

## ABSTRACTS OF COMMUNICATIONS

Conservatoire National des Arts et Métiers, Paris

13-16 JULY 1994

## LE SYMPOSIUM LAVOISIER

- Feeding cholesterol blunts the proliferative effect of dietary guar gum. *M. M. A. K. Khatrak & J. C. Mathers* 2A
- The role of glucose and pyruvate in the nutrition of preimplantation mouse embryos. *K. L. Martin & H. J. Leese* 3A
- Free and total carnitine concentrations in continuous ambulatory peritoneal dialysis patients. *D. P. J. Kirby, D. Constantin-Teodosiu, A. H. Short, R. P. Burden, A. G. Morgan & P. L. Grenhaff* 4A
- Incorporation of fatty acids into macrophage lipids *in vitro*. *P. Yaqoob, E. A. Newsholme & P. C. Calder* 5A
- Mechanisms underlying induction of fatty acid binding protein genes by peroxisome proliferators along the small intestine. *A. Mallordy, P. Besnard, H. Poirier, I. Njot & H. Carlier* 6A
- Effect of animal or vegetable protein intakes (100, 200 or 300 g casein or soya-bean protein/kg) on membrane hepatocyte very-low-density lipoprotein (VLDL) receptors. *J. Prost, D. Ait-Yahia, M. L. Suarez-Rey, Z. Arribi & J. Belleville* 7A
- Modification in the lipolytic response to  $\beta_1$ ,  $\beta_2$  and  $\beta_3$ -adrenergic agonists after the administration of a non-selective  $\beta$ -agonist. *J. A. Martinez, M. A. Garcia-Calonge, E. Simon, A. S. Del Barrio & M. P. Portillo* 8A
- The physiological function of  $\beta_1$ - and  $\beta_3$ -adrenoceptors in rat brown adipocytes. *C. Atgí, F. D'Allaire, P.-M. Simard, P. Mauriège & L. J. Bukowiecki* 9A
- Alpha-2 adrenergic stimulation and resting energy expenditure in menopausal women before and during oestrogen therapy. *G. Del Rio, R. Menozzi, C. Zandomenighi, M. G. Venneri, G. Zizzo & A. Velardo* 10A
- Evidence of an association between blunted postprandial thermogenesis and insulin resistance. *C. Macor, E. Rella, S. Favro, R. Vettor & G. Federspil* 11A
- Insulin resistance in human pregnancy: a comparison of *in vivo* and *in vitro* measurement techniques. *K. Stanley, D. Mangnall, C. Bruce & R. B. Fraser* 12A
- Assessment of physical fitness by submaximal exercise. *M. Cox, N. R. Gibson, M. Khalouha, K. Mills & P. J. Pacy* 13A
- Physical Activity Level in free-living persons measured by doubly-labelled water. *A. E. Black & T. J. Cole* 14A
- $^2\text{H}$  and  $^{18}\text{O}$  natural abundance variations and their consequences in the doubly-labelled water measurement of energy expenditure. *P. Ritz, T. J. Cole & W. A. Coward* 15A
- The measurement of energy expenditure in young children by the minute-by-minute heart-rate method: a validation study. *J. A. Payne, A. C. Payne, N. R. Belton, M. M. Rollo & S. Downie* 16A
- Components of total energy expenditure during refeeding in the rat. *P. C. Even, A. Pele & S. Nicolaidis* 17A
- Components of heat production in pigs: effects of stage of growth and genotype. *Y. Le Czler, S. Dubois & J. Noblet* 18A
- Measuring energy expenditure in Polar explorers. *P. Ritz, W. A. Coward, T. J. Cole, M. A. Stroud & M. B. Sawyer* 19A
- Changes in energy expenditure, glucose-induced thermogenesis and protein turnover during short-term head-down-tilt conditions. *K. J. Acheson, J. Décombaz, C. Pigué-Welsch, F. Montigon, B. Decarli, I. Bartholdi & E. B. Fern* 20A
- Energy expenditure in lean and obese prepubertal 9-10 year old children. *J. P. Delany, G. A. Bray, D. W. Harsha, J. Kime & L. Melancon* 21A
- Total energy expenditure, net protein, carbohydrate and fat oxidation in pregnant and postpartum women. *N. Butte, J. Hopkinson, J. Moon, A. Adolph, M. Puyau & F. Vohra* 22A
- Total energy expenditure, basal metabolic rate and physical activity plus thermogenesis in a group of free-living elderly men aged over 75 years. *N. J. Fuller, W. A. Coward, M. B. Sawyer, P. Paxton & M. Elia* 23A
- Total and activity-related heat production of group-confined pigeons as affected by gender and space. *J. Gorssen, P. Koene, J. W. Schrama & F. Van der Veen* 24A
- Food consumption and energy metabolism of *Spodoptera littoralis* Boisduval (Lepidoptera, Noctuidae), feeding on an aflatoxin-containing diet. *M. Wedenig, K. Crailsheim & M. M. Sadek* 25A
- Shivering is the main thermogenic mechanism in cold-exposed newborn pigs. *D. Berthon, P. Herpin & J. Le Dividich* 26A
- Resting metabolic expenditure in patients with end-stage liver insufficiency. *J. C. Manelli, C. Badetti, V. Bernini, J. di Costanzo, C. Champeau & V. Pellegrin* 27A
- Cold- and diet-induced thermogenesis in the pre-ruminant kid goat and lamb. *M. R. Sanz Sampelayo, I. Prieto, J. Fonolla, F. Gil Extremera & J. Boza* 28A
- Physiological interactions between proliferating lymphocytes and adjacent adipose tissue. *C. M. Pond & C. A. Mattacks* 29A
- The new  $\beta_3$ -agonist CL 316 243 decreases plasma glucose levels and markedly stimulates glucose uptake in brown and white adipose tissues. *L. J. Bukowiecki, X. Liu, C. Atgí & F. Pérusse* 30A
- Seasonal changes of mass and lipid droplet size in brown adipose tissue of the Pygmy shrew (*Sorex minutus*). *R. M. McDevitt & J. F. Andrews* 31A
- Effect of maternal glucose infusion during late gestation on brown adipose tissue and liver iodothyronine 5'-deiodinase activity in the newborn lamb. *L. Clarke, M. A. Lomax & M. E. Symonds* 32A
- Variation of energy metabolism among ruminant muscles: low glucose utilization potential by oxidative muscles. *F. Bornes, J. F. Hocquette, M. Balage, P. Ferre, B. Picard & M. Vermorel* 33A
- Mechanisms underlying muscle insulin resistance in late pregnancy. *M. J. Holness & M. C. Sugden* 34A
- Synthesis and degradation of hepatic glycogen in uraemic rats. *Z. Bakkour, D. Laouari & C. Kleinknecht* 35A
- Differential handling of substrates in rat strains that vary in their sensitivity to dietary obesity. *H. Nagase, D. A. York & G. A. Bray* 36A

