Professional Development*

## Advances in Psychiatric Treatment

Editor: Andrew Sims, *Director of  
Continuing Professional Development*

### Contents of the January 1996 issue

Management of the sexually abused  
child. *D. P. H. Jones*

What managers should expect of  
consultant psychiatrists. *L. Joyce, R. Perkin*  
Environmental quality for patients with  
dementia. *P. Bowie*

Electroconvulsive therapy machines.  
*C. Robertson, G. Ferguson*

Cognitive behaviour therapy for whom?  
*S. Moorey*

Risk assessment. "A word to the wise?".  
*M. Vinestock*

### Epilim Oral Prescribing Information

**Presentation** Epilim 200 Enteric Coated and Epilim 500 Enteric Coated: Enteric coated tablets containing 200mg, and 500mg Sodium Valproate Ph.Eur. respectively. Epilim Crushable Tablets containing 100mg Sodium Valproate Ph.Eur. Epilim Syrup and Epilim Liquid (sugar free) both containing 200mg Sodium Valproate Ph.Eur. per 5ml. Epilim Chrono 200, Epilim Chrono 300, and Epilim Chrono 500: Controlled release tablets containing a mixture of Sodium Valproate Ph.Eur. and Valproic Acid Fr.P. equivalent to 200mg, 300mg, and 500mg Sodium Valproate respectively. **Indications** Oral formulations of Epilim are indicated for all types of epilepsy. In women of child bearing age Epilim should be used only in severe cases or in those resistant to other treatment. **Dosage and administration** *Adults*: the dose should be titrated at three day intervals until seizure control is achieved. Initially 600mg a day increasing in steps of 200mg to a maximum dose of 2500mg per day. *Children over 20kg*: initially 400mg a day increasing in steps to a maximum dose of 35mg/kg/day. *Children under 20kg*: initially 20mg/kg/day - the dose may be increased in steps to a maximum of 40mg/kg/day provided that plasma levels are monitored. Epilim Chrono may be given once or twice daily. All other formulations should be given twice daily. **Combination therapy**: levels of Epilim and co-administered anticonvulsants may be affected and optimum dosage is determined by seizure control. **Contraindications, Warnings, etc.** **Contraindications** Active liver disease, family history of severe liver disease, hypersensitivity to valproate. **Side effects** Impaired hepatic function, particularly in children, occasionally leading to hepatic failure - treatment should be withdrawn in patients who suddenly develop symptoms compatible with hepatic disease such as nausea, anorexia, jaundice or malaise. Hyperammonaemia with or without hepatic dysfunction. Blood dyscrasia - impaired platelet function, thrombocytopenia, occasional leucopenia and red cell hypoplasia. Occasionally increased appetite, weight gain, transient hair loss, behavioural disturbances, alterations to the menstrual cycle and pancreatitis. Symptoms of intoxication include ataxia, tremor, and stupor. **Drug interactions** Epilim has significant interactions with phenytoin, lamotrigine and other anticonvulsants. Epilim may potentiate the effects of neuroleptics, MAOIs and other antidepressants, anticoagulants and salicylates. Cimetidine may inhibit the metabolism of Epilim. Epilim has no effect on the efficacy of oral contraceptives. **Pregnancy** An increased incidence of congenital abnormalities has been demonstrated in offspring born to mothers with epilepsy both untreated and treated, including those treated with sodium valproate. Neural tube defects have been reported in about 1% of offspring of women who have received valproate during the first trimester of pregnancy. Pregnancies should be screened for neural tube defects by estimation of alpha-fetoprotein and ultrasound. Folate supplementation has been shown to reduce the incidence of neural tube defects in the offspring of high risk women. **Legal category** P.O.M. **Further information** Epilim is hygroscopic - tablets should not be removed from their foil until they are used. Epilim Chrono is recommended in cases where plasma valproate levels are being measured on account of its pharmacokinetics. The effective therapeutic range for valproate is 40-100mg/l (278-694 micromol/l). **Product Licence Numbers** Epilim 200 Enteric Coated 11723/0018, Epilim 500 Enteric Coated 11723/0020, Epilim 100mg Crushable Tablets 11723/0017, Epilim Syrup 11723/0025, Epilim Liquid 11723/0024, Epilim Chrono 200 11723/0078, Epilim Chrono 300 11723/0021, Epilim Chrono 500 11723/0079. **NHS Cost** Epilim 200 Enteric Coated 100 tablets £6.42, Epilim 500 Enteric Coated 100 tablets £16.04, Epilim 100mg Crushable Tablets 100 tablets £3.89, Epilim Syrup 300ml £5.89, Epilim Liquid 300ml £5.89, Epilim Chrono 200 100 tablets £7.70, Epilim Chrono 300 100 tablets £11.55, Epilim Chrono 500 100 tablets £19.25. **Address**: Sanofi Winthrop Ltd., One Onslow Street, Guildford, Surrey GU1 4YS. **Telephone**: (01483) 505515 **Fax**: (01483) 35432. Epilim, Epilim Chrono and the Chrono device are registered trade marks. **Date of preparation** August 1995.

