Publisher: Katy Christomanou

Special sales and supplements:

This Journal accepts relevant advertisements and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplements on behalf of academic and corporate collaborators. Please contact Katy Christomanou at the Cambridge address for further details. E-mail: kchristomanou@cambridge.org

Subscription information:

British Journal of Nutrition is an international journal published by Cambridge University Press on behalf of The Nutrition Society. The twelve issues starting January 2010 comprise Volume 103, the twelve issues starting July 2010 comprise Volume 104.

Annual subscription rates:

Volumes 103/104 (24 issues):
Internet/print package £954/\$1860/€1528
Internet only: £803/\$1566/€1283
Print only: £909/\$1772/€1477

Any **supplements** to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Back volumes are available. Please contact Cambridge University Press for further information.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

US POSTMASTERS: please send address corrections to *British Journal of Nutrition*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, New York 10994-2133.

Directions to Contributors are available from the Society at the address below or can be found on the Society's website at <http://www.nutritionociety.org> (an abbreviated Notes for Authors can be found inside the back cover).

Offprints: The author (or main author) of an accepted paper will receive a copy of the PDF file and a voucher copy of the issue in which their paper has been published. There will be an option to purchase paper offprints, these should be ordered at proof stage. No page charges are levied by this journal.

Copyright: As of 1 July 2000 the copyright of all articles submitted to *British Journal of Nutrition* are retained by the authors or their institutions. For articles prior to this date permission for reproduction of any part of the journal (text, figures, tables or other matter) in any form (on paper, microfiche or electronically) should be sought directly from the Society, at: The Publications Office, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, Hammersmith, London W6 7NJ, UK.

This journal is printed on acid-free paper from renewable sources. Printed in the UK by Bell & Bain Ltd., Glasgow.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information.

British Journal of Nutrition is covered in Current Contents®/Agriculture, Biology & Environmental Sciences, SciSearch®, Research Alert®, Current Contents®/Life Sciences, Index Medicus® (MEDLINE®), AGRICOLA®, CAB Abstracts™, Global Health, BIOSIS® Database, EMBASE/Excerpta Medica and Elsevier BIOBASE/Current Awareness in Biological Sciences, CINAHL, and Chemical Abstracts Service.

INSPIRING QUALITY OF CARE

University Hospitals Leuven (Belgium) has a reputation as a European centre for cutting-edge medicine, training and clinical research. Ongoing investment in our human, scientific and technical resources ensures our ability to maintain and further consolidate this international position of expertise in a range of medical disciplines.

In symbiosis with our role as part of the university, patient care is subject to ongoing critical reflection and assessment, and UZ Leuven acts in dialogue with the Biomedical Sciences Group at KULeuven to contribute to further developments in the training of medics and paramedics. Within a complex organisational structure with more than 8,000 highly motivated employees, quality, individually tailored patient care, multidisciplinary collaboration, professionalism, innovation and continuing training are of central importance.

We currently have an opportunity (m/f) for the

ENDOCRINOLOGY – CLINICAL NUTRITION SERVICE

SCIENTIFIC RESEARCH COORDINATOR 100% (ref. 27/2024)

WHAT YOUR JOB INVOLVES: • You play an important role as an intermediary between UZ Leuven, KULeuven and KHLeuven (hospital, university and university college) • You work with the clinical manager on a policy on nutrition/obesity in UZ Leuven and translate this into concrete action plans in the educational and clinical fields • You are responsible for organising in-service training for the clinical nutritionists in UZ Leuven • You take initiatives relating to the organisation of and introduction of innovations in nutritional education within KHLeuven and KULeuven (bachelor and master degree) • You work with the clinical manager of the Endocrinology Service, the head of the nutrition department at UZ Leuven, the Biomedical Sciences Group at KULeuven and the Nutrition and Dietary Science Department at KHLeuven.

WHAT WE ARE LOOKING FOR: • You have an educational background in nutrition and have gained a doctorate in this field • You have publications at international level and relevant educational experience • You have communication and teaching skills which enable you to give advice in a way that is inspiring • Your approach is characterised by critical reflection, strong analytical powers and a highly developed ability to synthesise • You can function self-reliantly in a context of multidisciplinary collaboration.

Interested? If you believe you match this profile and would like to meet the challenges outlined above, we invite you to seek additional information by contacting Prof. Chantal Mathieu, Medical Head of the Endocrinology Department, chantal.mathieu@uzleuven.be or Dr. Bart Van Der Schueren, Endocrinology Department, bart.vanderschueren@uzleuven.be. Applications for the position can be submitted via <http://www.kuleuven.be/personeel/jobsite/vacancies.html> Please react before 15 09 2010.

