

ANIMAL PRODUCTION

JOURNAL OF THE BRITISH SOCIETY OF ANIMAL PRODUCTION

DECEMBER 1978

VOL. 27 PART 3

LONGMAN

INFORMATION FOR CONTRIBUTORS TO *ANIMAL PRODUCTION*

Detailed notes for guidance in the preparation of manuscripts are printed in Volume 25: pages ix to xxii. A few general points are given below.

Animal Production publishes reports in English of *original* work in the field of animal production, or in any related scientific field. The Editors will consider articles on any aspect of research or development, providing the work described has been carried out in a systematic way, and articles critically re-examining published information. Reviews of the literature are not accepted. Reports on techniques will be published only as appendices to scientific papers. Contributions should be concise. Results of research which do not warrant a comprehensive presentation may be submitted for consideration as *Notes*. Notes are not intended for the publication of interim results. They should not exceed 2000 words or the equivalent inclusive of tables and illustrations.

Papers are published on the understanding that they have not been and, with the exception of authors' abstracts, will not be published elsewhere without the Editors' written permission. Authors' abstracts can be reproduced if full acknowledgement of the source is made.

Manuscripts should be typewritten on one side of the paper in double-line spacing with wide margins. Each page and the lines on each page should be numbered. Three, or exceptionally two, copies, one of which must be the original, of the typescript and illustrations should be sent to

Professor J. A. F. Rook,
Animal Production,
The Hannah Research Institute,
Ayr KA6 5HL, Scotland

Manuscripts are not returned with proofs; authors should therefore retain copies.

Units of measurement. The International System of Units (SI) should be used, with the recommendations and modifications in *Quantities, Units and Symbols*, The Royal Society, London, 1975, and *Metric Units, Conversion Factors and Nomenclature in Nutritional and Food Sciences*, The Royal Society, London, 1972—reproduced in *Proc. Nutr. Soc.* 31: 239–247, 1972.

Symbols and abbreviations. Authors should consult the notes prepared for guidance. Levels of statistical significance must be clearly indicated.

Illustrations. The same material should not normally be presented in tables and figures. Legends should be typed on a separate sheet.

- (a) Diagrams should be drawn in Indian ink, about twice the size of the finished block, on Bristol board, stout tracing paper or plastic film.

TROPICAL ANIMAL HEALTH AND PRODUCTION

This Journal publishes the results of original research, investigation and technology in the fields of animal disease and animal production which may lead to a fuller utilization of animal resources in developing countries, particularly in tropical and sub-tropical zones.

Published quarterly in February, May, August and November
Volume 11, 1979

Annual subscription	£15.00	USA \$36.00
Single numbers	£4.00	USA \$10.00

Subscription orders to:

BRITISH SOCIETY OF ANIMAL PRODUCTION

Publications

New Occasional Series

No. 1 – THE USE OF BLOOD METABOLITES IN ANIMAL PRODUCTION

The proceedings of a symposium held in Harrogate, England, in March 1976 and organised by the Society. The publication includes 14 papers which present results from techniques for evaluating energy and protein status in dairy cows, suckler cows and ewes. The techniques were generally based on measurements of levels in the blood of metabolites such as glucose, FFA, β -hydroxybutyrate, urea-N and albumin. The value of hormone assessment is also considered.

166pp. Price £5 (\$9), including post and packing. Orders to the Hon. Secretary of BSAP, c/o Meat and Livestock Commission, PO Box 44, Queensway House, Bletchley, Milton Keynes, MK2 2EF, Telephone: Milton Keynes (0908) 74941, Telex: 82227. Remittance with order.

Available shortly

No. 2 – THE MECHANISATION AND AUTOMATION OF CATTLE PRODUCTION

The proceedings of a symposium held in Harrogate, England, in December 1977 organised by the Society. The publication includes 19 papers. Five papers deal with developments of data recording applied to identification, weight, milk yield and health and control systems. An assessment of milking machine methods and developments is the subject of five more papers followed by a further five papers on feeding including automatic calf feeding systems and developments in the handling of concentrates and forages. Two papers review developments in the USA and Holland.

No. 3 – BY-PRODUCTS AND WASTES IN ANIMAL FEEDING

The proceeding of a conference to be held in Harrogate, England, in November 1978 including 13 papers. Subjects to be discussed include nutritional principles involved in by-product and waste feeding, methods of obtaining, storing and referring to nutritional values and veterinary aspects. By-products and wastes from the farm, industry and the tropics will be fully discussed.

Publications Nos. 2 and 3 will be available from the Hon. Secretary of the Society.
