to have papers published in the *JOURNAL* should communicate them to the Editors or any one of the Associate Editors, choosing one in their own country where possible. Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the *JOURNAL* free of charge, and additional offprints can be purchased if ordered in advance.