## PART I. SUBJECTS

### Abnormal Involuntary Movement Scale

Lipid peroxide and vitamin E in tardive dyskinesia. Robin G. McCreadie *et al* 610–617

Tardive dyskinesia in schizophrenia. John L. Waddington *et al* 41–44

**Admission beds.** Crisis. Four-year survey of the bed-state of Greater London's acute psychiatric units. Robin B. Powell *et al* 765–769

**Admission rates.** Social deprivation and rates among different diagnostic groups. Judy Harrison *et al* 456–462

### Adolescence

Family functioning in anorexia nervosa. Clive North *et al* 673–678

Periodic psychosis of puberty revisited. Kazuhiko Abe and Mikio Ohta 507–513

*see also* **Childhood and adolescence**

**Adversity.** Women's response. G. C. Mezey (C) 266

**Affective psychoses.** Somatic delusions. Iain McGilchrist and John Cutting 350–361

**Afro-Caribbeans.** Second-generation in Britain. Child and adolescent psychiatric presentations. Robert Goodman and Hilary Richards 362–369

**Age-associated memory impairment.** Prevalence study. Andrew Barker *et al* 642–648

**Agoraphobia.** Panic disorder. Cognitive behaviour therapy with buspirone or placebo. Jean Cottraux *et al* 635–641

**A hundred years ago.** Henry Rollin

Alleged increase of insanity 826

Association of Workers in Asylums for the Insane. By Fletcher Beach 554

Malingering and miracles 700

New Inebriates Bill 270

Simulation of death by fakirs 119

Society for the Study of Inebriety 414

**Akathisia.** Neuroleptic-induced. Cyproheptadine treatment. David Weiss *et al* 483–486

### Alcohol misuse

Gender differences in parental psychology following infant death. John C. Vance *et al* 806–811

Morbid jealousy. Albert Michael *et al* 668–672

New Inebriates Bill. Henry Rollin (*A hundred years ago*) 270

Psychosocial outcome of liver transplant. L. M. Howard and T. Fahy (C) 267–268

Society for the Study of Inebriety. Henry Rollin (*A hundred years ago*) 414

**Alpha2 adrenoceptor.** Clozapine-induced hypersalivation. F. M. Corrigan *et al* (C) 412

### Alzheimer's disease

Apolipoprotein E genotype and its effect on duration and severity of early and late onset disease. Jennie Norrman *et al* 533–536

Further evidence that reading ability is not preserved. R. E. O'Carroll *et al* 659–662

Normal ageing. Brain atrophy. Hans Förstl *et al* 739–746

Presenile. Community care. M. Evans (C) 408

Presenile. Epidemiology in Scotland (1974 to 1988). Lawrence J. Whalley *et al*

I. Non-random geographical variation 728–731

II. Exposures to possible risk factors 732–738

Validation of a French version of an informant-based questionnaire as a screening test. Samuel Law and Christina Wolfson 541–544

### Analyses *see* Statistics

### Anorexia nervosa

Family functioning in adolescence. Clive North *et al* 673–678

'Non-white' populations. G. M. Soomro *et al* 385–389

**Anticoagulated state.** Intramuscular injections. P. Aitken and J. Bolton (C) 269

### Antidepressants

Behavioural toxicities. J. S. Kerr *et al* (C) 413. J. F. O'Hanlon and H. Freeman (*Authors' reply*) (C) 413–414

Economics of treatment of depression. D. W. Owens (C) 112.

