Of the Causes of Improvement in the productive Powers of Labour, and of the Order according to which its Produce is naturally distributed among the different Ranks of the People

The greatest improvement in the productive powers of labour, and the order according to which its produce is naturally distributed among the different ranks of the people, is the result of the industry and judgment with which it is managed.

the person holding the string swings the ball in a very rhythmical and partly arbitrary, the illustration will show the difficulties of some very real and practical problems. For indeed the demand and supply schedules do not

V. I. 1. To represent the equilibrium of demand and supply geometrically draw the demand and supply curves together as in Fig. 19. If then the rate at which production is being actually carried on, and  $Rd$  the price greater than  $R_s$  the supply price, the production will be profitable, and will be increased.  $R$ , the amount-price, will move to the right. On the other hand, if  $Rd$  is less than  $R_s$ ,  $R$  will move to the left. If  $Rd$  is equal to  $R_s$ , that is, if  $R$  is vertically under a point of intersection of the two curves, demand and supply are in equilibrium. This diagram may be taken as the typical diagram for stable equilibrium of a commodity that obeys the law of diminishing returns. If we had made  $SS'$  a horizontal straight line, we should have presented the case of "constant return," in which the price is the same for all amounts of the commodity. If  $SS'$  inclined negatively, but less steeply than  $DD'$ , the necessity for this condition will appear more fully later on), we should have a stable equilibrium for a commodity which obeys the law of increasing returns. In this case the above reasoning remains unchanged without the alteration of a letter; but the last case introduces difficulties which we have arranged

may happen they have and commodities are not satisfied with Of course and Non-influences of which persistently them to and Non-broadened § 7. with in