CONTENTS

SYMPOSIUM PROCEEDINGS

Conservatoire National des Arts et Métiers, Paris  
13–16 JULY 1994

LE SYMPOSIUM LAVOISIER

Introductory Notes. *Andrew Prentice*

PAGE

1–8

CELLULAR FUEL SELECTION

Fuel selection at the level of mitochondria in mammalian tissues. <i>Richard M. Denton &amp; James G. McCormack</i>	11–22
Fatty acid transport and fatty acid-binding proteins. <i>Jacques H. Veerkamp</i>	23–37
Fuel selection in brown adipose tissue. <i>Paul Trayhurn</i>	39–47
Cellular aspects of fuel mobilization and selection in white adipocytes. <i>Max Lafontan &amp; Dominique Langin</i>	49–63
Fuel utilization by cells of the immune system. <i>Philip C. Calder</i>	65–82
Fuel selection in intestinal cells. <i>Pierre-Henri Duée, Beatrice Darcy-Vrillon, François Blachier &amp; Marie-Thérèse Morel</i>	83–94
Energy substrates for the rumen epithelium. <i>Didier Rémond, Isabelle Ortigues &amp; Jean-Pierre Jouany</i>	95–105
Fuel selection, muscle fibre. <i>Eric Hultman</i>	107–121

ORGAN FUEL SELECTION

Muscle fuel selection: effect of exercise and training. <i>Jan Henriksson</i>	125–138
Hepatic fuel selection. <i>Manfred J. Müller</i>	139–150
Organ fuel selection: brain. <i>Stephanie A. Amiel</i>	151–155
Metabolic fuel selection by intestinal epithelium. <i>Jehan-François Desjeux</i>	157–163
Substrate selection and oxygen uptake by the lactating mammary gland. <i>Dermot H. Williamson, Patricia Lund &amp; Rhys D. Evans</i>	165–175
Fuel selection in white adipose tissue. <i>Keith N. Frayn, Sandy M. Humphreys &amp; Simon W. Coppack</i>	177–189
The human epidermis. <i>Karin U. Schallreuter &amp; John M. Wood</i>	191–195
Fuel selection by the kidney: adaptation to starvation. <i>Gabriel Baverel, Bernard Ferrier &amp; Mireille Martin</i>	197–212
General integration and regulation of metabolism at the organ level. <i>M. Elia</i>	213–232

WHOLE-BODY FUEL SELECTION

Whole-body fuel selection in ruminants: nutrient supply and utilization by major tissues. <i>Isabelle Ortigues &amp; Anne-Laure Visseiche</i>	235–251
Nutrient effects: post-absorptive interactions. <i>Eric Jéquier</i>	253–265
Feeding, fasting and starvation: factors affecting fuel utilization. <i>I. A. MacDonald &amp; J. Webber</i>	267–274
What determines fuel selection in relation to exercise? <i>Arne Lindholm</i>	275–282
Whole-body fuel selection: 'reproduction'. <i>John J. Robinson &amp; Michael E. Symonds</i>	283–299
Comparative studies on programmes for management of energy supply: torpor, pre-winter fattening and migration. <i>J. F. Andrews</i>	301–315
Metabolic fuel selection: general integration at the whole-body level. <i>Philip J. Randle</i>	317–327
