

Instructions for Authors

Editorial policy: The journal welcomes submissions in any of the areas of plasma physics. Its scope includes experimental and theoretical work on basic plasma physics, the plasma physics of magnetic and inertial fusion, laser-plasma interactions, industrial plasmas, plasma devices and plasmas in space and astrophysics. This list is, of course, merely illustrative of the wide range of topics on which papers are invited, and is not intended to exclude any aspect of plasma physics that is not explicitly mentioned.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers. Manuscripts must be written in English. *Journal of Plasma Physics* employs a rigorous peer-review process whereby all submitted manuscripts are sent to recognized experts in their subjects for evaluation. The Editors' decision on the suitability of a manuscript for publication is final.

Submission of manuscripts: Papers may be submitted to any of the Editors or Associate Editors. Three copies should be sent accompanied by the author's address, telephone and fax number, and if possible, an electronic mailing address. Submission of a paper is taken to imply that it has not been previously published and that it is not being considered for publication elsewhere. Upon acceptance of a paper, the author will be asked to transfer copyright to the publisher.

The publisher encourages submission of manuscripts written in LaTeX for which a JPP style file can be obtained using anonymous FTP from the internet address `ftp.cup.cam.ac.uk`. Go into the directory `/pub/texarchive/journals/latex/` where you will find a concatenated file called `jpp.all`. This contains `readme.txt`, `jpp.sty` and `jppguide.tex`. If you use `jppguide.tex` you will get a full set of instructions for using the style file. In case of difficulties obtaining these files, there is a help-line available via e-mail; please contact `texline@cup.cam.ac.uk`. The publisher may also be able to typeset papers submitted on disc in ordinary LaTeX or plain TeX using 'article style'.

On final acceptance of a paper, authors should send the LaTeX source code including all author-defined macro and style files, on disc to the Editor, together with a hard copy produced using the same file. Discs should be in Apple Mac or PC format and will not be returned. It is not possible to accept final versions of papers via e-mail. The publisher reserves the right to typeset any article by conventional means if the author's TeX code presents problems in production.

Layout of manuscripts: Papers should be typewritten using **double spacing throughout**, on one side of the paper, allowing generous margins on all sides of the paper. Please avoid footnotes if possible. Papers should begin with an abstract of not more than 300 words and should end with a brief concluding section. The title and section headings should be concise and descriptive. All measurements should be given in SI units.

Illustrations: Figures should be drawn in black Indian ink on white paper or produced from a high quality laser printer. A list of captions should be attached separately, and as far as possible, information relating to a figure should be placed in the caption rather than on the figure. Each figure should be marked on the back, in pencil, with the author's name and the figure number. The top of each figure should be identified in pencil.

Tables should be typewritten on separate sheets of paper. A descriptive title should be given to each table. If possible, very wide tables should be avoided.

References: The Harvard system of references should be used. References should be listed in alphabetical order at the end of the main text. The reference should be in the order: author's surname, initials; year; journal name; volume number; page numbers. In the full references, a listing of all authors' names is preferred to the use of *et al.* If one author or group of authors has multiple papers published in the same year, the letters *a*, *b*, *c*, etc. should be appended after the year to distinguish the individual references. For books and conference proceedings, publisher and place of publication (and Editor(s) if appropriate) should be included. In the text, references should be cited as name (date) or (name date).

Proof Reading: Only typographical or factual errors may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

Offprints: 50 offprints of each article will be supplied free to each first named author. Extra offprints may be purchased from the publisher if ordered at proof stage. No page charge is made.

Copying: This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of \$11.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-3778/96 \$11.00 + .10.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

JOURNAL OF PLASMA PHYSICS

Volume 56 Part 2 October 1996

CONTENTS

Momentum-space diffusion due to resonant wave-wave scattering of electromagnetic and electrostatic waves in a relativistic magnetized plasma R. SUGAYA	193
Nonlinear coupling of a superluminal electromagnetic wave to a relativistic electron beam N. BISAI, A. SEN AND K. K. JAIN	209
Effect of simultaneous presence of collisions and ion temperature on modulational instability of ion acoustic waves IJAZ-UR-RAHMAN DURRANI	221
Effect of ion temperature and inhomogeneity on modulational instability of ion acoustic waves IJAZ-UR-RAHMAN DURRANI	229
Quasimode decay of a lower-hybrid wave in a two-electron-temperature plasma A. SUDARSHAN AND S. K. SHARMA	237
Magneto-hydrodynamic parametric instabilities driven by a standing Alfvén wave in low- β plasma L. P. L. OLIVEIRA AND A. C.-L. CHIAN	251
Resistive tearing-mode instability in a magnetic-field-reversing current sheet with coplanar viscous stagnation-point flow JUSTIN T. C. IP AND BENGT U. Ö. SONNERUP	265
Dissipative instability of the MHD tangential discontinuity in magnetized plasmas with anisotropic viscosity and thermal conductivity M. S. RUDERMAN, E. VERWICHTE, R. ERDÉLYI AND M. GOOSSENS	285
Electron holes and their role in the dynamics of current-carrying weakly collisional plasmas. Part 1. Immobile ions J. KORN AND H. SCHAMEL	307
Electron holes and their role in the dynamics of current-carrying weakly collisional plasmas. Part 2. Mobile ions J. KORN AND H. SCHAMEL	339
Almost-invariant surfaces for magnetic field-line flows S. R. HUDSON AND R. L. DEWAR	361
Announcement: Special Issue in Honour of David Montgomery	383
