

## INDEX OF SUBJECTS.

	PAGE
Antibodies, <i>see</i> Immunity	
Antitoxin, <i>see</i> Diphtheria	
<i>Bacillus acidophilus</i> in intestine of infants . . . . .	241
<i>aertrycke</i> . . . . .	17, 295
<i>bifidus</i> , characters and isolation from infants' intestines . . . . .	241
<i>coli</i> in milk, <i>see</i> Milk sterilization, grading	
in water . . . . .	113
<i>diphtheriae</i> , <i>see</i> Diphtheria	
<i>paratyphosus</i> . . . . .	37, 45
<i>typhosus</i> in water . . . . .	117
<i>welchii</i> in water . . . . .	115
Bacteriological examination of water, <i>sulphite reduction test</i> . . . . .	111
Bacteriophage . . . . .	17
Birth-rate (monthly) . . . . .	274
Cancer and Immunology . . . . .	255
mortality in Copenhagen, has it changed? . . . . .	291
topographical incidence in Yorkshire and Midlands . . . . .	403
<i>see</i> Immunity	
Dairy, <i>see</i> Milk	
Diets, <i>see</i> Food	
Diphtheria, protective inoculation against . . . . .	301
Electric current and milk sterilization . . . . .	123
Endemic, <i>see</i> Goitre	
Epidemics, <i>see</i> Mouse-typhoid	
Epidemiology, experimental study of . . . . .	45
Fleas, <i>see</i> Plague	
Food, diets of rural and urban workers compared . . . . .	189
iodine content in relation to Goitre . . . . .	381
poisoning outbreaks, relation of paratyphoid fever to . . . . .	37
Goitre (endemic)	
etiology . . . . .	383
in New Zealand, relation to soil-iodine . . . . .	321
prophylaxis . . . . .	389
Haemic plasma cells in various infective conditions . . . . .	120
measles, Rubella, Scarlatina . . . . .	120
Immunity and malignant disease . . . . .	255
non-specific stimulation of natural antibody . . . . .	176
principles applied to protective inoculation against diphtheria . . . . .	301
<i>see</i> Epidemics, Epidemiology, Measles	
Intestinal flora of infants, <i>see Bacillus bifidus</i>	
Malignant disease and immunology . . . . .	255
<i>see</i> Cancer	

	PAGE
Measles, prophylaxis, recently developed methods . . . . .	427
. . . . . <i>see</i> Haemic	
Milk, cleansing of dairy utensils, influence on:	
bacterial content of churns . . . . .	419
keeping qualities of milk . . . . .	423
. . . . . grading by means of Fermentation-reductase test . . . . .	164
. . . . . sterilization with aid of electric current . . . . .	123
Mortality, <i>see</i> Cancer, Epidemiology, Measles	
Mouse-typhoid epidemics, Twort-d'Herelle phenomenon in . . . . .	17, 295
Paratyphoid fever, relation to food poisoning outbreaks . . . . .	37
. . . . . symptomatology . . . . .	37
<i>Pasteurella muris</i> , serological types, in relation to epidemics . . . . .	55
Plague fleas . . . . .	1
. . . . . rat fleas, comparative experiments on plague transmission by . . . . .	6
. . . . . factors governing their distribution . . . . .	9
. . . . . the flea species factor . . . . .	3
. . . . . <i>Xenopsylla cheopis</i> and imported plague . . . . .	9
. . . . . and <i>X. astia</i> and plague in Colombo . . . . .	12
Plague, occurrence in wild animals . . . . .	139
. . . . . regulation of numbers of wild animals . . . . .	138
Prophylaxis, <i>see</i> Diphtheria, Goitre, Measles	
Rubella, <i>see</i> Haemic	
Scarlatina, <i>see</i> Haemic	
Soil-iodine, <i>see</i> Goitre	
Sterilization, <i>see</i> Milk	
Sulphite reduction test, <i>see</i> Water	
Toxin, <i>see</i> Diphtheria	
Water, bacteriological examination of, and sulphite reduction test . . . . .	111
