
Guide to Patterns and Usage in English

Second Edition

A. S. Hornby

Written especially for students of English as a foreign language this book gives a concise description and practical demonstration of the grammar and idiom of present-day English. It is closely connected with the grammatical aspects of the *Oxford Advanced Learner's Dictionary of Current English* and is an ideal companion for students using that dictionary.

The *Guide* provides a systematic explanation of the structures of English sentences. It has five parts; verb patterns; time and tense; nouns, determiners and adjectives; adverbs; and idiomatic English in situations, for example, obligation, possibility and request.

This new edition contains revisions reflecting recent developments in modern linguistics. In particular there is a detailed discussion of the new system of verb patterns as summarized in the new edition of the *OALDCE*.

Oxford Books for Students

Quer Durch Deutschland

F. T. C. Carter

Recorded interviews taken in many different parts of Germany form the basis of this new course, whose primary aim is to train advanced students in the comprehension and imitation of 'real' spoken German. The recordings present a variety of voices and accents, illustrating the vocabulary of a wide range of professional and social activities. Although its main aim is linguistic, the course also provides the student with considerable additional knowledge of German society and history. Paper covers £2.50, three twin track tapes £6 each + VAT

Passport to Odessa

L. M. O'Toole

This second-year Russian course, the continuation of *Passport to Moscow*, is the product of five years' preparation and revision. In its original form the course consisted of twenty B.B.C. radio lessons accompanied by printed texts which could be used for further study with the aid of other support materials produced by the University of Essex. Although *Passport to Odessa* retains the same basic approach, it has been extensively revised to take account of comments from teachers using the original course. The content has been modified and extended, and the diverse student materials have been integrated into a new, unified format.

The English Tone of Voice Essays in Intonation, Prosody and Paralanguage DAVID CRYSTAL

The essays collected in this volume represent a major and authoritative contribution to the investigation of non-segmental or suprasegmental phonology—the study of intonation and associated features of spoken language. Each chapter focuses on a particular range of vocal effect, and discusses the problems of linguistic analysis central to that range.

The Linguist and The English Language RANDOLPH QUIRK

In this collection of essays, Professor Quirk has turned his attention to the scope of linguistic investigations of English, both spoken and written. Two important essays, 'The Language of "Language and Literature"' and 'The Study of the Mother Tongue', explore the potential, both practical and scholarly, of linguistic studies of the mother tongue.

'Most of the chapters are a delight of information and anecdote; all are pleasant to read. They add up to an account of the field as seen through the eyes of one of the major and most rewarding activists and contributors to it.'

What Is Linguistics? *Third Edition* DAVID CRYSTAL

In this new edition of his popular introduction to linguistics, Dr. Crystal has provided for the rapid growth of interest in the subject by up-dating details of courses in British universities and adding to his list for suggested reading.

'Linguistics is a vogue word and many people will welcome a lucid account of it. This book will give them what they want in a short time.'

Lexical Reconstruction

The case of the Proto-Athapaskan Kinship System

ISIDORE DYEN and DAVID F. ABERLE

In this book, lexical reconstruction is used to provide links between cultural and social anthropology and linguistics. The authors use the kinship terminology of existing Athapaskan languages and dialects to provide a lexical reconstruction of the kinship terminology of the mother-language, Proto-Athapaskan, which existed about 1500 or more years ago.

Dynamics of the Creole System

DEREK BICKERTON

The author here describes and systematically accounts for language variations in a creole-speaking community, and assesses the implications the study has on generally accepted notions of the nature of language. Based on an extensive study of Guyana, South America, the volume analyses the bewildering diversity found in the syntax and underlying semantics of tense and aspect and shows that in fact they represent different developmental stages of the language existing side by side in the contemporary community.

CAMBRIDGE STUDIES IN LINGUISTICS 14

Old English Phonology

ROGER LASS and JOHN M. ANDERSON

A detailed study of Old English, taking as its point of departure the 'standard theory' of generative phonology as developed by Chomsky and Halle. This is the most extensive and sophisticated treatment of this subject. An important modern theory is examined against a well-studied body of linguistic knowledge, and is partly validated and partly revised.

CAMBRIDGE STUDIES IN LINGUISTICS 15

Presupposition and the Delimitation of Semantics

RUTH M. KEMPSON

Presupposition is currently a topic of lively interest among linguists and philosophers of language and logic. It raises problems which have important implications throughout the whole field of semantics, and indeed implications for the definition of that field. The book is intended for both philosophers and linguists, and also for those sociolinguists and psychologists with a more general interest in the theory of communication.

Syntax and Semantics/ speech and reading

An Introduction to the Principles of Transformational Syntax
by Adrian Akmajian and Frank Heny

Noam Chomsky has stated that "Akmajian and Heny have undertaken a difficult and challenging task and have, I believe, succeeded admirably in carrying it out. Their *Introduction to the Principles of Transformational Syntax* proceeds systematically from simple examples to problems of considerable complexity that are often near or at the borders of research in the field. Each stage of the presentation is careful and lucid. The basis is developed at each stage for posing the natural problems that arise at the next level of complexity. The authors show how to formulate plausible, if sometimes controversial, solutions to these problems. A student who works through this material with care will have an excellent grasp of

work in transformational syntax and the problems that motivate it. I think it is an excellent text."

