

FORTHCOMING PAPERS
ADVANCES IN APPLIED PROBABILITY

FELIX BALLANI. The surface pair correlation function for stationary Boolean models

JULIEN BARRAL AND STÉPHANE SEURET. Renewal of singularity sets of random self-similar measures

VOLKER BAUMSTARK AND GÜNTER LAST. Some distributional results for Poisson–Voronoi tessellations

K. A. BOROVKOV AND D. A. ODELL. On spatial thinning-replacement processes based on Voronoi cells

DENIS DENISOV AND VSEVOLOD SHNEER. Local asymptotics of the cycle maximum of a heavy-tailed random walk

C. DOMBRY. A weighted random walk model. Application to a genetic algorithm

QI-MING HE AND HANQIN ZHANG. On matrix exponential distributions

CHANTAL LABBÉ AND ANDREW J. HEUNIS. Convex duality in constrained mean-variance portfolio optimization

MARIANNE MÅNSSON. A connection between the volume fractions of the Stienen model and the dead leaves model

LEANDRO P. R. PIMENTEL. Multitype shape theorems for first passage percolation models

L. RIGAL AND L. TRUFFET. A new genetic algorithm specifically based on mutation and selection

CHRISTIAN Y. ROBERT. Stochastic stability of some state-dependent growth-collapse processes

ETIENNE ROQUAIN AND SOPHIE SCHBATH. Improved compound Poisson approximation for the number of occurrences of any rare word family in a stationary Markov chain

MICHAEL SCHRÖDER. Continuous-time methods in the study of discretely sampled functionals of Lévy processes. I. The positive process case

FRANCISCO VERA AND JAMES LYNCH. General convex stochastic orderings and related martingale-type structures

ANDREW R. WADE. Explicit laws of large numbers for random nearest-neighbour type graphs

**CONTRIBUTIONS TO PROBABILITY AND STATISTICS:
APPLICATIONS AND CHALLENGES**

Proceedings of the International Statistics Workshop
University of Canberra 4 – 5 April 2005

Contributed by world renowned researchers, the book features a wide range of important topics in modern statistical theory and methodology, economics and finance, ecology, education, health and sports studies, and computer and IT-data mining. It is accessible to students and of interest to experts.

A few of the notable contributors are Ejaz Ahmed (Windsor), Joe Gani (ANU), Roger Gay (Monash), Atsuhiko Hayashi (NCUEE, Tokyo), Markus Hegland (ANU), Chris Heyde (ANU/Columbia), Jeff Hunter (Massey), Phil Lewis (Canberra), Heinz Neudecker (Amsterdam), Graham Pollard (Canberra), Simo Puntanen (Tampere), George Styan (McGill), and Goetz Trenkler (Dortmund).

Applied Probability journals online at

<http://projecteuclid.org/jap>

<http://projecteuclid.org/aap>

Journal of Applied Probability and *Advances in Applied Probability* are now available online, in partnership with Project Euclid, at no extra cost to subscribers.

The online editions include

- an electronic version of each new issue (in PDF format) some weeks before the printed version becomes available
- an archive of all issues since 1998
- full bibliographic details of each article, along with its abstract and an actively linked list of references
- a search facility, allowing users to search by author name, article title, subject or keyword, or through the full text of the abstract or the article itself

Access

The abstract and reference list of each article are available free to all users; full access to the archive, including the full text of articles, is currently available at no extra charge to subscribers to the print editions.

Individual subscribers should register with Project Euclid by creating a user profile, entering their JAP and/or AAP subscription number where a 'subscriber code' is requested.

Institutional subscribers should complete and return a licence agreement (available at <http://www.appliedprobability.org/euclidaccess.html>) to the Applied Probability office along with details of their IP range.

Non-subscribers can gain access to individual articles on a pay-per-view basis.