In professional hands

(Contents continued from back cover)

- Improvement in nutrition-related knowledge and behaviour of urban Asian Indian school children: findings from the 'Medical education for children/Adolescents for Realistic prevention of obesity and diabetes and for healthy ageing' (MARG) intervention study.
P. Shah, A. Misra, N. Gupta, D. K. Hazra, R. Gupta, P. Seth, A. Agarwal, A. K. Gupta, A. Jain, A. Kulshreshtha, N. Hazra, P. Khanna, P. K. Gangwar, S. Bansal, P. Tallikoti, I. Mohan, R. Bhargava, R. Sharma, S. Gulati, S. Bharadwaj, R. M. Pandey & K. Goel 427–436
- Effect of multiple-micronutrient supplementation on maternal nutrient status, infant birth weight and gestational age at birth in a low-income, multi-ethnic population.
L. Brough, G. A. Rees, M. A. Crawford, R. H. Morton & E. K. Dorman 437–445
- Dietary Surveys and Nutritional Epidemiology***
- Selecting informative food items for compiling food-frequency questionnaires: comparison of procedures.

British Journal of Nutrition

Directions to Contributors - Concise Version

(Revised August 2007)

The *British Journal of Nutrition* is an international peer-reviewed journal that publishes original papers, review articles, technical notes and short communications in English in all branches of nutritional science. **Prospective authors should note that they (or their institutions) now retain the copyright of their material published in the *British Journal of Nutrition*.** As a contributor you are asked to follow the guidelines set out below. For detailed information on the presentation of the technical content of your paper please see the full version of the **Directions to Contributors**, which can be downloaded from the Nutrition Society website (<http://www.nutrition-society.org>). Prospective authors may also contact the Publications Office directly on + 44 (0)20 7605 6555 (telephone), +44 20 7602 1756 (fax), or edoffice@nutsoc.org.uk (email).

Papers should be accompanied by a statement to the effect that the conditions laid down in the full Directions to Contributors are accepted. The statement should affirm that the submission represents original work that has not been published previously and which is not currently being considered by another journal. It should also confirm that each author has seen and approved the contents of the submitted paper. At the time of acceptance the authors should provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer). The Licence to Publish is available on the Nutrition Society website (<http://www.nutrition-society.org>). All relevant financial interests should be declared.

Text. Papers should be submitted with 1.5 line spacing and margins of at least 2 cm on each side. Text should be printed without underlining, bold or italics (except for scientific names). Standard abbreviations (e.g. Fig. and Figs.) and SI units should be used. **Typescripts can be submitted as Word, WordPerfect, EPS, Text, Postscript or RTF files. A Word processing format is required for production purposes once papers have been accepted. When substantial revisions are required to typescripts, authors are given the opportunity to do this once only, the need for any further changes should at most reflect any minor issues.**

Title Page. The first page should include a concise, informative title together with the names and addresses of the authors. A contact name for correspondence should be given and telephone, fax and email addresses provided. Authors should supply three or four key words or phrases (each containing up to three words). A short title of up to 45 characters is required as a running head.

Abstract. Each paper should commence with an accurate and informative abstract, written as a single paragraph. It should be complete in itself and intelligible without reference to the text or figures, and should not exceed 250 words.

Tables. Tables should be reduced to the simplest form, and should not duplicate information in the text or figures. They should be typed on separate pages, one page for each Table, at the end of the article and carry headings describing their content.

Illustrations. The original illustrations should accompany the submitted typescript. Text figures, line drawings, computer-generated figures and graphs should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they clearly contribute to the text. All figures should be numbered and legends should be provided.

Note that authors will be charged 350 GBP for the publication of colour figures. Authors from countries entitled to free journal access through HINARI will be exempt from these charges.

References. References should be based on the numbered (Vancouver) system. **When an article has more than ten authors, only the names of the first three should be given followed by *et al.*; give abbreviated journal titles and conform to the following styles:**

- Goel V, Cheema SK, Agellon LB, Ooraikul B & Basu TK (1999) Dietary rhabarb (*Rheum rhabarbarum*) stalk fibre stimulates cholesterol 7 α -hydroxylase gene expression and bile acid excretion in cholesterol-fed C57BL/6J mice. *Br J Nutr* **81**, 65–71.
- Jenkins DJ, Kendall CW, Marchie A, *et al.* (2003) The effect of combining plant sterols, soy protein, viscous fibres, and almonds in treating hypercholesterolemia. *Metabolism* **52**, 1478–1483.
- Brandtzaeg P (2003) Role of local immunity and breast-feeding in mucosal homeostasis and defence against infections. In *Nutrition and Immune Function*, pp. 273–320 [PC Calder, CJ Field and HS Gill, editors]. Wallingford, Oxon: CAB International.
- Stock M & Rothwell NJ (1982) *Obesity and Leanness: Basic Aspects*. London: John Libbey.

