

NEW FROM GASKELL

# Seminars in Psychosexual Disorders

Series Editors: H. Freeman, I. Pullen,  
G. Stein and G. Wilkinson

This is the latest addition to the highly successful *College Seminars* series. Closing a gap in the literature, this book looks at problems relating to sexuality. The first half of the book focuses on what may go wrong between couples and ways of dealing with these problems. The second part of the book devotes itself to disorders of sexual direction, examining the background and management associated with deviant sexual behaviour, with homosexual expression and gender problems. The physiology and development of normal sexual processes are also covered. In the final chapters therapists with particular expertise give account of their therapeutic methods.

**Features:**

- A group of experts in their own fields talk of sexology, marital problems and the problems of sexual and gender minority groups
- Some chapters are written by individuals who share these problems and can speak as users

**Contents:**

**Section I:** The neuroendocrine basis of sexuality and organic dysfunction • Gender development • Sexology and male sexuality: a history of socio-medical attitudes towards sexual behaviour • Sexual therapy and the couple • Physical treatments for sexual dysfunctions • Child abuse • Psychiatric aspects of HIV infection and disease • Problems of sexuality among people in mental health facilities. **Section II:** The paraphilias: an evolutionary and developmental perspective • Transgenderism and the psychiatrist. **Section III:** Counselling and sex therapy for couples with psychosexual problems • An investigation of partnership problems in sex therapy • A counsellor's work with clients presenting with paraphilias. **Bibliography. Index.**

June 1998, £15.00, 250 pp approx, ISBN 1 901 242 03 X, 235 x 156

# 1998 Pfizer Psychiatry Awards

As part of our continuing commitment to improving the management of psychiatric illness, Pfizer will be awarding five research grants of £5,000 each to support projects in the field of mental health; £2,000 will be given to the winning institution and £3,000 to the author.

The awards are open to any hospital physician or research scientist with an interest in psychiatry who has carried out previously unpublished research in schizophrenia, dementia or depression.

For more details, including an entry form, contact your Pfizer representative, call Freephone 0800 0681915, or write to:
