

Notes for contributors

A submission to Applied Probability is considered as a submission to either *Journal of Applied Probability* (JAP) or *Advances in Applied Probability* (AAP). Longer papers are typically published in AAP, but the assignment of papers between the two journals is made by the Editor-in-Chief on an issue-by-issue basis. Short communications and letters specifically relating to papers appearing in either JAP or AAP are published in JAP.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Submitted papers should be in English. It is the author's responsibility to ensure an acceptable standard of language, and a paper failing to meet this requirement may go back to the author for rewriting before being sent out for review.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2010 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the L^AT_EX class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted electronically through ScholarOne at <https://mc.manuscriptcentral.com/apjournals>. All submissions will be acknowledged on receipt.

Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0001–8678/19

Volume 51 **Number 4**

- 927 YAN QU, ANGELOS DASSIOS AND HONGBIAO ZHAO. Efficient simulation of lévy-driven point processes
- 967 JORGE I. GONZÁLEZ CÁZARES, ALEKSANDAR MIJATOVIĆ AND GERÓNIMO URIBE BRAVO. Exact simulation of the extrema of stable processes
- 994 ALEKSANDAR MIJATOVIĆ AND JURE VOGRINC. Asymptotic variance for random walk metropolis chains in high dimensions: logarithmic growth via the poisson equation
- 1027 THIRUPATHAIAH VASANTAM, ARPAN MUKHOPADHYAY AND RAVI R. MAZUMDAR. Insensitivity of the mean field limit of loss systems under $SQ(d)$ routing
- 1067 SVANTE JANSON, SUBHABRATA SEN AND JOEL SPENCER. Preferential attachment when stable
- 1109 JAMES D. CORDEIRO, JEFFREY P. KHAROUFEH AND MARK E. OXLEY. On the ergodicity of a class of level-dependent quasi-birth-and-death processes
- 1129 S. JANSEN. Cluster expansions for gibbs point processes
- 1179 JOSE BLANCHET, YANAN PEI AND KARL SIGMAN. Exact sampling for some multi-dimensional queueing models with renewal input
- 1209 M. FERREIRA, D. PINHEIRO AND S. PINHEIRO. Two-player zero-sum stochastic differential games with random horizon
