Volume 42 Number 1

Research Papers

- 1 LAM YEH. A monotone process maintenance model for a multistate system
15 HYUN-SOO AHN AND RHONDA RIGHTER. Multi-actor Markov decision processes
27 ERIK EKSTRÖM, SVANTE JANSON AND JOHAN TYSK. Superreplication of options on several underlying assets
39 VÉRONIQUE LADRET. Asymptotic hitting time for a simple evolutionary model of protein folding
52 FÁTIMA FERREIRA AND ANTÓNIO PACHECO. Level crossing ordering of skip-free-to-the-right continuous-time Markov chains
61 OLA HAMMARLID. Tools to estimate the first passage time to a convex barrier
82 K. BOROVKOV AND A. NOVIKOV. Explicit bounds for approximation rates of boundary crossing probabilities for the Wiener process
93 ANGELOS DASSIOS AND JI-WOOK JANG. Kalman–Bucy filtering for linear systems driven by the Cox process with shot noise intensity and its application to the pricing of reinsurance contracts
108 F. THOMAS BRUSS. What is known about Robbins’ problem?
121 ROBERT W. CHEN, LARRY A. SHEPP, YI-CHING YAO AND CUN-HUI ZHANG. On optimality of bold play for primitive casinos in the presence of inflation
138 MATTHIAS WINKEL. Electronic foreign-exchange markets and passage events of independent subordinators
153 CHRISTIAN Y. ROBERT. Asymptotic probabilities of an exceedance over renewal thresholds with an application to risk theory
163 KAM C. YUEN, JUNYI GUO AND KAI W. NG. On ultimate ruin in a delayed-claims risk model
175 YONGSHENG XING AND YONGJIN WANG. On the extinction of a class of population-size-dependent bisexual branching processes
185 ERIK A. VAN DOORN AND ALEXANDER I. ZEIFMAN. Extinction probability in a birth–death process with killing
199 YUTAKA SAKUMA AND MASAKIYO MIYAZAWA. On the effect of finite buffer truncation in a two-node Jackson network
223 OFFER KELLA, BERT ZWART AND ONNO BOXMA. Some time-dependent properties of symmetric M/G/1 queues
235 DAVID GAMARNIK AND PETAR MOMČILOVIĆ. A transposition rule analysis based on a particle process
247 Obituary: Joseph Leonard Doob
257 N. H. BINGHAM. Doob: a half-century on

Short Communications

- 267 KEN DUFFY AND ANTHONY P. METCALFE. The large deviations of estimating rate functions
275 SAEED GHAHRAMANI AND RONALD W. WOLFF. On finite moments of full busy periods of GI/G/c queues
279 JEAN-LOUIS BON AND ABBAS ILLAYK. Ageing properties and series systems
287 THOMAS MOUNTFORD AND RINALDO B. SCHINAZI. A note on branching random walks on finite sets
295 NADINE GUILLOTIN-PLANTARD. Gillis’s random walks on graphs
302 Correction

Research Papers

- 303 XIANPING GUO AND ONÉSIMO HERNÁNDEZ-LERMA. Nonzero-sum games for continuous-time Markov chains with unbounded discounted payoffs
- 321 JASON SCHWEINSBERG. Improving on bold play when the gambler is restricted
- 334 PETER NEAL. Compound Poisson limits for household epidemics
- 346 A. GERARDI AND P. TARDELLI. Heterogeneous population dynamical model: a filtering problem
- 362 ULRICH RIEDER AND NICOLE BÄUERLE. Portfolio optimization with unobservable Markov-modulated drift process
- 379 STÉPHANE LOISEL. Differentiation of some functionals of risk processes, and optimal reserve allocation
- 393 RUDOLF GRÜBEL AND MARCUS REICH. Rarity and exponentiality: an extension of Keilson's theorem, with applications
- 407 JEAN-MARC AZAÏS, JOSÉ R. LEÓN AND JOAQUÍN ORTEGA. Geometrical characteristics of Gaussian sea waves
- 426 RAYMOND BRUMMELHUIS AND DOMINIQUE GUÉGAN. Multiperiod conditional distribution functions for conditionally normal GARCH(1, 1) models
- 446 CLAUDIA CECI AND ANNA GERARDI. Multitype branching processes observing particles of a given type
- 463 M. GONZÁLEZ, M. MOLINA AND I. DEL PUERTO. Asymptotic behaviour of critical controlled branching processes with random control functions
- 478 DE-AN WU AND HIDEAKI TAKAGI. Processor-sharing and random-service queues with semi-Markovian arrivals
- 491 MARC LELARGE. Fluid limit of generalized Jackson queueing networks with stationary and ergodic arrivals and service times
- 513 FRANÇOIS BACCELLI, SERGUEI FOSS AND MARC LELARGE. Tails in generalized Jackson networks with subexponential service-time distributions
- 531 SOOHAN AHN AND V. RAMASWAMI. Efficient algorithms for transient analysis of stochastic fluid flow models
- 550 O. E. BARNDORFF-NIELSEN AND N. N. LEONENKO. Burgers' turbulence problem with linear or quadratic external potential
- 566 PETER C. KIESSLER AND KANOKTIP NIMITKIATKLAI. The lifetime of a random set

