

Clay Minerals

VOLUME 10 · NUMBER 1 · JULY 1973

CONTENTS

J. M. ROUSSEAU, P. G. ROUXHET, L. A. VIELVOYE and A. J. HERBILLON. The vermiculitization of trioctahedral micas. I. The K level and its correlation with chemical composition	1
T. BAIRD, A. G. CAIRNS-SMITH and D. W. MACKENZIE. An electron microscope study of magnesium smectite synthesis	17
PEI-LIN TIEN. Palygorskite from Warren Quarry, Enderby, Leicestershire, England	27
L. HELLER-KALLAI, S. YARIV and M. RIEMER. The formation of hydroxy interlayers in smectites under the influence of organic bases	35
R. L. BLEIFUSS. Activation of non-swelling bentonite	41
M. E. COSGROVE and A. M. A. SULAIMAN. A rapid method for the determination of quartz in sedimentary rocks by X-ray diffraction incorporating mass absorption correction	51
 Notes	
A. S. CAMPBELL. Anatase and rutile determination in soil clays	57
U. SCHWERTMANN. Electron micrographs of soil lepidocrocites	59
