A Coat that Defies the Wildest Weather

For the extreme conditions that the aviator is called upon to face—sudden changes of temperature—heavy rains—blizzards—THE BURFRON offers such ample security that it leaves every other flying coat “in the cart.”

The fatal defect of all previous coats has been the openings in front, through which it was an easy matter for wet or cold to penetrate. The

BURFRON

winds round the figure without openings anywhere to admit rain or wind, and is held together securely by one button at the neck.

A belt has two advantages ; (1) It snugs down the coat in cold weather ; and (2) gives it a smart Service appearance.

THE BURFRON is made in the Burberry material chosen by Sir Ernest Shackleton for all his Polar Expeditions, and to make security doubly sure, and to maintain the warmth essential to comfort during long flights, it is lined with proofed wool, or thick Camel Fleece.

Complete R.N.A.S. and R.F.C. Kits
in 2 to 4 Days or Ready for Use.
