Nutrition Research Reviews

Volume 25, 2012 ISSN: 0954-4224

Aims and Scope

Nutrition Research Reviews publishes comprehensive and challenging review articles on selected key topics in nutritional science. Authors are encouraged to take a critical approach in appraising the literature while also aiming to advance new concepts and hypotheses. The journal publishes both solicited and unsolicited articles.

Nutrition Research Reviews is published twice a year by Cambridge University Press on behalf of The Nutrition Society.

The contents page of this journal is available on the Internet before publication at www.cambridge.org/nrr

Editorial Board

Editor-in-Chief

Dr Graham C Burdge, *University of Southampton, UK*

Address for correspondence

Dr Graham C Burdge, *Editor-in-Chief, Nutrition Research Reviews, Institute of Human Nutrition / DOHaD Division, Institute of Developmental Sciences Building, Mail point 887, Southampton General Hospital, Tremona Road, Southampton SO16 6YD, UK*

Tel: +44(0)23 80798663 Fax: +44(0)23 80795255 Email: G.C.Burdge@soton.ac.uk

Deputy Editor

Dr Jos Houdijk, *Scottish Agricultural College, UK*

Editors

Dr M Ashwell, *Baldock, UK*

Dr N Binns, *NMB Consulting Limited, Ireland*

Dr D A Bender, *University College London, UK*

Dr J L Black, *Warrimoo, Australia*

Dr D Dardevet, *INRA, France*

Dr C Edwards, *Glasgow University, UK*

Dr J M Hibbert, *Morehouse School of Medicine, USA*

Dr T Hill, *Newcastle University, UK*

Dr J K Lodge, *Northumbria University, UK*

Professor H C Lukaski, *University of North Dakota, USA*

Dr S McCann, *Roswell Park Cancer Institute, USA*

Dr M Pufulete, *University of Bristol, UK*

Dr P Rogers, *University of Bristol, UK*

Professor N W Solomons, *CESSIAM, Guatemala*

Professor C M Weaver, *Purdue University, USA*

Professor M Verstegen, *Wageningen University, Netherlands*

Dr K M Younger, *Dublin Institute of Technology, Ireland*

Editorial staff

C Goodstein (*Publications Manager*), C Jackson (*Deputy Publications Manager*),

C T Hughes, L Weeks, D Owen and L King (*Publications Officers*)

The Nutrition Society has as its objective the advancement of the scientific study of nutrition and its applications to the maintenance of human and animal health.

Application of membership is invited from anyone whose work has contributed to the scientific knowledge of nutrition, whether such work has been in the laboratory, the field or the clinic, and whether experimental, clinical, agricultural or statistical in nature. There is also a student membership scheme with reduced subscriptions.

Particulars of The Nutrition Society and application forms for membership are available from The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

Nutrition Research Reviews is an international journal published biannually (June and December) by Cambridge University Press on behalf of the Nutrition Society.

Subscription information:

Volume 25 2012 (2 issues)
Internet/print package: £217/\$423 American only/€337 EU only
Internet only: £161/\$298 Americas only/€241 EU only
Print only: £204/\$395 Americas only/€311 EU only

Back volumes are available. Please contact Cambridge University Press for further information.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

US POSTMASTERS: please send address corrections to *Nutrition Research Reviews*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, New York 10994-2133.

Information for Authors: The journal publishes both solicited and unsolicited review articles. For unsolicited material, authors are asked to submit a summary of the article to the Editor-in-chief in the first instance:

Dr Graham C Burdge,
Editor-in-Chief, Nutrition Research Reviews,
Institute of Human Nutrition / DOHaD Division,
Institute of Developmental Sciences Building,
Mail point 887, Southampton General Hospital,
Tremona Road,
Southampton SO16 6YD, UK
Tel: +44(0)23 80798663
Fax: +44(0)23 80795255
Email: G.C.Burdge@soton.ac.uk

Directions to Contributors: if not printed in this issue, are available from the Editor-in-chief.

Offprints: The author (or main author) of an accepted paper will receive a free PDF of their paper and a voucher copy of the issue in which their paper has been published. Additional offprints are available for a fee and should be ordered at proof stage. **No page charges are levied by this journal.**

Copyright: As of July 2000 the copyright of all articles submitted to *Nutrition Research Reviews* are retained by the authors or their institutions. For articles prior to this date permission for reproduction of any part of the journal (text, figures, tables or other matter) in any form (on paper, microfiche or electronically) should be sought directly from the Society, at: The Publications Office, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

The impact of substituting SFA in dairy products with MUFA or PUFA on CVD risk: evidence from human intervention studies