B. Jönsson and P. E. Bebbington (*Authors' reply*) (C) 112.

C. Thompson (C) 112

Effect of exposure to dothiepin and northiaden in breast milk on child development. Anne Buist and Helen Janson 370–373

In pregnancy and breastfeeding. D. A. Ratan and T. Friedman (C) 824

Repeat prescriptions and residential care. A. Farmer (C) 408–409

SSRIs and tricyclics in combination. David Taylor (*Review Article*) 575–580

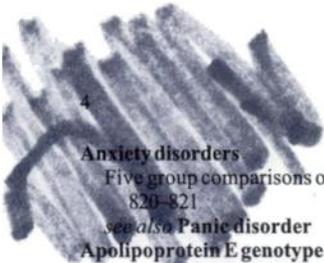

*see also* individual names

### Antipsychotics

Drug-induced dysphoria. D. J. King *et al* 480–482

Lead-in placebo washout period. J. Volavka (C) 694

*see also* **Neuroleptics** and individual names

## INDEX

### Anxiety disorders

Five group comparisons of treatments. D. M. Sharp *et al* (C) 820–821

*see also* Panic disorder

Apolipoprotein E genotype. Effect on duration and severity of early and late onset Alzheimer's disease. Jennie Norrman *et al* 533–536

### Asylums

Association of Workers in Asylums for the Insane. By Fletcher Beach. Henry Rollin (*A hundred years ago*) 554  
*see also* Leros PIKPA

**Auditory hallucinations.** Chronic. Exposure control in schizophrenia. Rajendra Persaud and Isaac Marks 45–50

**Behavioural family management.** Immigrant families coping with schizophrenia. Cynthia Telles *et al* 473–479

**Behavioural toxicities.** Antidepressants. J. S. Kerr *et al* (C) 413. J. F. O'Hanlon and H. Freeman (*Authors' reply*) (C) 413–414

**Behaviour symptoms.** Severely and profoundly mentally retarded patients. Andrew H. Reid and Brian R. Ballinger 452–455

**Bereavement.** Gender differences in parental psychology following infant death. John C. Vance *et al* 806–811

**Biological psychiatry.** Reductionism. Hasse Karlsson and Matti Kamppinen (*Editorial*) 434–438

### Bipolar disorder

Is there a seasonal pattern of relapse? Trevor Silverstone *et al* 58–60

Psychotherapy. Jan Scott (*Review Article*) 581–588

*see also* Manic–depression

**Blu-Tack.** A novel substance of abuse. M. Walker-Kinney and T. Jones (C) 550–551

**Bovril.** Moclobemide. Treatment of clozapine-induced hypotension. D. Taylor *et al* (C) 409–410

### Brain

Atrophy in normal ageing and Alzheimer's disease. Hans Förstl *et al* 739–746

Brains, biases, deficits and disorders. Richard P. Bentall (*Commentary*) 153–155

Damage and tardive dyskinesia. A. Al-Adwani (C) 410–411  
Darwinian approach to the origins of psychosis. T. J. Crow (*Review Article*) 12–25

MRI and SPET and treatment response in schizophrenia. Stephen M. Lawrie *et al* 202–210

Neuropsychiatric sequelae of mercury poisoning. R. E. O'Carroll *et al* 95–98

Neuropsychological slowness in OCD. Silvana Galderisi *et al* 394–398

Perfusion abnormalities in Tourette's syndrome. John Moriarty *et al* 249–254

Post-convulsional state: neurophysiological aspects. M. R. Watson *et al* 514–521

Psychosurgery for obsessive disorder. R. P. Snaith *et al* (C) 411

Regional activity in chronic schizophrenic patients during a verbal fluency task. C. D. Frith *et al* 343–349

Regional cerebral blood flow in OCD patients at rest. James V. Lucey *et al* 629–634

Sensorimotor cortex and supplementary motor area changes in schizophrenia. J. Schröder *et al* 197–201

Tardive dyskinesia in schizophrenia. Relationship to minor

physical anomalies, frontal lobe dysfunction and cerebral structure on MRI. John L. Waddington *et al* 41–44

### Breastfeeding

Effect of exposure to dothiepin and nortriaden on child development. Anne Buist and Helen Janson 370–373

Pregnancy. Antidepressants. D. A. Ratan and T. Friedman (C) 824

### Brief Psychiatric Rating Scale

Clozapine in neuroleptic-resistant schizophrenia. Moshe Avnon and Jonathan Rabinowitz 760–764

Schizophrenia and expressed emotion in Japan. Shuichi Tanaka *et al* 794–798

### Britain

Child and adolescent psychiatric presentations of second-generation Afro-Caribbeans. Robert Goodman and Hilary Richards 362–369

*see also* London and Scotland

### British Journal of Psychiatry

Behavioural toxicities of antidepressants. J. S. Kerr *et al* (C) 413. J. F. O'Hanlon and H. Freeman (*Authors' reply*) (C) 413–414

Structured abstracts. D. J. Castle (C) 266–267

Use of statistics. S. M. McGuigan 683–688. Improving the quality of statistics in psychiatric research. David Hand and Pak Sham (*Commentary*) 689–691

# Give someone with epilepsy a future to look forward to

People with epilepsy have the same aspirations as anybody else. What they need is a treatment which allows them to fulfil their potential.