Citations should be numbered consecutively in the order in which they first appear in the text using superscript Arabic numerals in parentheses, e.g. 'The conceptual difficulty of this approach has recently been highlighted^(1,2–4). If a reference is cited more than once the same number should be used each time.

Referees. Authors are asked to submit the names of up to four scientists who would be well-qualified to review the paper; however, no more than one such reviewer will be used. The email addresses and institutions of the named reviewers should be given.

Proofs. PDF page proofs will be emailed to authors for checking, and should be returned within 3 days (by fax or Express mail) to the BJN Production Editor, Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU, UK; fax +44 1223 325802, email bjnproduction@cambridge.org

Typescripts. The *British Journal of Nutrition* operates an on-line submission and reviewing system (eJournalPress). **Authors should submit to the following address:** <http://bjn.msubmit.net/> If any difficulties are encountered please contact the Publications Office (details above) immediately.

Contents

Horizons in Nutritional Science

- Avoidance of vitamin D deficiency in pregnancy in the United Kingdom: the case for a unified approach in National policy.
E. Hyppönen & B. J. Boucher 309–314

Invited Commentary

- Vitamin D in the spotlight – time for urgent action?
S. Lanham-New 315–317

Short Communication

- The incorporation of marine *n*-3 PUFA into platelets and adipose tissue in pre- and postmenopausal women: a randomised, double-blind, placebo-controlled trial.
P. M. Witt, J. H. Christensen, M. Ewertz, I. V. Aardestrup & E. B. Schmidt 318–325

Molecular Nutrition

- Molecular mechanism of green microalgae, *Dunaliella salina*, involved in attenuating balloon injury-induced neointimal formation.
M.-J. Sheu, H.-C. Cheng, Y.-C. Chien, P.-Y. Chou, G.-J. Huang, J.-S. Chen, S.-Y. Lin & C.-H. Wu 326–335
- Quercetin supplementation and its effect on human monocyte gene expression profiles *in vivo*.
I. Boomgaarden, S. Egert, G. Rimbach, S. Wolffram, M. J. Müller & F. Döring 336–345

Metabolism and Metabolic Studies

- Effects of fish oil and starch added to a diet containing sunflower-seed oil on dairy goat performance, milk fatty acid composition and *in vivo* Δ 9-desaturation of [13 C]vaccenic acid.
L. Bernard, J. Mouriot, J. Rouel, F. Glasser, P. Capitan, E. Pujos-Guillot, J.-M. Chardigny & Y. Chilliard 346–354
- Intestinal tumours, colonic butyrate and sleep in exercised Min mice.
L. Basterfield & J. C. Mathers 355–363
- Effects of oat bran, processed to different molecular weights of β -glucan, on plasma lipids and caecal formation of SCFA in mice.
T. Immerstrand, K. E. Andersson, C. Wange, A. Rascon, P. Hellstrand, M. Nyman, S. W. Cui, B. Bergenståhl, C. Trägårdh & R. Öste 364–373
- Different digestion of caprine whey proteins by human and porcine gastrointestinal enzymes.
E. K. Eriksen, H. Holm, E. Jensen, R. Aaboe, T. G. Devold, M. Jacobsen & G. E. Vegarud 374–381
- Exposure to zinc deficiency in fetal and postnatal life determines nitric oxide system activity and arterial blood pressure levels in adult rats.
A. Tomat, R. Elesgaray, V. Zago, H. Fasoli, A. Fellet, A. M. Balaszczuk, L. Schreier, M. Á. Costa & C. Arranz 382–389

Microbiology

- Lactobacillus plantarum* inhibits intestinal epithelial barrier dysfunction induced by unconjugated bilirubin.
Y. Zhou, H. Qin, M. Zhang, T. Shen, H. Chen, Y. Ma, Z. Chu, P. Zhang & Z. Liu 390–401

Human and Clinical Nutrition

- Effect of pomegranate seed oil on hyperlipidaemic subjects: a double-blind placebo-controlled clinical trial.
P. Mirmiran, M. R. Fazeli, G. Asghari, A. Shafiee & F. Azizi 402–406
- Relative glycaemic impact of customarily consumed portions of eighty-three foods measured by digesting *in vitro* and adjusting for food mass and apparent glucose disposal.
J. A. Monro, A. Wallace, S. Mishra, S. Eady, J. A. Willis, R. S. Scott & D. Hedderley 407–417
- Effects of peanut processing on body weight and fasting plasma lipids.
F. McKiernan, P. Lokko, A. Kuevi, R. L. Sales, N. M. B. Costa, J. Bressan, R. C. G. Alfenas & R. D. Mattes 418–426
