## Astronomy in Focus XXIXA

3–14 August

Honolulu, United States

## Astronomy in Focus

As presented at the

IAU XXIX General

Assembly, 2015

At the IAU XXIX General Assembly held in Honolulu from 3–14 August 2015, the specialised meetings known as Special Sessions and Joint Discussions were supplanted by new “Focus Meetings”. *Astronomy in Focus* presents the most relevant contributions from the Focus Meetings together with summaries of all the accepted papers and posters. Volume 1 covers the meetings on the following areas: dynamical problems in extrasolar planet science; astronomical heritage; scholarly publishing in astronomy; statistics and exoplanets; the exploration of small worlds; ground and space astrophysics and heliophysics; laboratory astrophysics; brightness variations of the Sun and Sun-like stars; astronomy for development; and mitigating the threats of light pollution and radio frequency interference. The publications *Astronomy in Focus*, together with its Volume 2, the proceedings of the 6 main Scientific Symposia and *Reports on Astronomy: Commission Legacy Reports*, fully cover the IAU XXIX General Assembly.

Proceedings of the International Astronomical Union

*Editor in Chief: Dr. Thierry Montmerle*

This series contains the proceedings of major scientific meetings held by the International Astronomical Union. Each volume contains a series of articles on a topic of current interest in astronomy, giving a timely overview of research in the field. With contributions by leading scientists, these books are at a level suitable for research astronomers and graduate students.