Short Communications

- 581 COLIN MALLOWS AND LARRY SHEPP. B-stability
- 587 KYUNG EUN LIM, JEE SEON BAEK AND EUI YONG LEE. Optimization under the $P_{\lambda, \tau}^M$ policy of a finite dam with both continuous and jumpwise inputs

Research Papers

- 595 ESTHER FROSTIG. On the expected time to ruin and the expected dividends when dividends are paid while the surplus is above a constant barrier
- 608 QIHE TANG. The finite-time ruin probability of the compound Poisson model with constant interest force
- 620 M. MÖHLE. Convergence results for compound Poisson distributions and applications to the standard Luria–Delbrück distribution
- 632 ALEXANDER YU. MITROPHANOV, ALEXANDRE LOMSAZDE AND MARK BORODOVSKY. Sensitivity of hidden Markov models
- 643 MAJID ASADI, NADER EBRAHIMI, G. G. HAMEDANI AND EHSAN S. SOOFI. Minimum dynamic discrimination information models
- 661 LARRY GOLDSTEIN. Berry–Esseen bounds for combinatorial central limit theorems and pattern occurrences, using zero and size biasing
- 684 JAMES LEDOUX. Recursive filters for partially observable finite Markov chains
- 698 ZHENTING HOU, YUANYUAN LIU AND HANJUN ZHANG. Subgeometric rates of convergence for a class of continuous-time Markov process
- 713 BRENTON GRAY, PHIL POLLETT AND HANJUN ZHANG. On the existence of un-instantaneous Q -processes with a given finite μ -invariant measure
- 726 DAMIAN CLANCY. A stochastic SIS infection model incorporating indirect transmission
- 738 ZENGJING CHEN AND REG KULPERGER. A stochastic competing-species model and ergodicity
- 754 P. WHITTLE. Tax problems in the undiscounted case
- 766 B. H. MARGOLIUS. Transient solution to the time-dependent multiserver Poisson queue
- 778 KLAUS SCHIEFERMAYR AND JOSEF WEICHBOLD. A complete solution for the optimal stochastic scheduling of a two-stage tandem queue with two flexible servers
- 797 SHELDON M. ROSS, J. GEORGE SHANTHIKUMAR AND ZEGANG ZHU. On increasing-failure-rate random variables
- 810 JUN CAI AND HAIJUN LI. Conditional tail expectations for multivariate phase-type distributions
- 826 X. GUO AND J. LIU. Stopping at the maximum of geometric Brownian motion when signals are received
- 839 ZSOLT KATONA. Width of a scale-free tree
- 851 PER HÖRFELT. The moment problem for some Wiener functionals: corrections to previous proofs (with an appendix by H. L. Pedersen)

Short Communications

- 861 RAGNAR NORBERG AND MOGENS STEFFENSEN. What is the time value of a stream of investments?
- 867 KONSTANTINOS V. KATSIKOPOULOS AND ÖZGÜR ŞİMŞEK. Optimal doubling strategy against a suboptimal opponent
- 873 O. L. V. COSTA AND F. DUFOUR. A sufficient condition for the existence of an invariant probability measure for Markov processes
- 879 GIDEON WEISS. Jackson networks with unlimited supply of work
- 883 GER KOOLE, MISJA NUYENS AND RHONDA RIGHTER. The effect of service time variability on maximum queue lengths in $M^X/G/1$ queues
- 892 YULIN LI. Asymptotic baseline of the hazard rate function of mixtures
- 902 AIDAN SUDBURY. Rigorous lower bounds for extinction probabilities of the contact process