K. M. Livingstone, J. A. Lovegrove & D. Ian Givens

Introduction	193
Burden of CVD	193
Saturated fat consumption	194
Dairy products as a source of saturated fat	194
Lowering saturated fat consumption	195
Replacing SFA with MUFA and/or PUFA	195
Production of ruminant <i>trans</i> -fatty acids	195
Scope of the review	196
Evidence from intervention studies	196
Heterogeneity of intervention studies	196
Supplementation with a source of MUFA	196
Supplementation with a source of <i>n</i> -6 PUFA	199
Supplementation with a source of <i>n</i> -3 PUFA	199
Discussion	201
Summary of the evidence	202
Gaps in the evidence	202
The milk and cheese paradox	202
Measure of CVD risk	203
Conclusions	203
Acknowledgements	204
References	204

Dietary patterns: a novel approach to examine the link between nutrition and cognitive function in older individuals

B. Allès, C. Samieri, C. Féart, M.-A. Jutand, D. Laurin & P. Barberger-Gateau

Introduction	207
Cognitive decline and nutrition: theoretical background	208
Cognitive function and <i>a priori</i> methods for dietary pattern analysis	208
The MeDi score	208
Healthy diet guidelines-based scores	213
Healthy Diet Indicator	213
Healthy Eating Index and Canadian Healthy Eating Index	213
French National Nutrition and Health Programme (Programme National Nutrition Santé) Guideline Score	213
Recommended and non-recommended Food Scores	213
General strengths and limitations of <i>a priori</i> methods	214
Perspectives with <i>a priori</i> scores in relationship with cognitive decline	214
Cognitive function and <i>a posteriori</i> methods for dietary pattern analysis	215
Principal components analysis	215
Clustering methods	215
Reduced rank regression	217
General strengths and limitations of <i>a posteriori</i> dietary patterns	217
Perspectives with <i>a posteriori</i> approaches in relationship with cognitive decline	217
General limitations in the investigation of the link between food and cognitive function in older individuals	218
Diversity of cognitive outcomes	218
Strengths and limitations of dietary assessment methods	218
Importance of midlife exposure	218
Publication bias	218
Conclusion	218
Acknowledgements	220
References	220

Peripheral signalling involved in energy homeostasis control

A. Lancha, G. Frühbeck & J. Gómez-Ambrosi

Introduction	223
--------------	-----

Signals from adipose tissue	224
Leptin	224
Adiponectin	224
Resistin	225
Acylation stimulating protein	225
TNF- α	226
IL-6	226
Visfatin	226
Visceral adipose tissue-derived serpin	227
Chemerin	227
Omentin	227
Angiotensin II	228
Sex steroids	228
Signals from the pancreas	228
Insulin	228
Glucagon	229
Pancreatic polypeptide	229
Amylin	229
Signals from the gut	229
Ghrelin	230
Glucose-dependent insulinotropic polypeptide	230
Glucagon-like peptide 1	230
Peptide YY	231
Cholecystokinin	231
Oxyntomodulin	232
Uroguanylin	232
Fibroblast growth factor 19	232
Signals from the liver	232
Insulin-like growth factor system	233
Fibroblast growth factor 21	233
Sex hormone-binding globulin	233
Signals from skeletal muscle	233
Myostatin	234
Signals from the kidney	234
Renin	234
Signals from the heart	234
Atrial natriuretic peptides	234
Signals from the thyroid gland	235
Thyroid hormones	235
Signals from bone	235
Osteopontin	235
Osteocalcin	236
Conclusions	237
Acknowledgements	237

Food combinations for cholesterol lowering	
<i>J. I. Harland</i>	
Introduction	249
Methods	250
Results and discussion	250
Macronutrient changes that reduce blood lipids	250
Foods or components that reduce blood lipids	251
Plant stanols and sterols	251
Soya protein	252
Soluble fibre	253
Tree nuts	254
Other foods or beverages that may modify blood lipids	255
Contribution that specific food combinations can make to blood lipid modification	255
Portfolio diets	255
Mechanisms of action	256

Simple food combinations	260
Conclusions	263
Acknowledgements	263
References	263
Nutrition and the HIV-associated lipodystrophy syndrome	
<i>C. R. Loonam & A. Mullen</i>	
Introduction	267
Prevalence and definition	268
Morphological alterations	271
Lipoatrophy	271
Lipohypertrophy	271
Metabolic alterations	271
Dyslipidaemia	271
Glucose abnormalities	272
Hypertension	273
Carotid artery intima thickness	273
Endothelial dysfunction	273
Atherosclerosis	273
CVD	273
Underlying molecular mechanisms	274
Altered adipocyte inflammatory status	274
Altered adipocyte functionality	275
Mitochondrial toxicity	275
Treatment	275
Pharmacological and surgical management	275
Lifestyle interventions	276
Exercise	276
