

ERRATUM

Communicating Public Health Advice After a Chemical Spill: Results From National Surveys in the United Kingdom and Poland—ERRATUM

J. Pearce, J. Rubin, R. Amlôt, S. Wessely, and M. Rogers

doi:10.1001/dmp.2012.56, Published by the American Medical Association, 7 December, 2012.

In the original publication of ‘Communicating Public Health Advice After a Chemical Spill: Results From National Surveys in the United Kingdom and Poland,’ there were several reference citations that were published incorrectly. The corrections are as follows:

- Page 2, the sentence, “PMT was originally developed as a model...” the citation should be to reference: **16**
- Page 2, the sentence, “Because previous authors ...framing an emergency message on public responses...” the citation should be to references: **21-23**

- Page 8, the sentence, “PMT has been identified as a potentially useful...” the citation should be to reference: **26**
- Page 8, the sentence, “Some reassurance is provided by the similarity...” the citation should be to reference: **26**

The publisher regrets these errors.