Whatever the type of epilepsy, Epilim Chrono can help. Effective both in generalized and partial seizures,<sup>1</sup> it is well tolerated (particularly with regard to cognitive function)<sup>2</sup>, and offers patients the convenience of once-daily dosing.

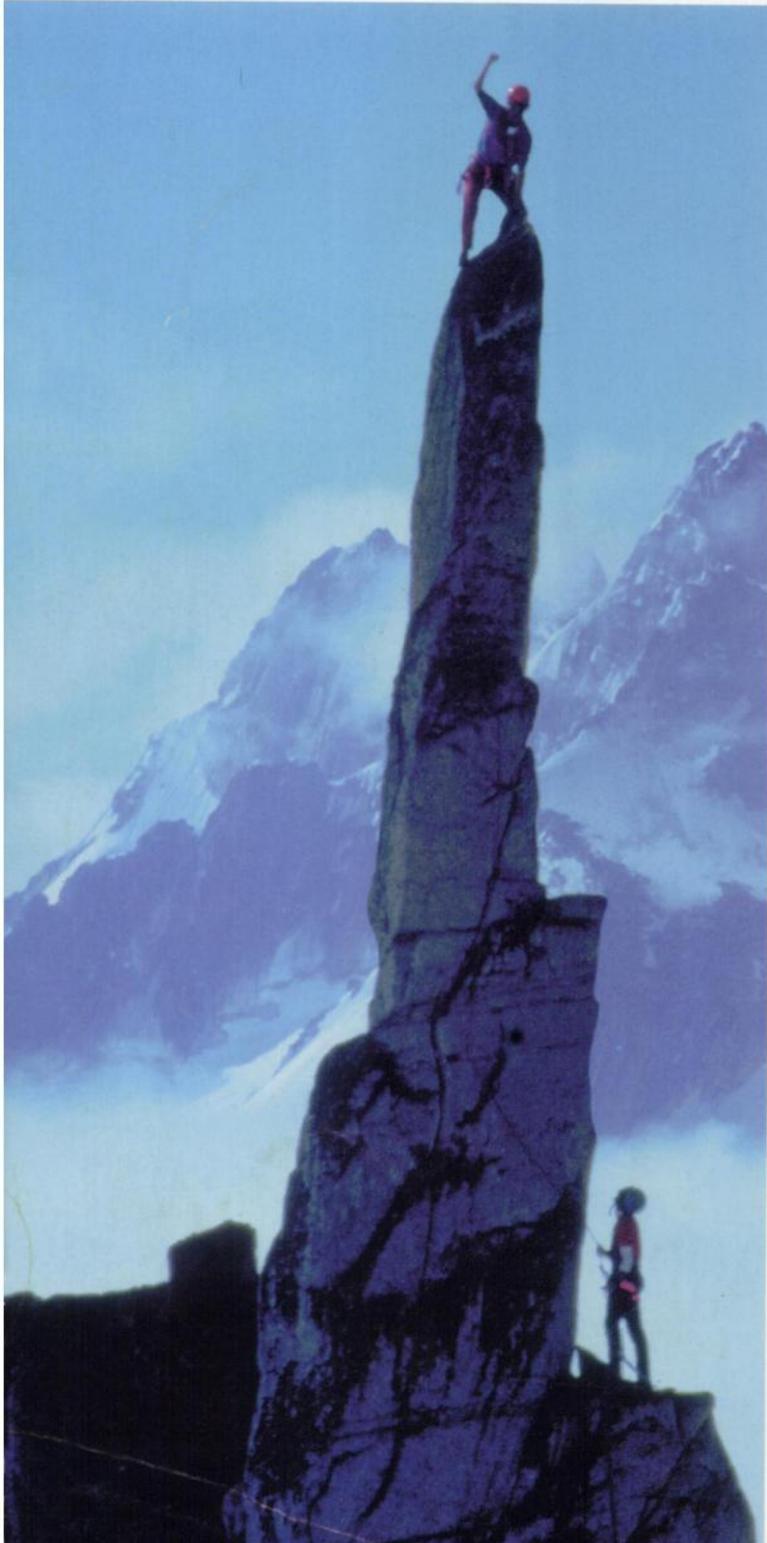

It helps people with epilepsy get on with their lives today, and look forward to tomorrow.

**Epilim** **CHRONO**  
Sodium Valproate Ph. Eur.  
Valproic Acid Fr.P Controlled Release

**Once-daily management  
for all forms of epilepsy**

Leadership isn't given. It's earned.

**PROZAC**  
*fluoxetine*

The World's No. 1  
prescribed
