CAMBRIDGE JOURNALS

JFM ARCHIVE

Journal of Fluid Mechanics
Digital Archive
1956–1996

Vital research from the definitive source

The JFM Digital Archive contains every article from the first 40 years of the journal, scanned and digitised to the highest standards.

Please speak to your librarian about gaining access.

CAMBRIDGE JOURNALS

JFM FAST TRACK HAS EVOLVED

JFM RAPIDS

- Faster publication
- Greater visibility for papers
- Freely available to all for the first year

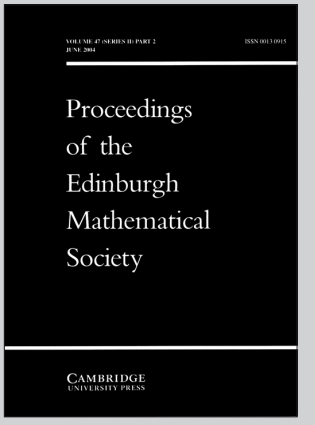
CAMBRIDGE JOURNALS

Proceedings of the Edinburgh Mathematical Society

Published for The Edinburgh Mathematical Society



Editorial Management
The Secretary, *ICMS, Edinburgh, UK*

The Edinburgh Mathematical Society was founded in 1883 and over the years, has evolved into the principal society for the promotion of mathematics research in Scotland. The Society has published its Proceedings since 1884. This journal contains research papers on topics in a broad range of pure and applied mathematics, together with a number of topical book reviews.

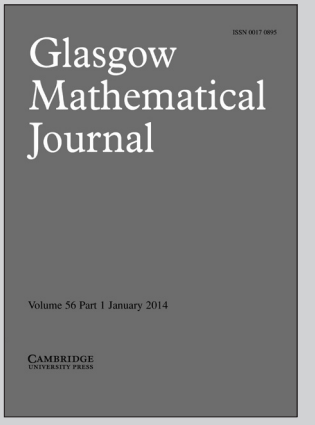
CAMBRIDGE JOURNALS

Glasgow Mathematical Journal

Published for The Glasgow Mathematical Journal Trust



Editor-in-Chief
I. A. B. Strachan, *University of Glasgow, UK*

Glasgow Mathematical Journal publishes original research papers in any branch of pure and applied mathematics. An international journal, its policy is to feature a wide variety of research areas, which in recent issues have included ring theory, group theory, functional analysis, combinatorics, differential equations, differential geometry, number theory, algebraic topology, and the application of such methods in applied mathematics.

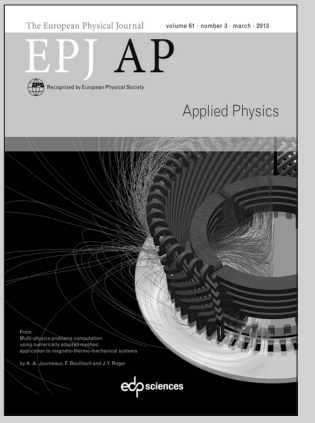
CAMBRIDGE JOURNALS

The European Physical Journal - Applied Physics

Marketed and distributed on behalf of ÉDP Sciences



Editor-in-Chief
B. Drévillon, LPCIM, France

EPJ-AP is an international journal devoted to the promotion of the recent progresses in all fields of applied physics. The articles published in *EPJ-AP* span the whole spectrum of applied physics research including semiconductors, organic materials, thin films, nanotechnology, photonics, spintronics, magetism, plasma, energy generation transfer, metrology, fluids and microfluidics, biophysics and biosensors, surfaces and interfaces.