For further information, please contact Sue Boyles: telephone +44 114 222 3922, fax +44 114 272 9782, email s.c.boyles@sheffield.ac.uk, write to

Applied Probability
School of Mathematics and Statistics
University of Sheffield
Sheffield S3 7RH, UK

or visit our website:

Subscription rates

Subscription rates for volume 44 (2007) of *Journal of Applied Probability (JAP)* are as follows (post free and including online access at <http://projecteuclid.org/jap/>): US\$330.00; A\$435.00; £180.00 for libraries and institutions; or US\$110.00; A\$145.00; £60.00 for individuals belonging to a recognised scientific society. The subscription rates for volume 39 (2007) of *Advances in Applied Probability*, the companion publication, are the same; if both journals are ordered directly from the Applied Probability office at the same time, the combined price is discounted by 10%. Please send all enquiries to: Applied Probability Subscriptions, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK (telephone +44 114 222 3922; fax +44 114 272 9782; email s.c.boyles@sheffield.ac.uk). Cheques, money orders, etc. should be made payable to 'Applied Probability'. Payment is acceptable in US, Australian or UK currency, or by Visa or Mastercard. We can provide back issue prices on application.

Notes for contributors

Papers published in *Journal of Applied Probability (JAP)* may be either: (i) *research papers* not exceeding 20 printed pages; or (ii) *short communications* of a few printed pages in the nature of notes or brief accounts of work in progress. *Letters* relating specifically to papers that have appeared in *JAP* will also be published there. *Review papers*, *longer research papers*, *letters to the Editor* and papers in *stochastic geometry and statistical applications* are published in *Advances in Applied Probability*, the companion publication.

It is the policy not to accept for publication papers that cannot appear in print within 15 months of the date of receipt of the final version. In order to meet this deadline, an accepted paper may be published in either journal, according to the space available.

Fifty offprints of each paper will be provided free, with additional offprints available at cost.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Papers should be written in English or French; papers in other languages may be accepted, but will appear (subject to the author's agreement) in English or French translation.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2000 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the L^AT_EX class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted as hard copy or as electronic files (with hard copy back-up). All submissions will be acknowledged on receipt and **must be accompanied by a covering letter stating the author's postal address and affiliation**. Hard copy: Send **all** submissions to the Applied Probability office in Sheffield, and not to individual editors. Two copies of the paper, at least one of which should be double spaced, should be sent to: **Executive Editor, Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK**. Electronic submission: Please email a **double-spaced** PostScript™ (.ps) or portable document format (.pdf) file, not exceeding 1 Mb. **The files must be clearly identified by name in a separate covering message**. The address for email submissions is l.nash@sheffield.ac.uk. Authors should also submit one hard copy to the Executive Editor, as above.

Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021–9002/07

Volume 44 Number 1

Research Papers

- 1 STEVE ALPERN. Rendezvous search with revealed information: applications to the line
16 STEFAN WEBER. Distribution-invariant risk measures, entropy, and large deviations
41 PETER NEAL. Coupling of two SIR epidemic models with variable susceptibilities and infectivities
58 RUSTAM IBRAGIMOV. Thou shalt not diversify: why 'two of every sort'?
71 KIYOSHI INOUE AND SIGEO AKI. On generating functions of waiting times and numbers of occurrences of compound patterns in a sequence of multistate trials
82 JORGE NAVARRO AND SERKAN ERYILMAZ. Mean residual lifetimes of consecutive- k -out-of- n systems
99 F. BALLANI, D. STOYAN AND S. WOLF. On two damage accumulation models and their size effects
115 PAUL DUPUIS, CARL NUZMAN AND PHIL WHITING. Large deviations principle for occupancy problems with colored balls
142 FRANCO PELLERÉY. Comparison results for branching processes in random environments
151 JI HWAN CHA AND JIE MI. Study of a stochastic failure model in a random environment
164 RAPHAËL ROSSIGNOL. Arbitrary threshold widths for monotone, symmetric properties
181 STÉPHANE VILLENEUVE. On threshold strategies and the smooth-fit principle for optimal stopping problems
199 ILIE GRIGORESCU, ROBERT CHEN AND LARRY SHEPP. Optimal strategy for the Vardi casino with interest payments
212 YI-CHING YAO. On optimality of bold play for discounted Dubins–Savage gambling problems with limited playing times
226 BO WU AND YU-HUI ZHANG. A class of multidimensional Q -processes
238 STAN ZACHARY. A note on insensitivity in stochastic networks
249 VYACHESLAV M. ABRAMOV. Optimal control of a large dam
259 AGUSTÍN BOMPADRE, MOSHE DROR AND JAMES B. ORLIN. Probabilistic analysis of unit-demand vehicle routing problems

Short Communications

- 279 ANYUE CHEN, PHIL POLLETT, JUNPING LI AND HANJUN ZHANG. A remark on the uniqueness of weighted Markov branching processes