Volume 42 Number 4

Research Papers

- 905 ROLANDO CAVAZOS-CADENA AND RAÚL MONTES-DE-OCA. Nonstationary value iteration in controlled Markov chains with risk-sensitive average criterion
- 919 ILAN ADLER, HYUN-SOO AHN, RICHARD M. KARP AND SHELDON M. ROSS. A probabilistic model for the survivability of cells
- 932 FRANK BALL AND TOM BRITTON. An epidemic model with exposure-dependent severities
- 950 CLAUDE LEFÈVRE AND PHILIPPE PICARD. Nonstationarity and randomization in the Reed–Frost epidemic model
- 964 MAY-RU CHEN AND CHING-ZONG WEI. A new urn model
- 977 JOHN A. D. ASTON AND DONALD E. K. MARTIN. Waiting time distributions of competing patterns in higher-order Markovian sequences
- 989 FÁTIMA FERREIRA AND ANTÓNIO PACHECO. Level-crossing ordering of semi-Markov processes and Markov chains
- 1003 A. YU. MITROPHANOV. Sensitivity and convergence of uniformly ergodic Markov chains
- 1015 M. GONZÁLEZ, R. MARTÍNEZ AND M. MOTA. On the geometric growth in a class of homogeneous multitype Markov chain
- 1031 FRANK BALL AND ROBIN K. MILNE. Simple derivations of properties of counting processes associated with Markov renewal processes
- 1044 KEN DUFFY AND ANTHONY P. METCALFE. How to estimate the rate function of a cumulative process
- 1053 ANASTASIA PAPAVALIIOU. A uniformly convergent adaptive particle filter
- 1069 B. LACHAUD. Cut-off and hitting times of a sample of Ornstein–Uhlenbeck processes and its average
- 1081 PÁL RÉVÉSZ, JAY ROSEN AND ZHAN SHI. Large-time asymptotics for the density of a branching Wiener process
- 1095 PENKA MAYSTER. Alternating branching processes
- 1109 NICOLAS LANCHIER. A multitype contact process with frozen sites: a spatial model of allelopathy
- 1120 MEI ZHANG. A large deviation principle for a Brownian immigration particle system
- 1134 ANDREAS NORDVALL LAGERÅS. A renewal-process-type expression for the moments of inverse subordinators
- 1145 MOEZ DRAIEF, JEAN MAIRESSE AND NEIL O'CONNELL. Queues, stores, and tableaux
- 1168 ALEXANDER D. KOLESNIK AND ENZO ORSINGER. A planar random motion with an infinite number of directions controlled by the damped wave equation
- 1183 OLYMPIA HADJILIADIS. Optimality of the 2-CUSUM drift equalizer rules for detecting two-sided alternatives in the Brownian motion model
- 1194 YUEBAO WANG, DONGYA CHENG AND KAIYONG WANG. The closure of a local subexponential distribution class under convolution roots, with applications to the compound Poisson process

Short Communications

- 1204 CHIN-YUAN HU AND GWO DONG LIN. Sharp reliability bounds for the \mathcal{L} -like distributions, a class in which ageing is based on Laplace transform inequalities
- 1209 Index

Subscription rates

Subscription rates for volume **42** (2005) of *Journal of Applied Probability (JAP)* are as follows (post free and including online access at <http://projecteuclid.org/jap/>): US\$270.00; A\$390.00; £150.00 for libraries and institutions; or US\$90.00; A\$130.00; £50.00 for individuals belonging to a recognised scientific society. The subscription rates for volume **37** (2005) of *Advances in Applied Probability*, the companion publication, are the same; if both journals are ordered directly from the Applied Probability office at the same time, the combined price is discounted by 10%. Please send all enquiries to: Applied Probability Subscriptions, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK (telephone +44 114 222 3922; fax +44 114 272 9782; email s.c.boyles@sheffield.ac.uk). Cheques, money orders, etc. should be made payable to 'Applied Probability'. Payment is acceptable in US, Australian or UK currency, or by Visa or Mastercard. We can provide back issue prices on application.

Notes for contributors

Papers published in *Journal of Applied Probability (JAP)* may be either: (i) *research papers* not exceeding 20 printed pages; or (ii) *short communications* of a few printed pages in the nature of notes or brief accounts of work in progress. *Letters* relating specifically to papers that have appeared in *JAP* will also be published there. *Review papers, longer research papers, letters to the Editor* and papers in *stochastic geometry and statistical applications* are published in *Advances in Applied Probability*, the companion publication.

It is the policy not to accept for publication papers that cannot appear in print within 15 months of the date of receipt of the final version. In order to meet this deadline, an accepted paper may be published in either journal, according to the space available.

Fifty offprints of each paper will be provided free, with additional offprints available at cost.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Papers should be written in English or French; papers in other languages may be accepted, but will appear (subject to the author's agreement) in English or French translation.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2000 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the LATEX class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted as hard copy or as electronic files (with hard copy back-up). All submissions will be acknowledged on receipt and **must be accompanied by a covering letter stating the author's postal address and affiliation**. Hard copy: Send all submissions to the Applied Probability office in Sheffield, and not to individual editors. Two copies of the paper, at least one of which should be double spaced, should be sent to: **Executive Editor, Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK**. Electronic submission: Please email a **double-spaced PostScript™ (.ps)** or portable document format (.pdf) file, not exceeding 1 Mb. **The files must be clearly identified by name in a separate covering message**. The address for email submissions is l.nash@sheffield.ac.uk. Authors should also submit one hard copy to the Executive Editor, as above.

Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$0.70 per copy plus 0.20 per page is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA (<http://www.copyright.com>). 0021-9002/05 \$0.70 + 0.20.

Printed in Israel by N. Ben-Zvi Printing Enterprises Ltd., Jerusalem.