503 Initial surface deformations during impact on a liquid pool
W. Bouwhuis, M. H. W. Hendrix, D. van der Meer & J. H. Snoeijer

520 A numerical evaluation of the asymptotic theory of receptivity for subsonic compressible boundary layers
N. De Tullio & A. I. Ruban

547 Formation of corner waves in the wake of a partially submerged bluff body
P. Martínez-Legazpi, J. Rodríguez-Rodríguez, A. Korobkin & J. C. Lasheras

564 Near-wall rising behaviour of a deformable bubble at high Reynolds number
H. Jeong & H. Park

595 An analytical solution to electromagnetically coupled duct flow in MHD
M. J. Bluck & M. J. Wolfendale

S 624 Space–time pressure–velocity correlations in a turbulent boundary layer
Y. Naka, M. Stanislas, J.-M. Foucaut, S. Coudert, J.-P. Laval & S. Obi

676 The energy cascade in near-field non-homogeneous non-isotropic turbulence
R. Gomes-Fernandes, B. Ganapathisubramani & J. C. Vassilicos

706 Dynamics of laser-induced bubble pairs
B. Han, K. Köhler, K. Jungnickel, R. Mettin, W. Lauterborn & A. Vogel

743 A systematic investigation of roughness height and wavelength in turbulent pipe flow in the transitionally rough regime
L. Chan, M. MacDonald, D. Chung, N. Hutchins & A. Ooi

JFM Rapids (online only)

R1 Merging of a row of plumes or jets with an application to plume rise in a channel
G. G. Rooney

R2 Localised turbulence in a circular pipe flow with gradual expansion
K. Selvam, J. Peixinho & A. P. Willis

S R3 The trapping in high-shear regions of slender bacteria undergoing chemotaxis in a channel
R. N. Bearon & A. L. Hazel

S indicates supplementary data or movies available online.

ISSN 0022-1120

Journal of Fluid Mechanics

25 May 2015

1 Destabilization of a stratified shear layer by ambient turbulence
L. Li, W. D. Smyth & S. A. Thorpe

16 The lift on an aerofoil in grid-generated turbulence
S. Li, M. Li & H. Liao

36 Internally heated convection beneath a poor conductor
D. Goluskin

57 Thermal effect on large-aspect-ratio Couette–Taylor system: numerical simulations
C. Kang, K.-S. Yang & I. Mutabazi

79 Tayler instability in liquid metal columns and liquid metal batteries
W. Herreman, C. Nore, L. Cappanera & J.-L. Guermond

S 115 The dynamical states of a prolate spheroidal particle suspended in shear flow as a consequence of particle and fluid inertia
T. Rosén, M. Do-Quang, C. K. Aidun & F. Lundell

159 Generation of nonlinear Marangoni waves in a two-layer film by heating modulation
A. Nepomnyashchy & I. Simanovskii

193 Latitudinal libration driven flows in triaxial ellipsoids
S. Vantieghem, D. Cébron & J. Noir

229 Effects of base flow modifications on noise amplifications: flow past a backward-facing step
X. Mao

S 264 Heat transfer mechanisms of a vapour bubble growing at a wall in saturated upward flow
C. H. M. Baltis & C. W. M. van der Geld

Contents continued on inside back cover.

303 Spectral scaling in boundary layers and pipes at very high Reynolds numbers
M. Vallikivi, B. Ganapathisubramani & A. J. Smits

327 Detachment of droplets from cylinders in flow using an experimental analogue
C. J. Hotz, R. Mead-Hunter, T. Becker, A. J. C. King, S. Wurster, G. Kasper & B. J. Mullins

341 Vortex separation and interaction in the wake of inclined trapezoidal plates
Y. Huang, J. Venning, M. C. Thompson & J. Sheridan

370 Modelling intrusions through quiescent and moving ambients
C. G. Johnson, A. J. Hogg, H. E. Huppert, R. S. J. Sparks, J. C. Phillips, A. C. Slim & M. J. Woodhouse

407 Sources and fluxes of scale energy in the overlap layer of wall turbulence
A. Cimarelli, E. De Angelis, P. Schlatter, G. Brethouwer, A. Talamelli & C. M. Casciola

S 424 Cavitation nuclei in water exposed to transient pressures
A. Andersen & K. A. Mørch

449 Stability of the tank treading modes of erythrocytes and its dependence on cytoskeleton reference states
Z. Peng, S. Salehyar & Q. Zhu

468 Symmetry-plane model of 3D Euler flows and mapping to regular systems to improve blowup assessment using numerical and analytical solutions
R. M. Mulungye, D. Lucas & M. D. Bustamante
