**In senile  
psychiatric  
syndromes**

Pacatal improves the disturbed behaviour patterns of all senile psychiatric patients, from mild senile deterioration to marked senile dementia. Throughout therapy the patient's mental alertness is unimpaired. Maximum tranquillity is achieved with minimum sedation. **PACATAL CONTROLS** agitation—irascibility—restlessness—confusion—nocturnal wanderings—destructiveness—disturbance of bowel and bladder control.

# PACATAL

**Dosage:** The appropriate dosage varies from case to case. Low dosage levels (ranging from 25 to 100 mg. daily) have been proved effective and safe for chronic organic senile patients.

**Presentation:** Tablets of 25 and 100 mg. strength in bottles of 50 and 500. Ampoules each containing 50 mg. in 2 ml. in boxes of 10 and 50.

## **PACATAL ELIXIR**

A pleasantly flavoured presentation (in bottles of 4 fl. oz.) for elderly patients.

**Dosage:** one or two teaspoonfuls 3 times a day. Each teaspoonful contains 20 mg. pectazine.

**WILLIAM R. WARNER & CO. LTD.,** *Eastleigh, Hampshire. Tel: Eastleigh 3131*

**an important  
introduction**

**'MAJEPTIL'**  
trade mark brand

thiopropazine methanesulphonate

Thiopropazine is a new phenothiazine derivative in which the characteristic pharmacological properties of prochlorperazine ('Stemetil'\*) are greatly enhanced. It shows correspondingly intensified activity as a psychocorrective agent and is therefore particularly indicated for trial in chronic schizophrenic patients who have failed to derive any substantial benefit from existing methods of treatment.

'Majeptil' is also remarkably effective in controlling acute mania and other states of psychotic excitement.

#### PRESENTATIONS

Tablets of 1 mg., 5 mg., 10 mg. and 25 mg.

Ampoules of 1 ml. (7.5 mg.) of 0.75 per cent w/v solution.

## INSTRUCTIONS TO AUTHORS

Strict observation of the following requirements will save intending authors considerable time and worry, and will facilitate the publication of papers submitted.

(1) Authors should consult a current issue to see how a paper should be presented. They should consult *General Notes on the Preparation of Scientific Papers*, published for the Royal Society by the Cambridge University Press, 200 Euston Road, London, N.W.1 (price 2s. 9d. post free).

(2) The title should be brief and contain no sub-heading. This should be followed by the author's name, his qualifications and his present appointment.

(3) Omit a summary of the literature when this has been adequately summarized elsewhere.

**(4) For reasons of economy, case-histories of patients can be published only when they are of exceptional scientific interest.**

(5) Diagrams and graphs must be drawn in black ink with properly printed lettering. If they have to be redrawn by the printer, the cost, which may amount to several pounds, will be charged to the author.

(6) Tables and graphs should be kept as few as possible. If they number more than a few, the author must be prepared to pay part of their cost.

(7) Any deviation or difference that might be due to random sampling must, if it is to be discussed in its general, scientific significance, be first shown, by calculation of the appropriate probability, to be significant statistically.

(8) All references should be given at the end of the paper, in alphabetical order, and be numbered, i.e.

(1) SMITH, A. B., *J. Ment. Sci.*, 1950, **95**, 493.

(2) THOMAS, B. C., *Arch. Neur. Psychiat.*, 1955, **74**, 489.

In the body of the paper they should appear as: Smith (1), Thomas (2).

(9) When the proof arrives from the printer it is for the correction of printer's mistakes only. Larger alterations can be made only with the Editor's permission and if the author is willing to defray the cost.

(10) Each author and co-author will receive 10 reprints of his paper free of charge. If further reprints are required the order should be sent direct to Messrs. Headley Brothers, Ltd., The Invicta Press, Ashford, Kent, at the time the galley proof is sent to the author. Orders for reprints must not be sent to the Editor-in-Chief.

(11) A paper sent to the Editor-in-Chief is, as a rule, sent to one of the panel of Referees set out on the cover of the Journal for his opinion.

# 35

'LIBRIUM' and the **35** tranquilizers

**'LIBRIUM'**

*the successor to  
the tranquilizers*

The era of tranquilizers that preceded 'Librium' therapy saw a long succession of drugs—thirty-five by the latest count. And yet today, 'Librium' has attained a clinical stature which may well establish it as the successor to this entire group.
