

GENERAL NOTES

ROYAL SOCIETY OF MEDICINE.

1 Wimpole Street, London, W. 1.

Section of Laryngology—The next Meeting of the Section will be held on Friday, 2nd December, at 5 o'clock. A discussion will take place on "Vasomotor Affections of the Nose and their relation to Bronchial Asthma." Openers: Professor van Leeuwen (Leyden), Mr. Walter Howarth and Dr. A. F. Wright (Birmingham).

President—Mr. Musgrave Woodman, 22 Newhall Street, Birmingham.
Hon. Secretaries—Mr. F. J. Cleminson, 32 Harley Street, London, W. 1, and Mr. H. G. Bedford Russell, 86 Harley Street, London, W. 1.

Section of Otology.—The next Meeting of the Section will be held on Friday, 2nd December, at 10.30 A.M. Papers will be read by Mr. T. B. Layton on "Early Signs of Acute Otitis Media," and by Dr. Gordon on "Results of Myringotomy at a Fever Hospital."

President—Mr. J. F. O'Malley, 6 Upper Wimpole Street, London, W. 1.
Hon. Secretaries—Mr. C. Gill-Carey, 106 Harley Street, London, W. 1, and Mr. P. J. Jory, 26 Queen Anne Street, London, W. 1.

* * *

LOGAN TURNER PRIZE.

The first award of this prize will be made in June 1934. The subject is "To investigate the part played by Allergy or Sensitisation as a factor in predisposing the mucous membrane of the nasal passages and the paranasal air sinuses to infection, and its bearing upon the treatment of disease of these cavities." Papers should be sent in to the Secretary, Laryngological Section, Royal Society of Medicine, 1 Wimpole Street, London, W. 1.

* * *

At the first meeting of the Laryngological Section of the Royal Society of Medicine, Sir St Clair Thomson was presented with his portrait by his fellow-members of the Section as an appreciation of the distinguished services that he has rendered to Laryngology.

Peroral Endoscopy Table

Designed and built at Chiron Works for King's College Hospital

This table is arranged for nasal and aural operations as well as for endoscopic work.

The back rest is adjustable from the dependant position shown in the illustration to one nearly at right angles to the top of the table for nasal operations, in which case a suitable head rest is attached.

The table is adjustable in height and can be tilted in either direction and is absolutely rigid in any position. Further particulars furnished on request.
