

PHILOSOPHY OF SCIENCE, The Delaware Seminar

General Editor: WILLIAM L. REESE, University of Delaware

Editor: BERNARD BAUMRIN, University of Delaware

The Delaware Seminar in the Philosophy of Science is a continuing program devoted to the advancement and dispersal of research in philosophy of science. The Seminar programs explore, on the one hand, differences of opinion among scientists interested in the philosophic implications of their disciplines; and, on the other hand, differences of opinion among philosophers who have carefully considered various aspects of science. VOLUME 1 of the series illustrates the scope of philosophy of science; VOLUME 2 deals with the most pressing and perplexing problems in the philosophy of physics. Interscience Books.

VOLUME 1: 1963. 370 pages. \$ 9.75.

VOLUME 2: 1963. 551 pages. \$ 14.50.

Galen's *Institutio Logica*

English Translation, Introduction, and Commentary

By John S. Kieffer

This book makes available, for the first time, a complete English translation of this ancient work important to historians of logic and philosophy. Galen's *Institutio Logica* throws light on the state of logic in the second century A.D., and is of special interest as a source for knowledge of Stoic logic.

Professor Kieffer relates the *Institutio* to Galen's other writings on logical subjects, assesses his conception of logic and science, and traces the logical doctrines in the *Institutio* to their originators. He discusses what part of the book depends on earlier sources and what part may be Galen's own contribution. **\$ 5.50**
