# PACATAL

*10-(N-methyl-3-piperidylmethyl) phenothiazine*

TRADE MARK

Pacatal is the improved tranquillizing drug with a range of activity significantly different in some aspects from that of chlorpromazine. Within the psychiatric field, response to Pacatal is most marked

**in the treatment of**

**PARANOID SCHIZOPHRENICS**

**AGITATED DEPRESSIVES**

**SENILE PATIENTS**

Pacatal tends to produce better results in patients over fifty than in the younger age groups and it has also been observed that women often respond better than men.

**Presentation:**

Tablets 25 and 100 mg. in bottles of 50 and 500.  
Ampoules, each containing 50 mg. in 2 ml.  
in boxes of 10 and 50.

**WILLIAM R. WARNER & CO. LTD., LONDON and EASTLEIGH**

AC 362/5

**Remarkably safe and  
free from toxic effects**

**N y d r a n e**

*n*-BENZYL- $\beta$ -CHLOROPROPIONAMIDE

**in the treatment of Grand-mal  
and Psychomotor Epilepsy**

**NYDRANE is remarkable in that no toxic or unpleasant side-effects have been experienced with its use**

**NYDRANE usually makes patients more mentally alert, brighter, and more co-operative, opposing even the soporific action of any other anticonvulsant used**

**NYDRANE often successfully stabilises the more resistant cases, enabling them to lead a more normal, useful life**

**NYDRANE tablets are *colourless, odourless*, and are readily accepted and well tolerated**

Nydrane tablets each containing 500 mg. *n*-benzyl- $\beta$ -chloropropionamide, and Nydrane Co. tablets each containing 500 mg. *n*-benzyl- $\beta$ -chloropropionamide and 20 mg. Phenobarbitone, are available in bottles of 50 and 250, and tins of 1,000 tablets

Prescribable on the N.H.S.

*Literature and samples gladly sent on request*

troubled  
seas of  
the mind**

*Clinically proven*

**S P A R I N E\***

(PROMAZINE HYDROCHLORIDE)

Psychoactivity, anti-emetic action, and enhancing effect on analgesics—these are the three important properties that make Sparine so valuable in general as well as in specialist practice. Clinical experience reveals its effectiveness in controlling acute agitation, nausea and vomiting and in the management of pain. And the reports further show that Sparine offers a safe and dependable method of treatment, well tolerated by oral or parenteral administration and remarkably free from serious side-effects.

*Full details on indications and dosage are available on request.*

**P A C K S :**

*For parenteral use :*

5% solution in 2 ml. ampoules. Boxes of 10.

*For oral use :*

Tablets in bottles of 50 and 250.

## Important Books

### A PRACTICAL HANDBOOK OF PSYCHIATRY FOR STUDENTS AND NURSES

by L. Minski, *M.D., F.R.C.P.*

"The text is clear, very readable and the chapters on specialized forms of treatment are up to date and helpful. There is a clear classification of the psychoses and psychoneuroses, followed by short chapters dealing with each of the conditions outlined . . . a most helpful little volume."—*King's College Hospital Gazette.* 7/6

*Recently published, by the same  
author*

### DEAFNESS, MUTISM AND MENTAL DEFICIENCY IN CHILDREN 12/6

### THE INFANTILE CEREBRAL PALSIES

by Members of the Little Committee,  
Queen Mary's Hospital for Children,  
Carshalton. *Foreword* by Sir Francis  
Walshe. 15/-

### RESIDENTIAL SPEECH THERAPY

by C. Worster-Drought, *M.D., F.R.C.P.*

This book deals with the residential investigation and treatment of various speech disorders in children, as well as giving them some coincident education. 15/-

### MIGRAINE AND PERIODIC HEADACHE

by N. Leyton, *M.D.* 12/6

*Recently Published*

### PSYCHOLOGY AND PSYCHOLOGICAL MEDICINE FOR NURSES

## Present tense

Although concern or even anxiety over the problems of today and the challenges of tomorrow should normally act as a spur to greater effort, the over-anxious and tense individual may be overwhelmed and rendered ineffectual.

The performance of such patients will be benefited by a change in mood.

To this end, 'Mepavlon' is most useful. 'Mepavlon' helps control the irrational fears and the attendant feeling of inner tension without interfering with autonomic functions. Patients become less pre-occupied with their symptoms, increasingly co-operative and hence more accessible to psychotherapy.

'Mepavlon' is presented in tablets each 400 mgm. in containers of 30 and a dispensing pack of 250.

## Natural sleep without narcosis

Why is it that more and more doctors are prescribing MILTOWN meprobamate as a dormifacient? For several reasons—MILTOWN relieves the anxieties and tensions that prevent the natural onset of sleep—after MILTOWN, the patient lies quietly without worrying until he drifts into sleep. It thus relaxes the patient for natural sleep rather than forcing it. Furthermore, after MILTOWN, sleep is restful and usually dreamless and is not followed by hang-over effects on awakening. Where MILTOWN is used as a daytime sedative, the patient does not usually require an additional hypnotic for sleep at night.

## INSTRUCTIONS TO AUTHORS

---

Strict observation of the following requirements will save intending authors considerable time and worry, and will facilitate the publication of papers submitted.

(1) Authors should consult a current issue to see how a paper should be presented. They should consult *General Notes on the Preparation of Scientific Papers*, published for the Royal Society by the Cambridge University Press, 200 Euston Road, London, N.W.1 (price 2s. 9d. post free).

(2) The title should be brief and contain no sub-heading. This should be followed by the author's name, his qualifications and his present appointment.

(3) Omit a summary of the literature when this has been adequately summarized elsewhere.

**(4) For reasons of economy, case-histories of patients can be published only when they are of exceptional scientific interest.**

(5) Diagrams and graphs must be drawn in black ink with properly printed lettering. If they have to be redrawn by the printer, the cost, which may amount to several pounds, will be charged to the author.

(6) Tables and graphs should be kept as few as possible. If they number more than a few, the author must be prepared to pay part of their cost.

(7) Any deviation or difference that might be due to random sampling must, if it is to be discussed in its general, scientific significance, be first shown, by calculation of the appropriate probability, to be significant statistically.

(8) All references should be given at the end of the paper, in alphabetical order, and be numbered, i.e.

(1) SMITH, A. B., *J. Ment. Sci.*, 1950, **95**, 493.

(2) THOMAS, B. C., *Arch. Neur. Psychiat.*, 1955, **74**, 489.

In the body of the paper they should appear as: Smith (1), Thomas (2).

(9) When the proof arrives from the printer it is for the correction of printer's mistakes only. Larger alterations can be made only with the Editor's permission and if the author is willing to defray the cost.

(10) Each author and co-author will receive 10 reprints of his paper free of charge. If further reprints are required the order should be sent direct to Messrs. Headley Brothers, Ltd., The Invicta Press, Ashford, Kent.

(11) A paper sent to the Editor-in-Chief is, as a rule, sent to one of the panel of Referees set out on the cover of the Journal for his opinion. Papers are as a rule not rejected until a second or further opinion has been received.

In coma
