

**"Tunick has done a rigorous, careful job constructing an argument that is a model of lucidity. He has written a timely and learned book. I found *Practices and Principles* to be engaging and provocative throughout."**

—Frederick Schauer

## **PRACTICES AND PRINCIPLES**

Approaches to Ethical and Legal Judgment

**Mark Tunick**

Are there universally valid moral principles that dictate what is right? Or are moral judgments culturally relative, ultimately dictated by conventions and practices that vary among societies? In *Practices and Principles*, Mark Tunick takes up the debate between universalists and relativists, and, in political philosophy, between communitarians and liberals, each of which has roots in an earlier debate between Kant and Hegel.

# THE BEST IN LAW

## **Economic Dimensions in International Law**

Comparative and Empirical Perspectives  
**Jagdeep S. Bhandari and Alan O. Sykes, Editors**

The essays in this collection use interdisciplinary perspectives to investigate issues in international and comparative law, primarily employing theoretical or empirical economics. They demonstrate that the economic analysis of law has much to contribute to the study of international matters, despite the fact that mainstream international legal scholars and economists have had relatively little interaction.

## **Philosophy and the Criminal Law**

Principle and Critique  
**R.A. Duff, Editor**

Five preeminent legal theorists tackle a range of fundamental questions on the nature of the philosophy of criminal law. Their essays explore the extent to which and the ways in which our systems of criminal law can be seen as rational and principled. The essays discuss some of the principles by which, it is often thought, a system of law should be structured, and they ask whether our own systems are genuinely principled or riven by basic contradictions, reflecting deeper political and social conflicts.

## **An Essay on the Modern State**

**Christopher W. Morris**

This book inquires into the justification of the modern state as a particular form of political society. It asks whether all states are "nation-states," what are the alternative ways of organizing society, and which conditions make a state legitimate. The author concludes that, while states can be legitimate, they typically fail to have the powers (e.g. sovereignty) that they claim. Morris' book will command the attention of political philosophers, political scientists, legal theorists, and specialists in international relations.

## **International Law**

Fourth Edition

**Malcolm Shaw**

The fourth edition of Malcolm Shaw's bestselling textbook in international law represents a major revision of its predecessor. Alongside substantial new chapters dealing with human rights and the United Nations, Shaw has incorporated new material on international environmental law, state succession, recognition, the settlement of disputes by peaceful means and international institutions.

## **Justification Defenses and Just Convictions**

**Robert F. Schopp**

This major study advances an interpretation of criminal justification defenses that views them as an integral component of the structure of the criminal law. The book extends the traditional scope of the legal and philosophical discussion of justification defenses. It integrates philosophical analysis with a consideration of contemporary applications, it shows how these defenses are key components of criminal law, and it explores the relationship between legal and moral justification.
