# HIGHLIGHTS OF ASTRONOMY

## VOLUME 2

*As presented at the XIVth General Assembly  
of the I.A.U. 1970*

After the same pattern as the XIIIth General Assembly of the International Astronomical Union the present volume of the *Highlights of Astronomy* contains the texts of the invited discourses given at the XIVth General Assembly held in Brighton, England, August 1970. It contains further the papers and discussion remarks presented at the six joint discussions, as well as the invited papers given at the special session on the Moon. In addition, this volume contains the paper given at the joint meeting of Commissions 24, 27, 30, 33, and 37 on RR Lyrae Stars. It goes without saying that the nearly one hundred papers appearing in this volume represent only a minor part of all matter dealt with at the XIVth General Assembly of the Union; the many important discussions that took place in a few hundred commission meetings are not included. For short abstracts and reviews of these the reader is referred to *Transactions of the International Astronomical Union*, volume **XIVB**.

## TABLE OF CONTENTS

Preface	v
---------	---

### I. INVITED DISCOURSES

A. Hewish	Pulsars	3
V. L. Ginzburg	Pulsars ( <i>Theoretical Considerations</i> )	20
B. J. Bok	Observational Evidence for Galactic Spiral Structure	63
C. C. Lin	Theory of Spiral Structure	88

### II. SPECIAL MEETING ON DIRECT EXPLORATION OF THE MOON

L. R. Scherer	The Apollo Missions	125
G. Fielder	Lunar Igneous Activity and Differentiation	142
M. Ewing, G. Latham, F. Press, G. Sutton, J. Dorman, Y. Nakamura, R. Meissner, F. Duennebier, and R. Kovach	Seismology of the Moon and Implications on Internal Structure, Origin and Evolution	155
C. P. Sonett, P. Dyal, D. S. Colburn, B. F. Smith, G. Schubert, K. Schwartz, J. D. Mihalov, and C. W. Parkin	Induced and Permanent Magnetism on the Moon: Structural and Evolutionary Implications	173

### III. JOINT DISCUSSIONS

#### A. THE ORIGIN OF THE EARTH AND PLANETS

(Edited by B. M. Middlehurst)

Opening Remarks	193
I. Origin of the Solar Nebula (inv. speaker: F. Hoyle)	195
II. Internal Constitution and Thermal Histories of the Terrestrial Planets (inv. speaker: B. Levin)	204
III. Internal Constitution of the Giant Planets (inv. speaker: W. De Marcus)	228
IV. Open Discussion	239

## B. HELIUM IN THE UNIVERSE

(Edited by J. S. Mathis)

D. E. Osterbrock	Opening Remarks at Joint Discussion on the Helium in the Universe	247
R. J. Tayler	Introductory Talk	248
R. Cayrel	Abundance of Helium in Stellar Atmospheres	254
J. Faulkner	The Abundance of Helium in Stellar Interiors	269
M. J. Seaton	Abundances of Helium in Gaseous Nebulae	288
R. Kippenhahn	Production of Helium by Stellar Evolution	296
R. V. Wagoner	Production of Helium in Massive Objects	301
A. G. Doroshkevich, I. D. Novikov, R. A. Sunyaev, and Ya. B. Zeldovich	Helium Production in the Different Cosmological Models	318
G. Burbidge	Helium in the Universe: Final Summary	328

## C. INTERSTELLAR MOLECULES

(Edited by D. McNally)

G. H. Herbig	Introductory Remarks	335
<i>1. The Observations</i>		
D. McNally	Interstellar Molecules – the Optical Region	339
N. J. Woolf	Infrared Observations and Interstellar Molecules	350
C. H. Townes	Microwave Evidence for Interstellar Molecules	359
P. G. Mezger	Molecules in Dense Clouds and Protostars	366
B. E. Turner	OH as a Constituent of the Interstellar Medium	378
B. Zuckerman	$\Lambda$ doublet Radiation from OH Excited Rotational States	391
P. Palmer	Interstellar Formaldehyde	394

R. D. Davies	The Relative Density of H, OH and H <sub>2</sub> CO in Interstellar Clouds	402
D. M. Rank	NH <sub>3</sub> and H <sub>2</sub> O emission in our Galaxy	404
L. E. Snyder and D. Buhl	Radio Emission from Interstellar Hydrogen Cyanide and X-ogen	407
<i>2. Formation of Molecules</i>		
G. Herzberg	Laboratory Studies of the Spectra of Interstellar Molecules	415
W. Klemperer	Interstellar Molecule Formation; Radiative Association and Exchange Reactions	421
E. E. Salpeter	Molecule Formation on Grain Surfaces	429
H. D. Breuer and H. Moesta	Photochemistry of Atoms and Molecules in the Adsorbed State	432
N. C. Wickramasinghe	Interstellar Molecules from Cool Stars	438
<i>3. Excitation Mechanisms</i>		
Panel Discussion		447
J. L. Greenstein	Final Remarks	460

