

Subscription Requests

Free Subscriptions

Individuals requesting subscriptions, or wishing to change their address, should contact MTsubscriptions at:

AssociationManagement@microscopy.org

Subscription Policies

- Microscopists in the United States are eligible for gratis mail subscriptions.
- Microscopists in Canada and Mexico may subscribe to the print edition for \$25US.
- Microscopists in the rest of the world may subscribe to the print edition for \$35US.
- Microscopists in outside the United States may request gratis email alerts to the digital edition.
- Microscopists anywhere in the world may view the digital edition at the *Microscopy Today* website shown at the bottom of this page.

Digital Edition

- The digital edition is an exact replica of the print edition, advertisements and all.
- Features include dynamic pages with live webpage and email links, a word-level search function, and variable page magnification to enlarge both text and figures.

Microscopy Today has articles about:

- Innovative instruments and methods
- Applications in various fields
- Hints and tips for novices and experts
- Protocols in microscopy and microanalysis
- Microscopy facilities descriptions
- Meetings and courses
- Success stories in microscopy education
- Historical microscopy and pioneers
- Industry news and product news
- Humorous situations
- Opinions of our readers

Subscription Customer Service

To change your address or your subscription profile, call 703-234-4115 or send an email request to associationmanagement@microscopy.org.

Groundbreaking MOF Results

Gatan K2 camera reveals the surface and interfacial structure of MOF ZIF-8

The Gatan K2[®] and K2 IS direct detection cameras capture high-resolution MOF images at an unprecedented low dose to enable scientists to understand and design more efficient materials for energy and environmental applications.

For more information, see the landmark study *Unravelling surface and interfacial structure of a metal-organic framework by transmission electron microscopy* available through Nature Materials ([dx.doi.org/10.1038/nmat4852](https://doi.org/10.1038/nmat4852)), or visit: www.gatan.com/MOF.

MOF ZIF-8 structures recorded by the K2 camera; exposure = 3 s; total dose = 4.1 e⁻/Å²; TEM magnification 43 kx; 300 kV (uncorrected)

WE'VE JUST CHANGED THE RULES OF THE GAME.
