Keywords: newsletter 63, corrigendum

After Newsletter 63 went to press, we became aware of two mistakes concerning (1) the catalogue number of the deposited holotype tombstoneite, and (2) the type locality of aldomarinoite. Below are the corrected entries.

IMA No. 2021-053 - Tombstoneite

Type material is deposited in the mineralogical collections of the Natural History Museum of Los Angeles County, 900 Exposition Boulevard, Los Angeles, CA 90007, USA, catalogue number 76198

IMA No. 2021-054 - Aldomarinoite

Valletta mine, Vallone della Valletta, Canosio (CN), Maira Valley, Piedmont, Italy (44°23'54"N, 7°05'37"E, 2560 m a.s.l.)
