CAEP | ACMU
ROADSHOWS
Musculoskeletal Injuries in Adults & Children

In collaboration with Canadian Academy of Sport Medicine

Musculoskeletal injuries are a common and important component in the practice of emergency medicine. The MSK Roadshow will enable physicians to acquire a practical evidence-based approach to the assessment, diagnosis and treatment of musculoskeletal injuries in adults and children. Hands-on sessions using knee and shoulder injection models to practice appropriate needle placement are included.

Learning Objectives

At the end of the MSK Roadshow the participant will be able to:

- Use organized framework when examining knee joint
- Recognize frequently missed injuries/fractures on radiograph
- Investigate appropriate options for patient with back pain
- Identify advantages for splinting fractures
- Administer 'Shoulder tests' in patient with shoulder pain
- Tap 'hot joint' appropriately
- Appropriately reduce subluxation in pediatric patients
- Identify high-risk presentation from medico-legal perspective

Locations & Dates

CME in the SUN 2008 (Punta Cana)	Jan. 26–Feb 2, 2008 (Launch)