D. ATOMIC DATA OF IMPORTANCE  
FOR ULTRAVIOLET AND X-RAY ASTRONOMY

(Edited by C. Jordan)

R. Wilson	Introduction	465
D. C. Morton	The Interpretation of Space Observations of Stars and Interstellar Matter	466
L. Goldberg	The Interpretation of XUV Solar Radiation	476
A. H. Gabriel	Some Problems Relating to Solar Line Identification	486
R. M. Bonnet and D. Sacotte	Opacity Sources in the UV Spectrum of the Sun	495
M. J. Seaton	Atomic Data of Importance for Ultra- Violet and X-Ray Astronomy: a Review of Theory	503
W. Eissner	Computer Programs for Calculating Atomic Data for Ions	509

D. R. Flower	Collision Strengths for Electron Excitation of Coronal Ions	512
D. Petrini	The Electron Excitation Rate for the Green Coronal Line at 5303 Å	518
C. Jordan	The Relative Intensities of Lines from BeI-like Ions in the Solar Spectrum	519
K. T. Dolder	The Relevance to Astrophysics of the Results of Recent Experiments with Colliding Charged-Particle Beams	527
W. Lochte-Holtgreven	Results Obtained from Observations of Laboratory Plasmas	537
R. Snyder	Relativistic Contributions to Energies of Highly Ionized Atoms	544
M. Jones	Relativistic Corrections to Atomic Energy Levels	549
R. H. Garstang	Magnetic Multipole Transition Probabilities	555
H. van Regemorter	Pressure Broadening of UV Lines	561
S. Sahal-Brechot and E. Segre	New Results on Electron Broadening of some UV Lines of NII, CII, CIV and SIII, SiIII, SiIV	566
G. Elwert and E. Haug	On the Polarization and Anisotropy of Solar X-Radiation during Flares	575
A. G. Hearn	Summary of the Joint Discussion. Atomic Data of Importance for Ultraviolet and X-Ray Astronomy	580

#### E. PHOTO-ELECTRIC OBSERVATIONS OF STELLAR OCCULTATIONS

(Edited by T. J. Deeming)

T. C. van Flandern	The Value of Photoelectric Occultation Timings in Lunar Motion Studies	587
L. V. Morrison	A Comparative Study of Visual and Photoelectric Timing of Occultations	589
D. W. Dunham	Geodetic Applications of Grazing Occultations	592

D. S. Evans	The Investigation of Lunar Limb Structure by Means of Stellar Occultations	601
C. Hazard	Optical and Radio Occultation Analysis	607
A. T. Young	Seeing Effects on Occultation Curves	622
E. Høg	A Data Acquisition System with On-line Computer	624
K. R. Lang	Lunar Occultation Theory and Techniques	626
A. M. Sinzi	Photoelectric Observations of Occultations in Japan	636
E. Pansch and Chr. de Vegt	A Preliminary Analysis of Photoelectric Occultation Measurements	638
T. Krishnan	The Effects of Filters and Colour on Stellar Occultations and Appropriate Deconvolution Procedures	646
T. J. Deeming	Remarks on the Restoration of Occultation Observations	662
M. M. McCants and R. E. Nather	Analysis of Lunar Occultation Data	668
K. D. Rakos	Photometric Observations of the Occultations of Stars by the Moon	675
N. M. White	Some recent Observations of Occultations by the Moon	688
H. L. Poss	Angular Diameters of the Red Giants 46 Leo and $\phi$ Aqr and Parameters of some Binary Systems from Occultation Observations	692
R. A. Berg	Photoelectric Occultation Observations of Regulus and the Pleiades	700
C. L. Morbey and J. B. Hutchings	Occultation Studies at the Dominion Astrophysical Observatory	708
J. Davis	The Determination of Angular Diameters of Stars	713
D. S. Evans	Closing Remarks	721

## F. PULSARS, COSMIC RAYS AND BACKGROUND RADIATION

(Edited by M. J. Rees)

L. Woltjer	Some Astrophysical Aspects of Pulsars	725
T. Gold	Pulsars and the Origin of Cosmic Rays	727
A. G. W. Cameron	Surface Composition and Cooling Histories of Neutron Stars	731
V. L. Ginzburg	Remarks on the Role of Pulsars in Cosmic Ray Production	737
M. M. Shapiro	Composition and Galactic Confinement of Cosmic Rays	740
M. J. Rees	The Cosmic Background Radiation: Some Recent Developments	757

IV. THE ABSOLUTE MAGNITUDES OF THE  
RR LYRAE STARS

(JOINT MEETING OF COMMISSIONS 24, 27, 30, 33 AND 37)

(Edited by W. S. Fitch)

R. Woolley	The Absolute Magnitudes of the RR Lyrae Stars	771
R. F. Christy	Absolute Magnitudes of RR Lyrae Stars	777
G. van Herk	Review of Observational Data on RR Lyrae Stars	781
S. V. M. Clube	Absolute Magnitudes of RR Lyrae Variables	788
A. R. Klemola	The Lick Observatory Program on Proper Motions of RR Lyrae Stars	790
General Discussion		792
