

SUBSCRIPTION RATES

Subscription rates (post free) for volume 37 (2000) of the *Journal of Applied Probability* are as follows:

US\$238.50; \$A376.35; £145.50 for libraries and institutions;

US\$79.50; \$A125.45; £48.50 for individuals belonging to a recognised scientific society.

Members of the London Mathematical Society should apply direct to the Secretary of the Society for copies of the *Journal*.

Please send all enquiries to: Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK.

We can provide back issue prices on application. Cheques, money orders, etc. should be made out to APPLIED PROBABILITY. Payment is accepted in US, UK or Australian currency or by VISA or Mastercard (phone: +44 114 222 3922; fax: +44 114 272 9782).

NOTES FOR CONTRIBUTORS

Papers published in the *Journal* are of two kinds:

(1) *research papers* not exceeding 20 printed pages;

(2) *short communications* of a few printed pages in the nature of notes or brief accounts of work in progress.

Review papers, longer research papers and letters to the editor are published in *Advances in Applied Probability*, a companion journal. (Note: Letters relating specifically to papers which have appeared in the *Journal of Applied Probability* will continue to appear in the *Journal*.)

The editors may publish accepted papers in either journal, according to the space available, in order to meet the 15-month deadline in publication referred to below.

Submission of papers

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Papers will not be reprinted without the written permission of the Trust. It is the policy not to accept for publication papers which cannot appear in print within 15 months of the date of receipt of the final version. Fifty reprints of each paper will be provided free; additional reprints are available at cost.

Papers should be written in English or French; papers in other languages may be accepted by the editors, but will appear (subject to the author's agreement) in English or French translation. Please supply *three* double-spaced hard copies, at least one of which should be printed on one side of the paper only. The paper should include: (1) a short abstract of approximately 4–10 lines giving a non-mathematical description of the subject matter and results; (2) list of keywords detailing the contents for the purpose of computerised information retrieval; (3) primary and secondary classifications according to the 2000 Mathematics Subject Classification.

Authors are advised to consult *The Author's Guide to the Applied Probability Journals* when preparing papers for submission. A copy of this guide may be obtained free of charge from the Applied Probability Office. An updated version of the guide, with LATEX style files, can be obtained in electronic form on <http://www.appliedprobability.org> or on PC-compatible disk from the Applied Probability Office.

For efficiency in processing, authors are requested to send all submissions to the Applied Probability Office in Sheffield, rather than to individual editors. The address for all submissions is:

**Executive Editor, Applied Probability, School of Mathematics and Statistics,
University of Sheffield, Sheffield S3 7RH, UK.**

COPYRIGHT

The copyright of all published papers shall be vested in the Trust. When a paper is accepted for publication, the Trust requests the author(s) to sign a form assigning copyright to the Trust. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$00.70 per copy, plus .20 per page is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021-9002/00 \$00.70+ .20.

Research Papers

- 925 GEORGIOS SKOULAKIS. A general shock model for a reliability system
- 936 GRISELDA DEELSTRA, MARTINO GRASSELLI AND PIERRE-FRANÇOIS KOEHL. Optimal investment strategies in a CIR framework
- 947 DAVID HEATH AND MARTIN SCHWEIZER. Martingales versus PDEs in finance: an equivalence result with examples
- 958 W. P. McCORMICK AND Y. QI. Asymptotic distribution for the sum and maximum of Gaussian processes
- 972 JESPER LUND PEDERSEN. Discounted optimal stopping problems for the maximum process
- 984 GUY LATOUCHE AND P. G. TAYLOR. Level-phase independence for $GI/M/1$ -type Markov chains
- 999 M. C. BHATTACHARJEE, A. M. ABOUAMMOH, A. N. AHMED AND A. M. BARRY. Preservation results for life distributions based on comparisons with asymptotic remaining life under replacements
- 1010 BONG DAE CHOI AND BARA KIM. Sharp results on convergence rates for the distribution of $GI/M/1/K$ queues as K tends to infinity
- 1020 HAIJUN LI AND SUSAN H. XU. On the dependence structure and bounds of correlated parallel queues and their applications to synchronized stochastic systems
- 1044 STEPHEN M. KRONE AND CLAUDIA NEUHAUSER. A spatial model of range-dependent succession
- 1061 C. DOUGLAS HOWARD. Lower bounds for point-to-point wandering exponents in Euclidean first-passage percolation
- 1074 LARS HOLDEN. Convergence of Markov chains in the relative supremum norm

Short Communications

- 1084 DAVID ASSAF AND ESTER SAMUEL-CAHN. Simple ratio prophet inequalities for a mortal with multiple choices
- 1092 OLIVIER BRUN AND JEAN-MARIE GARCIA. Analytical solution of finite capacity $M/D/1$ queues
- 1099 JI HWAN CHA. On a better burn-in procedure
- 1104 TILMANN GNEITING. Power-law correlations, related models for long-range dependence and their simulation
- 1110 JOHN HAIGH AND MARKUS ROTERS. Optimal strategy in a dice game
- 1117 OFFER KELLA. Non-product form of two-dimensional fluid networks with dependent Lévy inputs
- 1123 BAHA-ELDIN KHALEDI AND SUBHASH KOCHAR. Some new results on stochastic comparisons of parallel systems
- 1129 SUN-TSUNG KIM. A use of the Stein–Chen method in time series analysis
- 1137 LEV B. KLEBANOV, STEFAN MITTNIK, SVETLOZAR T. RACHEV AND VLADIMIR E. VOLKOVICH. A new representation for the characteristic function of strictly geo-stable vectors
- 1143 DAMIEN LAMBERTON AND L. C. G. ROGERS. Optimal stopping and embedding
- 1149 DAVID McDONALD AND FRANÇOIS THÉBERGE. Cell loss probability for $M/G/1$ and time-slotted queues
- 1157 F. P. MACHADO AND S. YU. POPOV. One-dimensional branching random walks in a Markovian random environment
- 1164 MARCO MUSELLI. New improved bounds for reliability of consecutive- k -out-of- $n:F$ systems
- 1171 DIDIER PIAU. Addendum to ‘Quasi-renewal estimates’ for modelling DNA replication
- 1173 L. C. G. ROGERS. Evaluating first-passage probabilities for spectrally one-sided Lévy processes
- 1181 GRAHAM V. WEINBERG. Stein factor bounds for random variables
- 1188 Index