The Role of Speech in Language
edited by James F. Kavanagh and James E. Cutting

Is our understanding of language increased when we take into account that it is spoken? This question served as the point of departure for the twenty-eight papers and commentaries contained in *The Role of Speech in Language*.

In three parts—"The Development of Speech in Man and Child," "Language without Speech," and "Phonology and Language"—the book takes up the problems of how and within what limits the acoustic signal, the articulation that produces it, and the phonetic message it conveys are related to the rest of the language system.

The Psychology of Reading
by Eleanor J. Gibson and Harry Levin

In this book, two psychologists apply principles of cognitive psychology to understanding reading. Unlike most other books on the subject, this one presents a consistent theoretical point of view and applies it to the acquisition of reading and what the skilled reader does.

A Word Geography of England

by HAROLD ORTON and NATHALIA WRIGHT

This book contains 251 word maps showing clearly how elderly, dialect-speaking English men and women use different dialect words for common notions. This is done by means of boundary lines or isoglosses, drawn onto a base map, enclosing areas throughout which a particular expression was recorded.

Readers will find that the introduction which describes the procedures used to produce the maps, as well as explaining their significance, is not only useful in conjunction with the maps, but is fascinating in its own right.

WORD ORDER AND WORD ORDER CHANGE

Over the past decade, one of the most significant advances in the understanding of language has had to do with word order, yet not one book on the subject has appeared. *Word Order and Word Order Change*, the first collective effort by scholars who are at the very forefront of research in this field, is an attempt to define and answer the questions posed by this rapidly growing linguistic topic.

A DICTIONARY OF SLAVIC WORD FAMILIES

200 Groups of Related Words in Russian, Polish, Czech and Serbo-Croatian

Unlike English, which has drawn upon foreign sources for most of its literary and specialized vocabulary, the Slavic languages have evolved from their native word-roots a vocabulary capable of expressing abstractions and technical concepts in every field of endeavour. In *A Dictionary of Slavic Word Families*, the author has sought to afford a broad view of the vocabulary structure of four major Slavic languages, Russian, Polish, Czech, and Serbo-Croatian, by assembling all the significant words derived from 200 of the more productive roots occurring in those languages—some 13,500 derivatives in all.

Language Structure and Translation

Essays by Eugene A. Nida

Selected and Introduced by Anwar S. Dil. Twelve essays by an eminent linguist and Bible scholar deal with aspects of the function of language structure, and especially semantic structure, in translational equivalence across languages and cultures. Topics include principles of translation, the problem of language and communication in multi-lingual societies, and the relevance of contemporary linguistics to Biblical scholarship. *Language Science and National Development Series.* \$10.00

BIBLIOGRAPHY OF MODERN ICELANDIC LITERATURE IN TRANSLATION

**Including Works Written by Icelanders in
Other Languages**

Compiled by P. M. MITCHELL and KENNETH H. OBER

This reference work lists translations of novels, plays, short stories, and poems by Icelanders that have appeared in book form or in periodicals from the Reformation through 1970. Intended to be exhaustive, the bibliography records translations into some 36 languages, and includes minor authors as well as established writers. Anthologies are listed first, alphabetically by language, followed by an alphabetical list of authors. The entries provide all essential bibliographical information: title of original work, language and title of translation, name of translator, where the translation appeared, place of publication, publisher, date, and number of pages.

THE LINGUISTICS ASSOCIATION

The Linguistics Association of Great Britain was founded in 1959 to promote the study of linguistics and to provide for its members both a forum for discussion and facilities for co-operation in furtherance of their interest in linguistics. The Association meets twice yearly at different places; original papers are presented and special topics are discussed at symposia and colloquia.

Persons interested in linguistics are eligible for election as members, subject to the approval of the Committee. Subscribing members receive the *Journal of Linguistics* without further payment. Application forms for membership may be obtained from the Membership Secretary, Dr J. R. Hurford, Department of English, University of Lancaster, Lancaster LA1 4YT. Completed application forms should be returned to the Honorary Secretary, Mr C. S. Butler, Department of English Studies, University of Nottingham, University Park, Nottingham NG7 2RD.

AUTUMN MEETING 1975

An Autumn Meeting of the Association is to be held at the King's Manor, University of York on 31 October–2 November 1975. This meeting is to be organized round a theme, *The nature of the data of linguistics*. Dr Gillian Sankoff of the University of Montreal has kindly agreed to give the opening lecture. The Local Organizer is Dr John Green, Department of Language, University of York, York YO1 5DD.

SPRING MEETING 1976

The 1976 Spring Meeting will be held at the University of Edinburgh from 3–5

April. The Local Organizer is Dr J. J. Christie, Department of Linguistics, 15 Buccleuch Place, Edinburgh EH8 9LN.
