

# Proceedings of the Nutrition Society

## Directions to Contributors – Concise Version

The *Proceedings of the Nutrition Society* publishes papers presented by invitation and original communications given at the symposia and meetings of the Society. The geographical scope of the journal is international. As a contributor you should note and follow the guidelines set out below. For further information on how the technical content of your paper should be presented please see the **Directions to Contributors** as reproduced in the first issue of a recent volume of the *Proceedings* (February), or contact the Editorial Office on +44 (0) 171 371 6225 (telephone) or +44 (0) 171 602 1756 (fax) or [i.sambook@nutsoc.org.uk](mailto:i.sambook@nutsoc.org.uk) (email).

**Papers should be accompanied by a signed statement to the effect that the author accepts the conditions laid down in the full Directions to Contributors.**

Contributors of Symposium papers will be asked to assign their copyright, on certain conditions, to The Nutrition Society to help protect their material.

**Page format.** The *Proceedings* is printed in double-column format (column width of 85 mm) with a text area of 235 × 177 mm.

**Text.** Papers should be typed, on one side of the paper only, with double line spacing and ample margins (at least 1.5 cm) on each side and with no underlining or bold in text except for scientific names. Draft-quality print from a word-processor is not acceptable. Standard abbreviations (e.g. Fig. and Figs.) and SI units must be used. **When a paper has been accepted, word-processed text stored on floppy disk is encouraged, providing the software is IBM/DOS compatible, but floppy disks must be accompanied by a hard copy. This will enable papers to be handled rapidly, and with fewer typesetting errors.**

**Abstract.** Each paper must commence with a carefully prepared, accurate, informative abstract, in one paragraph, that is complete in itself and intelligible without reference to text or figures. It should not exceed 250 words.

**Key Words.** Authors should supply two or three key words or phrases (each containing up to three words) for the subject index of the volume.

**Tables.** Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the article and must carry headings describing their content that are comprehensible without reference to the text.

**Illustrations.** The original illustrations should accompany the manuscript for submission. Text figures, line drawings, computer-generated figures and graphs should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they are a real contribution to the text. Figure captions should be typed on a separate sheet and numbered corresponding to the relevant figures.

**References.** References must be based on the name and year (Harvard) system; **give full journal titles** and conform to the following styles:

Hollman PCH, Devries JHM, Vanleeuwen SD, Mengelers MJB & Katan MB (1995) Absorption of dietary quercetin glycosides and quercetin in healthy ileostomy volunteers. *American Journal of Clinical Nutrition* **62**, 1276–1282.

Elia M (1992) Organ and tissue contribution to metabolic rate. In *Energy Metabolism: Tissue Determinants and Cellular Corollaries*, pp. 61–77 [J Kinney and H Tucker, editors]. New York: Raven Press.

Wilmore JH & Costill DL (1994) *Physiology of Sport and Exercise*. Champaign, IL: Human Kinetics.

Citation of authors in the text should appear in the form: Polaszek (1990) or (Polaszek, 1990). More than one author should be cited in chronological order as: (Holloway *et al.* 1987; Walker & Huddleston, 1988).

**Proofs.** Two sets of page proofs will be provided to authors for checking; one set should be returned as promptly as possible to Dr I.E. Sambrook, Executive Editor, The Proceedings of the Nutrition Society, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

**Manuscripts.** Three complete copies of the manuscript together with the original artwork should be submitted to:

**Dr Kate Younger**  
**Proceedings Editor**  
**Proceedings of the Nutrition Society**  
**Dublin Institute of Technology**  
**Kevin Street**  
**Dublin 8**  
**Republic of Ireland**

The *Proceedings of the Nutrition Society*, published by CABI Publishing  
on behalf of The Nutrition Society 1998©

**Contents**

**University of Newcastle upon Tyne, 9–11 July 1997**

**Nutrition Society Medal Lecture**

**Chair: M. Gibney, Trinity College, Dublin**

- Appetite, feeding behaviour and energy balance in human subjects.  
*R. James Stubbs* 341–356

**Symposium on ‘Measuring nutrient intake’**

**Chair: J. C. Mathers, University of Newcastle upon Tyne**

- Methodological issues relating to the measurement of food, energy and nutrient intake in human laboratory-based studies.  
*R. J. Stubbs, A. M. Johnstone, L. M. O’Reilly & S. D. Poppitt* 357–372

**Norbreck Castle Hotel and Conference Centre, Blackpool, 2–4 December 1997**

**Sir David Cuthbertson Prize Medal Lecture**

**Chair: M. Elia, Cambridge**

- Metabolic abnormalities and wasting in human immunodeficiency virus infection.  
*Derek C. Macallan* 373–380

**Symposium on ‘Nutrition and gut barrier function’**

**Chair: M. Elia, Cambridge**

- Nutritional implications of gut overgrowth and selective decontamination of the digestive tract.  
*S. C. Donnell, N. Taylor, H. K. F. van Saene, A. Pierro & D. A. Lloyd* 381–387
- Bacterial translocation during enteral and parenteral nutrition.  
*J. Wesley Alexander* 389–393
- Nutritional modulation of gut inflammation.  
*Brian J. Rowlands & Keith R. Gardiner* 395–401
- Growth factors and gut function.  
*N. J. Seare & R. J. Playford* 403–408

**Royal College of Physicians, London, 18 February 1998**

**Symposium on ‘Leptin: energy regulation and beyond’**

**Chair: J. F. Andrews, Trinity College, Dublin**

- Leptin: energy regulation and beyond to a hormone with pan-physiological function.  
*J. F. Andrews* 409–411
- Regulation of leptin production: a dominant role for the sympathetic nervous system?  
*Paul Trayhurn, Jacqueline S. Duncan, Nigel Hoggard & D. Vernon Rayner* 413–419
