

**Nutrition Research Reviews**, published annually by Cambridge University Press, presents authoritative and critical reviews of research that advance new concepts and encourage fresh thinking on a variety of nutritional problems. The journal's main objective is to encourage the exchange of fundamental ideas on nutritional well-being. The subscription (excluding VAT) to volume 9, 1996, is £50 including postage (US \$90 in USA, Canada and Mexico).

**The Proceedings of the Nutrition Society**, published by Cambridge University Press, in part record meetings of the Symposium type, at which experts in a particular field are invited by Council to make contributions on specific parts of it and at which general discussion follows these invited contributions. The meetings also include sessions at which papers are communicated by members and others on original work. It is proposed at present to publish summaries of the papers read at each meeting, each communication being recorded in the Society's *Proceedings* by means of an abstract not exceeding in length 400 words or the equivalent space in print. The *Proceedings* are published three times a year.

The subscription (excluding VAT) to the *Proceedings* is £144.00 (US \$264.00 in USA, Canada and Mexico). Single issues are £53.00 (US \$98.00 in the USA, Canada and Mexico) each; postage extra.

**Copying.** This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of the US copyright law) subject to payment to C.C.C. of the per-copy fee of \$11.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0007-1145/96 \$11.00+.10. Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

*ISI Tear Sheet Service*, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

Information of *The British Journal of Nutrition* and all other Cambridge journals is available on <http://www.cup.cam.ac.uk/> and in North America on <http://www.cup.org/>.

VOL. 75 NO. 6 JUNE 1996

The  
British Journal  
of Nutrition

## CONTENTS

**Body composition assessment**

Body composition assessment in lean and normal-weight young women.  
*G. Mikael Fogelholm, T. Katriina Kukkonen-Harjula, Harri T. Sievanen, Pekka Oja & Ilkka M. Vuori* 793-802

Dual-energy X-ray absorptiometry for the measurement of gross body composition in rats. *Susan A. Jebb, Stephen W. Garland, Graham Jennings & Marinos Elia* 803-809

**Effect of protein restriction on rat bone**

Effect of protein restriction on the messenger RNA contents of bone-matrix proteins, insulin-like growth factors and insulin-like growth factor binding proteins in femur of ovariectomized rats. *Yusuke Higashi, Asako Takenaka, Shin-ichiro Takahashi & Tadashi Noguchi* 811-823

**Dietary threonine and oxidation in pigs**

*In vivo* threonine oxidation in growing pigs fed on diets with graded levels of threonine. *N. Le Floc'h, C. Obléd & B. Seve* 825-837

**Poultry nutrition**

Response of broilers to graded levels of microbial phytase added to maize-soyabean-meal-based diets containing three levels of non-phytate phosphorus. *E. T. Kornegay, D. M. Denbow, Z. Yi & V. Ravindran* 839-852

Dietary lysine deficiency greatly affects muscle and liver protein turnover in growing chickens. *S. Tesseraud, R. Peresson, J. Lopes & A. M. Chagneau* 853-865

Interaction between nutrition and *Eimeria acervulina* infection in broiler chickens: development of an experimental infection model. *C. Adams, H. A. Vahl & A. Veldman* 867-873

Interaction between nutrition and *Eimeria acervulina* infection in broiler chickens: diet compositions that improve fat digestion during *Eimeria acervulina* infection. *C. Adams, H. A. Vahl & A. Veldman* 875-880

**Dietary inulin and intestinal mucin in the rat**

Intestinal mucin distribution in the germ-free rat and in the heteroxenic rat harbouring a human bacterial flora: effect of inulin in the diet. *N. Fontaine, J. C. Meslin, S. Lory & C. Andrieux* 881-892

**Bioavailability of calcium from various sources**

Bioavailability of calcium of fresh cheeses, enteral food and mineral water. A study with stable calcium isotopes in young adult women. *W. van Dokkum, V. de La Guéronnière, G. Schaafsma, C. Bouley, J. Luten & C. Latgé* 893-903

**Iron intake and serum ferritin levels**

Relationship between dietary iron intake, corrected for diet reporting error, and serum ferritin in Danish women aged 35-65 years. *Berit Lilienthal Heitmann, Nils Milman & Gitte Laub Hansen* 905-913

**Vitamin and mineral interactions**

Interactions in indices of vitamin A, zinc and copper status when these nutrients are fed to rats at adequate and increased levels. *P. R. Sundaresan, Susan M. Kaup, Paddy W. Wiesenfeld, Stuart J. Chirtel, Susan C. Hight & Jeanne I. Rader* 915-928

**Cobalamin deficiency**

Accumulation of methylmalonic acid caused by vitamin B<sub>12</sub>-deficiency disrupts normal cellular metabolism in rat liver. *Shigeki Toyoshima, Fumio Watanabe, Hisako Saido, Ewa H. Pezacka, Donald W. Jacobsen, Kazutaka Miyatake & Yoshihisa Nakano* 929-938

**Dietary fat and vitamin E absorption**

Vitamin E incorporated into a very-low-fat meal is absorbed from the intestine of young rats. *Elizabeth J. Brink, Edward Haddeman & Lilian B. M. Tijburg* 939-948
