

patients climbing onto the conveyor belt.

FFS should die, and soon, but there are many other systemic issues that will need to be resolved before our longevity is increased.

### Correction

In the CAEP Annual Scientific Assembly Abstract Submission Information,<sup>1</sup> published in the October 2000 issue of *CJEM*, under the subheading "Abstract review process" the CAEP Web site should have been listed as [www.caep.ca](http://www.caep.ca)

We apologize for this error.

# 2001 A CAEP Odyssey

## A Journey to the Future of Emergency Medicine

### MARCH 21–24, 2001

### CAEP Annual Scientific Meeting

**T**he 2001 CAEP Annual Scientific Meeting will offer four days where you can hear about, discuss and participate in the latest in Canadian Emergency Medicine. Here are some of the major themes that will be highlighted.

**Technomerge** — the application of 21st Century technological advances to the practice of Emergency Medicine

**Money in the 21st Century** — covering not only personal and departmental financial issues but also entrepreneurial opportunities

**Black Holes** — aspects of emergency care that don't directly involve patients but that can still swallow us, such as legal and administrative issues

**Interfacing with Industry** — highlighting the Oil Industry as an example of how our scope of practice can extend into the community

There will also be an academic look at the latest developments in clinical Emergency Medicine in the

**Cutting Edge** track and through a full **Research** programme. Hands-on workshops and **In The Trenches** review presentations will present real clinical issues in a new light.

This will be one of the first conferences held in the new TELUS Convention Centre. It is a fantastic state-of-the-art facility integrated into hotels, shopping and the Glenbow Museum. A **cyber café** will allow you to sample the latest in computer goodies.

**Pre-conference Features — March 19th and 20th**

**CAEP Roadshows: CME in the Snow**

Choose either "Plugs & Drugs" or "AIME: Airway Interventions & Management Education." The Roadshows will be scheduled to allow lots of time for skiing, boarding or sleighing. Or . . . just soak your troubles away in Banff's world famous mineral hot springs.

**Second Canadian EM Residents Workshop**

Tentatively scheduled for Mar. 19–20. Get involved! Read reports of the First Canadian EM Residents Workshop in the October issue and in this issue of *CJEM*.
