JOURNAL OF PLASMA PHYSICS

https://doi.org/10.1017/S0022377800000829 Published online by Cambridge University Press

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge CB3 9EW, England

ASSOCIATE EDITORS

PROF. D. BERSHADER

Department of Aeronautics and Astronautics, Stanford University, Stanford, California 94305, *U.S.A.*

PROF. F. D. KAHN

Department of Astronomy, University of Manchester, Manchester M13 9PL, England

PROF. W. B. THOMPSON

Department of Physics, University of California, La Jolla, California 92093, *U.S.A.*

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

Copying

This journal is registered with the Copyright Clearance Center, 21 Congress St., Salem, Mass. 01970. Organizations in the U.S.A. who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of U.S. copyright law) subject to payment to C.C.C of the per copy fee of $05.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022–3778/83/2828–0001 $05.00.

ISI Tear Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, U.S.A., is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from the Cambridge or New York offices of the Cambridge University Press.

JOURNAL OF PLASMA PHYSICS (ISSN 0022-3778) is published once every two months in February, April, June, August, October and December, by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU and 32 East 57th Street, New York, N.Y. 10022.

Three parts form a volume. The subscription price (which includes postage) of Volumes 29 and 30 (1983) is £67.50 net per volume (US $177.00 in the U.S.A. and Canada) for institutions; £33.75 (US $88.50) per volume for individuals. Single parts cost £25.00 each (US $66.50 in the U.S.A. and Canada) plus postage. All orders must be accompanied by payment.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, N.Y., and at additional mailing offices. *POSTMASTER*: send address changes in U.S.A. and Canada to Cambridge University Press, 32 East 57th Street, New York, N.Y. 10022.

CONTENTS TO VOLUME 29

PART 1 FEBRUARY 1983

On the influence of the Hall effect on the spectrum of the ideal magneto-hydrodynamic cylindrical pinch. U. SCHAPER *page* 1

Excitation of electromagnetic quasi-perpendicular ion cyclotron waves in collisional plasmas. B. S. MILIĆ and N. R. BRAJUŠKOVIĆ 21

Effect of longitudinal electric fields on electrostatic electron cyclotron waves. A. L. BRINCA and K. B. DYSTHE 35

Theory of runaway electrons in a Lorentz plasma. B. K. SHIVAMOGGI 41

The simulation of plasma double-layer structures in two dimensions. J. E. BOROVSKY and G. JOYCE 45

Finite-beta and curvature drift effects on drift waves near the plasma-pause. S. MIGLIUOLO and V. L. PATEL 85

Stabilization of electrostatic flute mode due to hot electron ring and RF field. H. SANUKI 99

Variational principles of guiding centre motion. R. G. LITTLEJOHN 111

Drift dissipative instabilities of electron-acoustic and lower-hybrid waves. M. MOHAN and M. Y. YU 127

Magnetic and temperature effects on the energy loss rate of test ions. M. H. A. HASSAN and P. H. SAKANAKA 131

Self-similar and asymptotic solutions for a one-dimensional Vlasov beam. J. R. BURGAN, M. R. FEIX, E. FIJALKOW and A. MUNIER 139

On the cross-field flux of heat in a magnetoplasma. L. C. WOODS 143

The orbits of electrons and ions in a rotating magnetic field. W. N. HUGRASS and I. R. JONES 155

Two-dimensional toroidal MHD equilibria of arbitrary cross-section. F. F. CAP 173

PART 2 APRIL 1983

Electrostatic modes in a magnetized plasma with a longitudinal density gradient. J. E. MAGGS and G. J. MORALES 177

On reflexion and trapping of upper-hybrid waves. E. MJØLHUS 195

Whistler-mode propagation at frequencies near the electron gyro-frequency. S. S. SAZHIN 217

Magnetosonic wave propagation in the mode conversion regime. Y. LAPIERRE 223

https://doi.org/10.1017/S0022377800000829 Published online by Cambridge University Press

The effect of microscale random Alfvén waves on the propagation of large-scale Alfvén waves. T. Namikawa and H. Hamabata 243

Nonlinear interaction of waves in sharply bounded plasmas. T. Lindgren 255

Notes on the stability problem for inhomogeneous equilibria. K. R. Symon 275

Stability of an astrophysical plasma near the onset of electron runaway. J. S. Kaastra 287

Electrical conductivity for radio-frequency fields in strongly magnetized plasmas with density fluctuations. Y. S. Sayasov and C. P. Ritz 299

Distortion of the distribution function of weakly RF heated minority ions in a tokamak plasma. D. Anderson 317

The thermal self-focusing of a wave beam in an underdense plasma. Part 1. The wave spectrum. M. J. Giles 325

Corrigendum: Nonlinear equilibrium and stability analysis of rippled, partially neutralized, magnetically focused electron beams. S. Cuperman and F. Petran 359

Part 3 June 1983

Oscillations and analysis of stability for pinch systems. B. E. Meierovich 361

Propagation of electromagnetic waves in a warm plasma-filled cylindrical waveguide in the presence of an external magnetic field. S. K. Ghosh and S. P. Pal 383

Dissipative instabilities of magnetic neutral layers with velocity shear. M. Dobrowolny, P. Veltri and A. Mangeney 393

Linear and nonlinear modified electron-acoustic waves. M. Y. Yu and P. K. Shukla 409

Deflagrations and discontinuities in laser-produced plasmas. G. J. Pert 415

Electron whistler mode instability in an inhomogeneous thermal plasma in the presence of an inhomogeneous beam of suprathermal electrons. H. A. Shah and V. K. Jain 439

The thermal self-focusing of a wave beam in an underdense plasma. Part 2. Energy transfer to ions. M. J. Giles 449

The thermal self-focusing of a wave beam in an underdense plasma. Part 3. Linear convection. M. J. Giles 465

The thermal self-focusing of a wave beam in an underdense plasma. Part 4. Quadratic nonlinear effects. M. J. Giles 491

The thermal self-focusing of a wave beam in an underdense plasma. Part 5. Cubic nonlinear effects. M. J. Giles 513

Anisotropy in MHD turbulence due to a mean magnetic field. J. V. Shebalin, W. H. Matthaeus and D. Montgomery 525
