THE FUTURE OF THE
INTERNATIONAL LEGAL ORDER

Volume IV, The Structure of the International Environment

Edited by CYRIL E. BLACK AND RICHARD A. FALK

The issues of conflict management treated in this volume are relatively recent consequences of the scientific and technological revolution, and are in significant respects unprecedented in man's history: food distribution, population, ocean resources, air and water pollution. Seventeen lawyers and specialists in international affairs suggest solutions by adjustments to the present international system.

THE POLITICAL CHALLENGE
OF THE GREEN REVOLUTION:

*Shifting Patterns of Peasant Participation
in India and Pakistan*

BY FRANCINE R. FRANKEL AND KARL VON VORYS

The political consequences of rapid agrarian modernization are a loss of legitimacy by landed elites and the breakdown of vertical patterns of peasant mobilization. National development planning directed at a new social and political synthesis is urgently required to avoid a total breakdown of rural order.
