

# THE EDINBURGH MATHEMATICAL SOCIETY

The Edinburgh Mathematical Society was instituted in 1883 for "the promotion and extension of Mathematical Science, Pure and Applied".

Members may subscribe to the *Proceedings* at a reduced rate. Further information about membership can be obtained from the Secretary.

The Society's address is

The Edinburgh Mathematical Society  
James Clerk Maxwell Building  
The King's Buildings  
Edinburgh EH9 3JZ

## Submission of papers

Papers to be considered for publication should be sent to the Secretary or to an Editor. Manuscripts (2 copies) should be typewritten on A4 paper with double spacing and generous margins. The style and arrangement should conform to current practice in the *Proceedings*. Each manuscript should contain a short abstract of not more than 200 words and also a primary classification number from the American Mathematical Society's 1990 Mathematics Subject Classification Scheme. References, including titles of papers, should be given in the form adopted by *Mathematical Reviews*, footnotes being avoided if possible. Figures should be separated from the text and lettered, ready for photographic reduction; their intended location should be clearly indicated. Manuscripts which are not suitable for submission to the printer will not be accepted. Authors are advised to retain a copy of any material submitted as the Society cannot accept responsibility for any loss.

A proof is supplied once. Authors are particularly requested to correct and return the proof promptly. Excessive corrections may be charged to authors. Fifty free offprints, and additional copies at cost, will be supplied if ordered on a form returned with the proof.

## Addresses of editors

C. M. Campbell  
Mathematical Institute  
University of St Andrews  
North Haugh  
St Andrews KY16 9SS

A. M. Etheridge  
Department of Statistics  
University of Oxford  
1 South Parks Road  
Oxford OX1 3TG

C. Maclachlan  
Department of Mathematical Sciences  
University of Aberdeen  
Edward Wright Building  
Dunbar Street  
Aberdeen AB24 3UE

L. O'Carroll  
Department of Mathematics and Statistics  
The University of Edinburgh  
James Clerk Maxwell Building  
The King's Buildings  
Edinburgh EH9 3JZ

R. W. K. Odoni  
Department of Mathematics  
University of Glasgow  
University Gardens  
Glasgow G12 8QW

S. C. Power  
Department of Mathematics  
University of Lancaster  
Lancaster LA1 4YF

D. M. Sloan  
Department of Mathematics  
University of Strathclyde  
Livingstone Tower  
Richmond Street  
Glasgow G1 1XH

B. Straughan  
Department of Mathematics  
University of Glasgow  
University Gardens  
Glasgow G12 8QW

I. Tweddle  
Department of Mathematics  
University of Strathclyde  
Livingstone Tower  
Richmond Street  
Glasgow G1 1XH

# Proceedings of the Edinburgh Mathematical Society

VOLUME 41 (SERIES II), PART 1

FEBRUARY 1998

<b>On the foundations of inverse monoids and inverse algebras</b>	<b>1</b>
<i>Jonathan Leech</i>	
<b>The Cartan determinant and generalizations of quasihereditary rings</b>	<b>23</b>
<i>W. D. Burgess and K. R. Fuller</i>	
<b>Radial functions on compact support</b>	<b>33</b>
<i>M. D. Buhmann</i>	
<b>Hypoelliptic differential operators with generalized constant coefficients</b>	<b>47</b>
<i>M. Nedeljkov and S. Pilipović</i>	
<b>Construction of Schauder decomposition on Banach spaces of periodic functions</b>	<b>61</b>
<i>Say Song Goh, S. L. Lee, Zuowei Shen and W. S. Tang</i>	
<b>On some "stability" properties of the full <math>C^*</math>-algebra associated to the free group <math>F_\infty</math></b>	<b>93</b>
<i>Asma Harcharras</i>	
<b>Nonlinear periodic parabolic problems with nonmonotone discontinuities</b>	<b>117</b>
<i>Dimitrios A. Kandilakis and Nikolaos S. Papageorgiou</i>	
<b>The spectra of Toeplitz operators with unimodular symbols</b>	<b>133</b>
<i>Takahiko Nakazi</i>	
<b>Geometrically finite Kleinian groups and parabolic elements</b>	<b>141</b>
<i>Ken'ichi Ohshika</i>	
<b>Closed ideals in the Banach algebra <math>\ell^1(\omega)</math> when <math>\omega</math> is <math>\varepsilon</math>-star shaped</b>	<b>161</b>
<i>Marc P. Thomas</i>	
<b>Generalized blocked triangular matrix rings associated with finite abelian centralizer near-rings</b>	<b>177</b>
<i>Kirby C. Smith and Leon van Wyk</i>	
<b>A measure of non-immersability of the Grassmann manifolds in some euclidean spaces</b>	<b>197</b>
<i>Cornel Pinteá</i>	
<b>Book Reviews</b>	<b>207</b>
